Inductors for power circuits

Wound ferrite

VLS-E-CA series (For automobiles)

VLS2010E-CA type

VLS2010E-CA

A Caution

The products in this catalog is not recommended to a new design

Please refer to our Web site about replacement information.

Before using these products, be sure to request the delivery specifications.

SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using these products.

| Before soldering, be sure to preheat components. The preheating temperature should be set so that the temperature difference between the solder temperature and chip temperature does not exceed 150°C. Soldering corrections after mounting should be within the range of the conditions determined in the specifications. If overheated, a short circuit, performance deterioration, or lifespan shortening may occur. When embedding a printed circuit board where a chip is mounted to a set, be sure that residual stress is not given to the chip due to the overall distortion of the printed circuit board and partial distortion such as at screw tightening portions. Self heating (temperature increase) occurs when the power is turned ON, so the tolerance should be sufficient for the set thermal design. Carefully lay out the coil for the circuit board design of the non-magnetic shield type. A malfunction may occur due to magnetic interference. Use a wrist band to discharge static electricity in your body through the grounding wire. Do not use for a purpose outside of the contents regulated in the delivery specifications. The products listed on this catalog are intended for use in general electronic equipment, telecommunications equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measurement equipment, home applicances, amusement equipment, computer quipment, malfunction or trouble could cause serious damage to society, person or property. If you intend to use the products in the applications listed below or if you have special requirements exceeding the range or condition set forth in the each catalog, please contact us. Areospace/Aviation equipment (a) Medical equipment (b) Multary equipment (c) Multary equipment (d) Other applications that are not conside | | | | | | | | |

Overview of VLS2010E-CA type

FEATURES

O Magnetic shield type wound inductor for power circuits.

O Low-profile product.

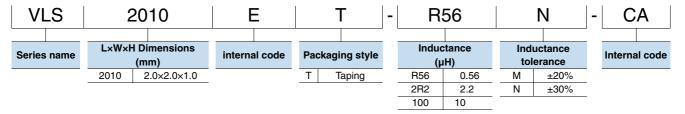

O High magnetic shield construction and compatible with high-density mounting.

APPLICATION

Car navigation, car stereo and car accessories only

* Not available for use related to driving, curving, stopping, and the other safety.

PART NUMBER CONSTRUCTION

OPERATING TEMPERATURE RANGE, PACKAGE QUANTITY, PRODUCT WEIGHT

| | Temperat | ure range | Package quantity | Individual weight |
|-------------|---------------------------|--------------------------|------------------|-------------------|
| Туре | Operating temperature* | Storage temperature** | | |
| | (° C) | (° C) | (pieces/reel) | (mg) |
| VLS2010E-CA | -40 to +105 | -40 to +105 | 2000 | 16 |

* Operating temperature range includes self-temperature rise.

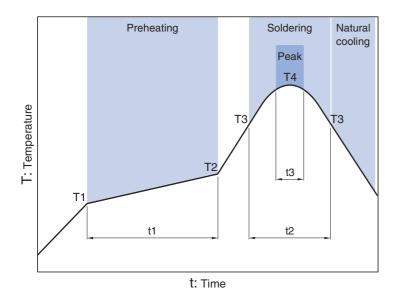

** The Storage temperature range is for after the circuit board is mounted.

O RoHS Directive Compliant Product: See the following for more details.https://product.tdk.com/info/en/environment/rohs/index.html

O Halogen-free: Indicates that CI content is less than 900ppm, Br content is less than 900ppm, and that the total CI and Br content is less than 1500ppm.

VLS2010E-CA type
