

DC/DC Converters

TEN 50WI Series, 50 Watt

Features

- Very high power density: 50 W in 1" x 2" x 0.4" package
- Wide 4:1 input range
- ◆ Excellent efficiency up to 92 %
- Operating temperature range -40°C to +80°C
- Protection against over-temperature
- No minimum load required
- Output voltage adjustable
- Remote On/Off
- ◆ I/O isolation 1500 VDC
- 3-year product warranty

The TEN 50WI Series is a range of isolated high performance DC/DC converter modules. With a very high efficiency of up to 92% and the use of highest reliable components these 50 W converters can be packed into the standard 1.0" x 2.0" casing. The 10 models have a wide 4:1 input voltage range and a tight output voltage regulation. They do not need a minimum load and offer a high efficiency also at low load conditions. The output voltage is adjustable by external resistor. Remote On/Off and protection against overload and short circuit are standard features of these converters.

Typical applications are in mobile equipment, instrumentation, distributed power architectures in communication and industrial electronics and everywhere where space on the PCB is critical.

Material: Aluminum

Finish: Anodic treatment (black)
Weight: 9 g (0.31oz) without converter
Thermal impedance after assembling: 10 K/W

Note:

Before attaching the heatsink, the product label on converter has to be removed for optimal performance.

For volume orders we can supply the converters with heatsink already mounted. Please contact us for a relative quotation.
