

DS30EA101 0.15 to 3.125 Gbps Adaptive Cable Equalizer

Check for Samples: [DS30EA101](#)

FEATURES

- Automatic Equalization of Coaxial and Twisted Pair Cables
- Data Rates from 150 Mbps to 3.125 Gbps
- Supports SD and HD Video Resolutions
- Power Consumption: 115 mW Typical
- Industrial Temperature Range: -40°C to +85°C

APPLICATIONS

- Cable Extension
- Data Recovery Equalization
- Security and Surveillance

DESCRIPTION

The DS30EA101 is an adaptive cable equalizer optimized for equalizing data transmitted over copper cables. The equalizer operates over a range of data rates from 150 Mbps to 3.125 Gbps and automatically adapts to equalize signals sent over any cable length from zero meters to lengths that attenuate the signal by 50 dB at 1.5 GHz.

The DS30EA101 allows either single-ended or differential input. This enables equalization of signals over coaxial cables as well as twisted pair cables.

Additional features include an LOS detect and output enable which, when tied together, disable the output when no input signal is present.

The DS30EA101 is powered from a single 2.5V supply and consumes 115 mW (typical). It operates over the full industrial temperature range of -40°C to +85°C and is available in a 4 x 4 mm 16-pin WQFN package.

Typical Application

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

All trademarks are the property of their respective owners.

Connection Diagram

The exposed die attach pad is a negative electrical terminal for this device. It should be connected to the negative power supply voltage.

**Figure 1. 16-Pin WQFN Package
See Package Number RUM0016A**

PIN DESCRIPTIONS

Pin	Name	I/O, Type	Description
1	V _{EE}	Ground	Negative power supply (ground).
2	IN+	I, Data	Non-inverting input.
3	IN-	I, Data	Inverting input.
4	V _{EE}	Ground	Negative power supply (ground).
5	DNC	N/A	Do not connect – leave open.
6	DNC	N/A	Do not connect – leave open.
7	V _{EE}	Ground	Negative power supply (ground).
8	V _{EE}	Ground	Negative power supply (ground).
9	V _{EE}	Ground	Negative power supply (ground).
10	OUT-	O, LVDS	Inverting output.
11	OUT+	O, LVDS	Non-inverting output.
12	V _{EE}	Ground	Negative power supply (ground).
13	V _{CC}	Power	Positive power supply (+2.5V).
14	EN	I, LVCMOS	Output enable. LOS may be tied to this pin to inhibit the output when no input signal is present. This pin has an internal pulldown. H = Outputs disabled. L = Outputs enabled.
15	LOS	O, LVCMOS	Loss of signal. H = No input signal detected. L = Input signal detected.
16	V _{CC}	Power	Positive power supply (+2.5V).
DAP	V _{EE}	Ground	Connect exposed DAP to negative power supply (ground).

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

Absolute Maximum Ratings⁽¹⁾

Supply Voltage	3.1V
Input Voltage (all inputs)	-0.3V to $V_{CC}+0.3V$
Storage Temperature Range	-65°C to +150°C
Junction Temperature	+125°C
Package Thermal Resistance θ_{JA} 16-pin WQFN θ_{JC} 16-pin WQFN	+40°C/W +6°C/W
ESD Rating (HBM)	$\geq \pm 6$ kV
ESD Rating (MM)	$\geq \pm 300V$
ESD Rating (CDM)	$\geq \pm 2$ kV

- (1) "Absolute Maximum Ratings" indicate limits beyond which damage to the device may occur, including inoperability and degradation of device reliability and/or performance. Functional operation of the device and/or non-degradation at the Absolute Maximum Ratings or other conditions beyond those indicated in the Recommended Operating Conditions is not implied. The Recommended Operating Conditions indicate conditions at which the device is functional and the device should not be operated beyond such conditions.

Recommended Operating Conditions

Supply Voltage (V_{CC})	2.5V $\pm 5\%$
Input Coupling Capacitance	1.0 μF
Operating Free Air Temperature (T_A)	-40°C to +85°C

DC Electrical Characteristics

Over recommended supply voltage and operating temperature ranges, unless otherwise specified.⁽¹⁾⁽²⁾

Parameter		Test Conditions	Reference	Min	Typ	Max	Units
V_{IN}	Input Voltage	0m cable length	IN+, IN-	720	800	880	mV _{P-P}
V_{SS}	Steady State Differential Output Voltage	100 Ω load, Figure 2	OUT+, OUT-	500	700	900	mV _{P-P}
V_{OD}	Differential Output Voltage			250	350	450	mV
ΔV_{OD}	Change in Magnitude of V_{OD} for Complimentary Output States					50	mV
V_{OS}	Offset Voltage			1.1	1.2	1.35	V
ΔV_{OS}	Change in Magnitude of V_{OS} for Complimentary Output States					50	mV
I_{OS}	Output Short Circuit Current						30
V_{IH}	Input Voltage High Level		\overline{EN}	1.7		V_{CC}	V
V_{IL}	Input Voltage Low Level			V_{EE}		0.7	V
V_{OH}	Output Voltage High Level	$I_{OH} = -2$ mA	LOS	2.0			V
V_{OL}	Output Voltage Low Level	$I_{OL} = +2$ mA				0.2	V
I_{CC}	Supply Current				45	65	mA

- (1) The Electrical Characteristics tables list ensured specifications under the listed Recommended Operating Conditions except as otherwise modified or specified by the Electrical Characteristics Conditions and/or Notes. Typical specifications are estimations only and are not ensured.
- (2) Typical values represent most likely parametric norms at $V_{CC} = +2.5V$, $T_A = +25^\circ C$, and at the Recommended Operating Conditions at the time of product characterization and are not ensured.

AC Electrical Characteristics

Over recommended supply voltage and operating temperature ranges, unless otherwise specified. ⁽¹⁾⁽²⁾

Parameter		Test Conditions	Reference	Min	Typ	Max	Units
DR _{IN}	Input Data Rate		IN+, IN-	150		3125	Mbps
t _{JIT}	Total Jitter at BER 10 ⁻¹² ⁽³⁾	3.125 Gbps, 0-10 meters CAT6			0.35		UI
		2.5 Gbps, 0-25 meters CAT6			0.35		UI
		1.5 Gbps, 0-50 meters CAT6			0.35		UI
		3.125 Gbps, 0-100 meters RG59			0.3		UI
		2.5 Gbps, 0-110 meters RG59			0.35		UI
		1.5 Gbps, 0-120 meters RG59			0.2		UI
t _{TLH}	Transition Time Low to High	20% - 80%, 100Ω load, ⁽⁴⁾ , Figure 2	OUT+, OUT-		90	130	ps
t _{THL}	Transition Time High to Low				90	130	ps

- (1) The Electrical Characteristics tables list ensured specifications under the listed Recommended Operating Conditions except as otherwise modified or specified by the Electrical Characteristics Conditions and/or Notes. Typical specifications are estimations only and are not ensured.
- (2) Typical values represent most likely parametric norms at V_{CC} = +2.5V, T_A = +25°C, and at the Recommended Operating Conditions at the time of product characterization and are not ensured.
- (3) The total jitter at BER 10⁻¹² is calculated as DJ + (14 x RJ), where DJ is deterministic jitter and RJ is random jitter. The jitter is expressed as a portion of the unit interval (UI). The UI is the reciprocal of the data rate.
- (4) Specification is ensured by characterization and is not tested in production.

TIMING DIAGRAMS

Figure 2. LVDS Output Voltage, Offset, and Timing Parameters

DEVICE OPERATION

The DS30EA101 equalizes data transmitted over copper cables. It automatically adjusts its gain to reverse the effects of the cable loss and restore the original signal. For proper operation, the launch amplitude of the signal going into the cable (the signal amplitude prior to the cable attenuation) must be set appropriately. If the signal is single-ended, its single-ended amplitude must be 800 mV_{P-P} ±10%. If the signal is differential, its differential amplitude must be 800 mV_{P-P} ±10% (400 mV_{P-P} single-ended).

INPUT INTERFACING

The DS30EA101 accepts either differential or single-ended input. The input must be AC coupled. Figure 3 and Figure 4 show the typical configurations for differential input and single-ended input, respectively. For single-ended input, the unused input must be properly terminated as shown.

OUTPUT INTERFACING

The DS30EA101 output signals (OUT+ and OUT-) are internally terminated 100Ω LVDS outputs. These outputs can be DC coupled to most common differential receivers.

LOS AND $\overline{\text{EN}}$

LOS indicates the loss of signal at the DS30EA101 input. LOS is high when no input signal is present and low when a valid input signal is detected.

$\overline{\text{EN}}$ can be used to manually disable or enable the OUT+ and OUT- output signals. Applying a high input to $\overline{\text{EN}}$ will disable the DS30EA101 outputs by forcing the output to a logic 1, and applying a low input to $\overline{\text{EN}}$ will force the outputs to be active. $\overline{\text{EN}}$ has an internal pulldown to enable the outputs by default.

LOS and $\overline{\text{EN}}$ may be tied together to automatically disable the DS30EA101 outputs when no input signal is present.

APPLICATION INFORMATION

CABLE EXTENDER APPLICATION

The DS30EA101 together with the DS30BA101 form a cable extender chipset optimized for extending serial data streams from serializer/deserializer (SerDes) pairs and FPGAs over 100Ω differential cables and 75Ω coaxial cables. Setting the correct DS30BA101 output amplitude and proper cable termination are essential for optimal operation. Figure 3 shows the recommended chipset configuration for 100Ω differential cable and Figure 4 shows the recommended chipset configuration for 75Ω coaxial cable.

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) Multiple Top-Side Markings will be inside parentheses. Only one Top-Side Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Top-Side Marking for that device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
