0.5mm Pitch, 5.8mm above the board, vertical connectors for FPC

FH40 Series

Features

1. Reduction in connection man-hours (30% reduction compared to our conventional item)

Our unique actuator form enables the completion of both FPC insertion \sim joint in the same motion.

2. Prevention of half and diagonal joints

The side catcher for FPC positioning ensures accurate FPC insertion.

3. Durable structure and no lost actuator

The unique terminal form means the actuator is retained, even under rough operation conditions.

4. One-finger operation of the actuator

Proven (in several other Hirose's connectors!) Flip-Lock rotating actuator assures reliable mechanical and electrical connection with FPC, confirming it with a definite tactile feel.

5. Accepts standard FPC thickness

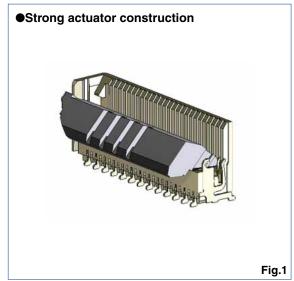

0.3mm thick standard Flexible Printed Circuit (FPC) can be used.

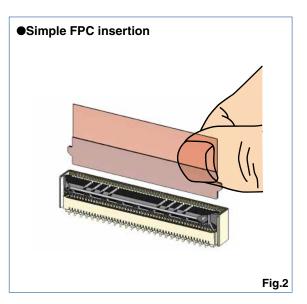

6. Board placement with automatic equipment

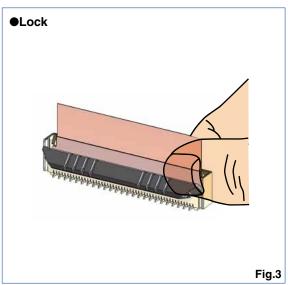

Flat upper surface and tape and reel packaging facilitate vacuum pick-up and placement. Standard reel packaging contains 1,000 connectors.

7. Halogen-free *

*As defined by IEC61249-2-21 Br-900ppm maximum, CI-900ppm maximum, CI + Br combined-1,500ppm maximum

Note 1 : When passing the current through all of the contacts, use 70% of the rated current.

Note 2 : Includes temperature rise caused by current flow.

Note 3 : The term "storage" refers to products stored for a long period prior to mounting and use. The operating temperature and humidity range covers the non-conducting condition of installed connectors in storage, shipment or during transportation after board mounting.

Connector Dimensions

Note 1: The coplanarity of each terminal lead within specified dimension is 0.1mm Max.

Note 2 : Packaged on tape and reel only. Check packaging specification.

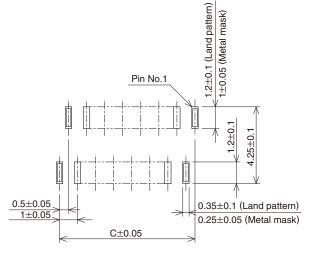

Note 3 : Slight variations in color of the plastic compounds do not affect form, fit or function of the connector.

Note 4 : After reflow, the terminal plating may change color, however this does not represent a quality issue.

Recommended PCB mounting pattern and metal mask dimensions

Recommended metal mask thickness : t=0.15

Recommended FPC Dimensions

It is not recommended to mate FPC without tabs to this connector.

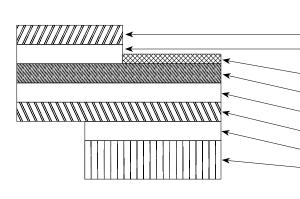

Note 1 : Stiffener dimension should be 3.5mm min., and X dimension should be 0.5mm for improved flexibility of FPC.
