

0402ESDA-MLP

ESD suppressor

Product description

- Ultra-low capacitance (0.05 pF) ideal for high speed data applications
- Provides Electro Static Discharge (ESD) protection with fast response time (<1 ns) allowing equipment to pass IEC 61000-4-2 Level 4 test
- Single-line, bi-directional device
- 0402 (1005 metric) compact design utilizes less board space
- Lead free, Halogen free and RoHS compliant

Applications

- ESD port protection for mobile/smart phones
- Game console ESD port protection
- High speed ESD data port protection
- Set-top-boxes
- Tablets, notebooks, netbooks, laptops
- High definition television (HDTV)
- Media players
- Digital cameras
- Medical equipment
- Computers and peripherals ESD port protection
- Consumer electronics

Ordering

- Specify part number and termination suffix (e.g. 0603ESDA-MLP1)
0603ESDA-MLP=part number,
1=Termination suffix

Termination suffixes

- 1 (Dip termination, Packaged: Tape and reel, 10 000 parts per 7" diameter reel)

1. Clamping voltage: Per IEC61000-4-2, Level 4 waveform (8 kV direct 30 A) measured 30 ns after initial pulse.
2. Trigger voltage: Trigger measurement made using Transmission Line Pulse (TLP) method.

3. Minor shifting in characteristics may be observed over multiple ESD pulses at very rapid rate.
4. Part Number Definition: 0402ESDA-MLP
0402ESDA= Product code and size
-MLP= Form designation

Dimensions—mm [in]

Design considerations

The location in the circuit for the 0402ESDA-MLP has to be carefully determined. For better performance, the device should be placed as close to the signal input as possible and ahead of any other component. Due to the high current associated with an ESD event, it is recommended to use a “0-stub” pad design (pad directly on the signal/data line and second pad directly on common ground).

Environmental data
