Installation Requirements

For proper installation of these devices, the correct crimp tool and a heating tool with a reflector attachment must be used. The AD-1522 crimp tool and HL1910E/ HL2010E heating tool are recommended.

You will find ordering information for these tools in Section 10.

Refer to TE installation procedure RPIP-821-00 for detailed instructions.

Installation

1. Select splice of appropriate size. Strip wire 7.5 mm (5/16 in). Insert into crimp barrel.

2. Crimp using AD-1522 crimp tool for preinsulated crimps.

 Heat crimped splice with heat gun until tubing recovers and adhesive flows.
