Series 114

DPDT Non-Latching Established Reliability / Military Relay

CENTIGRID® ESTABLISHED RELIABILITY MILITARY DPDT

SERIES	RELAY TYPE				
114	DPDT basic relay				
114D	DPDT relay with internal diode for coil transient suppression				
114DD	DPDT relay with internal diodes for coil transient suppression and polarity reversal protection				

DESCRIPTION

The 114 sensitive Centigrid[®] relay retains the same features as the 114 standard Centigrid[®] relay with only a minimal increase in profile height (.275 in.). Its .100-inch grid spaced terminals, which preclude the need for spreader pads, and its low profile make the 134 relay ideal for applications where high packaging density is important.

The following unique construction features and manufacturing techniques provide excellent resistance to environmental extremes and overall high reliability:

The 114 feature:

- All welded construction.
- Advanced cleaning techniques provide maximum assurance of internal cleanliness.
- Unique uni-frame design providing high magnetic efficiency and mechanical rigidity.

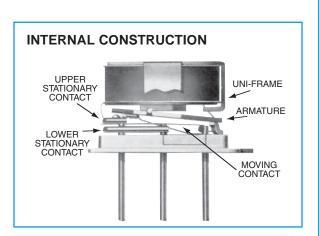

· High force/mass ratios for resistance to shock and vibration.

• Precious metal alloy contact material with gold plating assures excellent high current and dry circuit switching capabilities.

The Series 114D and 114DD have internal discrete silicon diodes for coil suppression and polarity reversal protection.

By virtue of its inherently low intercontact capacitance and contact circuit losses, the 114 relay has proven to be an excellent ultraminiature RF switch for frequency ranges well into the UHF spectrum. A typical RF application for the Centigrid[®] relay is in handheld radio transceivers, wherein the combined features of good RF performance, small size, low coil power dissipation and high reliability make it a preferred method of Transmit-Receive switching

ENVIRONMENTAL AND PHYSICAL SPECIFICATIONS				
Temperature (Ambient)	–65°C to +125°C			
Vibration (General Note I)	30 g's to 3000 Hz			
Shock (General Note I)	75 g's, 6ms half sine			
Acceleration	50 g's			
Enclosure	Hermetically sealed			
Weight	0.09 oz. (2.55g) max.

NOTES:

1. Relay contacts will exhibit no chatter in excess of 10 µsec or transfer in excess of 1 µsec.

2. "Typical" characteristics are based on available data and are best estimates. No on-going verification tests are performed.

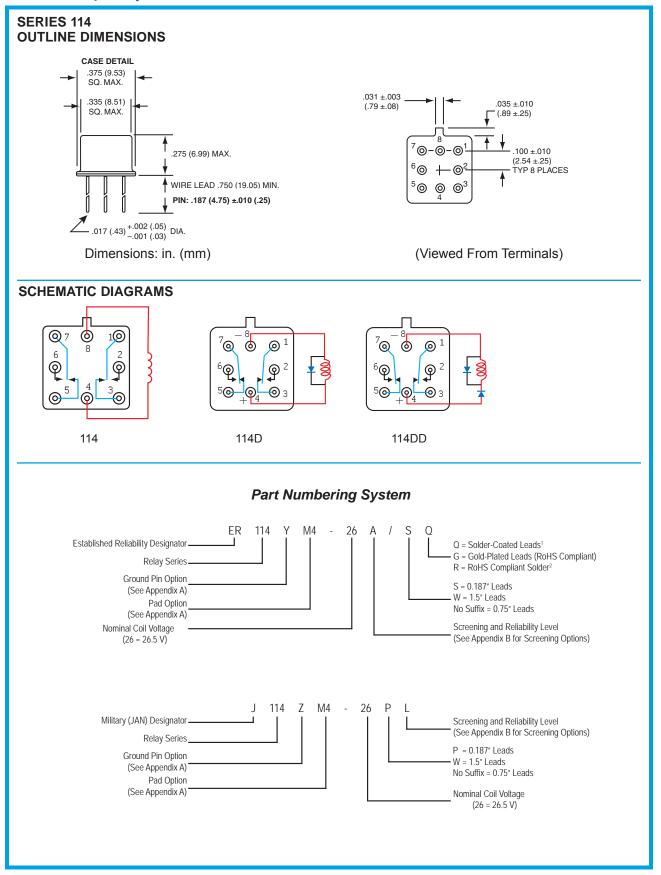

3. Unless otherwise specified, parameters are initial values.

4. For reference only. Coil resistance not directly measurable at relay terminals due to internal series semiconductor, 114DD only

- 5. Unless otherwise specified, relays will be supplied with either gold-plated or solder-coated leads.
- 6. The slash and characters appearing after the slash are not marked on the relay.
- 7. Limit Base Emitter current to 15 mAdc.
- 8. Applicable to all coil voltages. See Base current to turn on.
- 9. Screened HI-REL versions available. Contact factory.
