## Z-PACK HM-Zd Product Line Overview

### Product Facts

- Z-PACK HM-Zd connector is an extension of the Z-PACK 2mm HM product line
- Designed specifically for high speed differential applications
- A modular connector system with a standard module size of 25.00 [.984]
- Contact pitch is 1.50 [.059] within a pair and 3.00 [.118] pair to pair within a column; column to column pitch is 2.50 [.098]
- Card Pitch is less than 20.32 [.800] for 2 pair and 3 pair headers and 25.40 [1.000] for 4 pair headers
- Available in three versions:
  - 2 signal contact pairs per column (20 pairs per 25.00 [.984]) compatible with 5 row Z-PACK 2mm HM connector
  - 3 signal contact pairs per column (30 pairs per 25.00 [.984])
  - 4 signal contact pairs per column (40 pairs per 25.00 [.984]) compatible with 8 row Z-PACK 2mm HM connector
- Available in vertical and right angle press fit pin headers and right angle and vertical press fit receptacles
- Optimized footprint for improved electrical performance and ease of trace routing (unobstructed routing channels on both daughtercard and backplane)
- Pin header and receptacle have the exact same footprint to simplify PC board layout
- Designed to meet Telcordia requirements
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476 

IGES is a trademark of IAMBA Networks, Inc.

PRO/E is a trademark of Parametric Technology Corp.

TELCORDIA is a trademark of Telcordia Technologies, Inc.

The Z-PACK HM-Zd connector system is a high speed, differential connector system, which is compatible with the Z-PACK 2mm HM connector line. Z-PACK HM-Zd connector provides Z-PACK 2mm HM connector users with a migration path for serial

switching applications from 3.125 Gb/s to 10+ Gb/s.

The Z-PACK HM-Zd connector system features a highly reliable dual beam contact system with fully encompassing grounds dedicated to each differential pair. In addition, the Z-PACK HM-Zd connector

footprint is optimized for both routability and system performance with the use of a 1.50 x 2.50 [.059 x .098] row to column grid. The connector design features a robust mating interface with integral prealignment and polarization built into the mating interface.

### Availability

Fully validated SPICE models: E-mail requests to [modeling@tycoelectronics.com](mailto:modeling@tycoelectronics.com)

Samples: go to <http://tycoelectronics.custhelp.com>

Pro/E models and IGES models: E-mail requests to [TycCAD@tycoelectronics.com](mailto:TycCAD@tycoelectronics.com)

White Papers: available on product website at <http://hmzd.tycoelectronics.com>

### Technical Documents

Product Specification  
108-2055

Application Specification  
114-13059

Qualification Test Report  
501-568

### Material and Finish

Contact Area Finish — 0.80µm Au min. over 1.3µm Ni min.

Compliant Pin Finish — 0.8µm SnPb min. over 1.3µm Ni min.

Contact Material — Copper Alloy

Housing Material — Glass filled polyester, 94V-0 rated

### Ratings

Current — 0.7A per signal contact, fully energized 2A per shield, all shields energized

Operating Voltage — 500 VAC maximum, signal to signal 250 VAC maximum, signal to ground

Temperature — -65°C to 105°C

Mating Force — 0.38N maximum per contact (signal = 1 contact, ground = 1 contact)

Durability — 250 cycles

\* Reference Product Spec. 108-2055 for complete list of performance data.

**Power and Guide Hardware  
Universal Power Module  
Vertical Receptacle (3 Pos.)**

The Tyco Electronics Universal Power Module is a three position, modular, hard metric board-to-board power connector designed to be compatible with Z-PACK 2mm HM connectors. The design is in an "inverse-sex" orientation and the vertical receptacle module meets the IEC 950 safety requirements for finger probe protection.

Both the headers and receptacle utilize Tyco Electronics ACTION PIN press-fit leads for ease of assembly onto printed circuit boards. Additionally, the vertical receptacle leads are polarized to allow only one orientation onto the printed circuit board, eliminating the possibility of reverse placement.

The Universal Power Module is compatible with a wide variety of other Tyco Electronics board-to-board connectors including Z-PACK HS3, Z-PACK HM-Zd and Z-PACK TinMan connectors.

The housings are thermoplastic and the contacts are offered in either a standard or high current copper alloy. Contact finish is gold over nickel on the mating surfaces. The contacts are designed to carry 10 amperes per contact in standard assemblies and 15 amperes per contact in the high current assemblies. Actual values may vary depending upon connector size, board design, etc.

The right angle header

contacts are available with sequenced lengths for "make-first/break-last" applications.

Generous alignment features designed into the housings and optional guide pins and receptacles make the Tyco Electronics Universal Power Module ideal for "blind mating" applications.

**Recommended PC Board Hole Layout**

	Position Loaded	Part Numbers
Vertical Receptacle	ABC	223955-2
	AC	223984-1
High Current	ABC	5-223955-2

**PCB Hole Dim.**  
 Drilled Hole =  $0.7000 \pm 0.025$  [0.02756 ± .0010]  
 Finished Hole =  $0.60 \pm 0.05$  [0.024 ± .002]  
 Cu Thickness =  $0.375 \pm 0.0125$  [0.0148 ± .00049]  
 SnPb Thickness =  $0.007 \pm 0.003$  [0.0003 ± .0001]

**Note:** For finishes other than Tin-Lead, reference Application Specification 114-1103.

**Note:** All part numbers are RoHS compliant. Tin-Lead parts are RoHS compliant through exemption for lead in press-fit connectors.

Backplane Connector

**AdvancedTCA Product Guide/Keying Modules**

The AdvancedTCA Guide Modules can be used in a wide variety of applications. For *motherboard-to-daughtercard applications* the vertical pin and right angle socket are used. This popular configuration is further supported by our wide offering of available keying positions. Each of the two keyed guide pins and guide sockets per module can be produced in a variety of different key positions. For *co-planar applications*, the right angle guide pins are used along with the right angle guide sockets. Both vertical and right angle guide pins are available in short or long sizes, to accommodate being used with different Tyco Electronics connectors.

**Z-PACK HM-Zd Connector Footprint and PC Board Trace Routing**

- Accounts for system design requirements
- Footprint is optimized for low noise and ease of routing
- Footprint permits wide traces for long runs and without having to separate differential pairs
- Footprint supports quad routing techniques (see below)

**Benefits of Quad Routing**

- **Better Platform Characteristics**
  - Performance variation due to layer connection is reduced
  - Crosstalk is reduced
  - Return loss is reduced
- **Enables a lower cost solution**
  - Cost of better materials is offset by reduced processing
  - Increased manufacturability—less layers and decreased aspect ratios
  - Decreased number of layers reduces the need for counterboring of PC boards

**Notes Regarding Quad Routing:**

1. Within pin field, center signal pairs between signal columns
2. Trace separation is increased over "standard" recommendations to further limit trace to trace crosstalk
3. Recommend Quad Routing pairs together that are propagating in the same direction

**Notes Regarding Antipad Design:**

1. An oval shaped antipad may be used to increase PC board manufacturability and to improve trace break-out
2. Antipad length shown is 2.92 [.114]. An antipad length up to 3.48 [.137] may be used.

**Z-PACK HM-Zd Connector (Continued)**

**Compatible 2mm HM Products**

**Z-PACK 2mm HM Type A & B Connector Modules**

- Offered with five rows of signal contacts and two rows of ground contacts
- Type A offers center guiding and keying facility and 110 signal contacts
- Type B has 125 signal contacts
- Upper ground return shields are pre-fitted to receptacles and used with the 5+2 row male connectors
- Up to three levels of sequenced pins available on vertical pin headers
- Both types are end stackable without change in contact pitch

**Z-PACK 2mm HM Type D & E Connector Modules**

- Offered with 8 rows of signal contacts and two rows of ground contacts
- Type D offers center guiding and keying facility and 176 signal contacts
- Type E has 200 signal contacts
- Upper ground return shields are pre-fitted to receptacles and used with 8+2 row male connectors
- Up to three levels of sequenced pins available on vertical pin headers
- Both types are end stackable without change in contact pitch

**Z-PACK 2mm HM Type F & C Connector Modules**

- Half size modules which are intended for use at the end of a column
- Type C has 55 signal pins and guidance features
- Type F has 88 signal pins and guidance features
- Upper ground return shields are pre fitted to receptacles and used with 5+2 and 8+2 row connectors
- Three levels of sequenced pins available on vertical pin headers
- Both types are end stackable without change in contact pitch

**Type AB/ DE Modules**

- Offers maximum signal density and alignment features of standard Type A & D modules
- Type AB offers 125 signal contacts and guiding and keying features
- Type DE offers 200 signal contacts and guiding and keying features
- Offers all the advantages of sequenced pins, pre-shielded receptacles and end stackable

**Type L M & N Connectors**

- DIN contacts can be fitted to types L, M and N style housings either in power or coax options
- 5 row and 5+2 row connector options
- Type L accommodates up to 6 DIN contacts
- Type M connectors are loaded with 55 signal contacts in row A to E and 3 cavities for DIN style contacts
- Type N accommodates up to 3 DIN contacts

**Receptacles with Upper and Lower Ground Return Shields**

- Mates with 5+2 and 8+2 row male product to improve signal integrity
- Three levels of performance
  - a) reduced cross talk
  - b) ground return shields
  - c) reduced cross talk and ground return shields

**Z-PACK 2mm HM Connector Coding Keys**

- Used in Type A, D, L and M male and female connectors
- Polarized features and used in the multi-purpose center of the male and female housings
- Keys are inserted in the mating faces of the housings
- Available in up to 70 different options

**Shrouds**

- Offered in type A, B, A/B, C, D, E, D/E, and F
- Product is offered in various standoff heights to accommodate a wide variety of pcb thicknesses

**Right Angle Male Offering**

- 5 row connector offering Type A, B & C style product mate with respective right angle product for card extender applications
- Type A has 110 signal contacts and center guidance and keying facility
- Type B offered in 25, 22 & 19 column offerings
- Type C has 55 signal contacts and guidance features
- Available in standard and reduced cross talk varieties

**Universal Power Module**

- Offered in 3 to 12 position sizes
- Inverse sex configuration offers a vertical receptacle for backplane applications
- Polarized vertical press fit leads
- Up to 15 amperes per contact with a durability rating of 250 mating cycles

**Vertical Receptacles**

- 5 & 8 row product offering
- Used with either vertical or right angle males in application
- Type A & D offers center keying and guidance
- Type B & E offers 25 columns of signal contacts
- Type C & F is a half size module with guidance features
