

ZXMS6006SG

# 60V N-CHANNEL SELF PROTECTED ENHANCEMENT MODE IntelliFET MOSFET

#### **Product Summary**

Continuous Drain Source Voltage 60V
 On-State Resistance 100mΩ
 Nominal Load Current (V<sub>IN</sub> = 5V) 2.8A
 Clamping Energy 480mJ

#### **Description and Applications**

The ZXMS6006SG is a self protected low side IntelliFET<sup>TM</sup> MOSFET with logic level input. It integrates over-temperature, over-current, over-voltage (active clamp) and ESD protected logic level functionality. The ZXMS6006SG is ideal as a general purpose switch driven from 3.3V or 5V microcontrollers in harsh environments where standard MOSFETs are not rugged enough.

- Lamp Driver
- Motor Driver
- Relay Driver
- Solenoid Driver

#### **Features and Benefits**

- Compact High Power Dissipation Package
- Low Input Current
- Logic Level Input (3.3V and 5V)
- Short Circuit Protection with Auto Restart
- Over Voltage Protection (Active Clamp)
- Thermal Shutdown with Auto Restart
- Over-Current Protection
- Input Protection (ESD)
- High Continuous Current Rating
- Lead-Free Finish; RoHS Compliant (Notes 1 & 2)
- Halogen and Antimony Free. "Green" Device (Note 3)
- An Automotive-Compliant Part is Available Under Separate Datasheet (ZXMS6006SGQ)

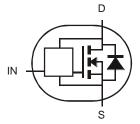

#### **Mechanical Data**

- Case: SOT223 (Type DN)
- Case Material: Molded Plastic, "Green" Molding Compound. UL Flammability Classification Rating 94V-0
- Moisture Sensitivity: Level 1 per J-STD-020
- Terminals: Matte Tin Finishe3
- Weight: 0.112 grams (Approximate)

#### Ordering Information (Note 4)

| Part Number  | Marking   | Reel Size (inches) | Tape Width (mm) | Quantity Per Reel |
|--------------|-----------|--------------------|-----------------|-------------------|
| ZXMS6006SGTA | ZXMS6006S | 7                  | 12              | 1.000 Units       |

Notes:

- 1. EU Directive 2002/95/EC (RoHS), 2011/65/EU (RoHS 2) & 2015/863/EU (RoHS 3) compliant. All applicable RoHS exemptions applied.
- 2. See https://www.diodes.com/quality/lead-free/ for more information about Diodes Incorporated's definitions of Halogen- and Antimony-free, "Green" and Lead-free.
- 3. Halogen- and Antimony-free "Green" products are defined as those which contain <900ppm bromine, <900ppm chlorine (<1500ppm total Br + Cl) and <1000ppm antimony compounds.
- 4. For packaging details, go to our website at https://www.diodes.com/design/support/packaging/diodes-packaging/.

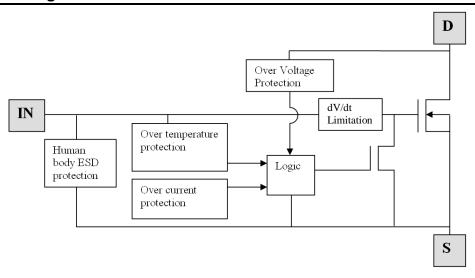

### Marking Information

ZXMS6006S = Product Type Marking Code YWW = Date Code Marking Y or  $\overline{Y}$  = Last Digit of Year (ex: 8 = 2018) WW or  $\overline{WW}$  = Week Code (01 to 53)

### **Functional Block Diagram**

## **Maximum Ratings** ( $@T_A = +25^{\circ}C$ , unless otherwise specified.)

| Characteristic  | Symbol              | Value                             | Unit |

### Thermal Characteristics (@TA = +25°C, unless otherwise specified.)

| Characteristic   | Symbol           | Value       | Unit       |
|--|------------------|-------------|------------|
| Power Dissipation at $T_A = +25^{\circ}C$ (Note 5)<br>Linear Derating Factor | P <sub>D</sub>   | 1.0<br>8.0  | W<br>mW/°C |
| Power Dissipation at T <sub>A</sub> = +25°C (Note 6) Linear Derating Factor  | P <sub>D</sub>   | 1.6<br>12.8 | W<br>mW/°C |
| Thermal Resistance, Junction to Ambient (Note 5)                             | R <sub>θJA</sub> | 125         | °C/W       |
| Thermal Resistance, Junction to Ambient (Note 6)                             | $R_{\theta JA}$  | 83          | °C/W       |
| Thermal Resistance, Junction to Case (Note 7)                                | $R_{\theta JC}$  | 39          | °C/W       |
| Operating Temperature Range  | TJ               | -40 to +150 | °C         |
| Storage Temperature Range  | T <sub>STG</sub> | -55 to +150 | °C         |

Notes:

- 5. For a device surface mounted on 15mm x 15mm single sided 1oz weight copper on 1.6mm FR-4 board, in still air conditions. Sink split drain 80% and source 20% to isolate connections.
- 6. For a device surface mounted on 50mm x 50mm single sided 2oz weight copper on 1.6mm FR-4 board, in still air conditions. Sink split drain 80% and source 20% to isolate connections.
- 7. Thermal resistance between junction and the mounting surfaces of drain and source pins.

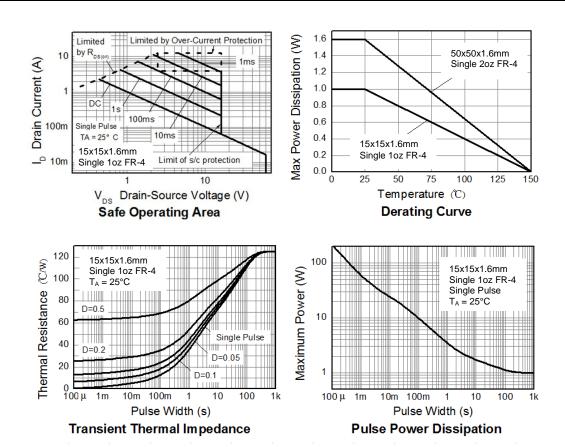

#### **Recommended Operating Conditions**

The ZXMS6006SG is optimized for use with  $\mu C$  operating from 3.3V and 5V supplies.

| Characteristic  | Symbol          | Min | Max  | Unit |
|---|-----------------|-----|------|------|
| Input Voltage Range   | V <sub>IN</sub> | 0   | 5.5  | V    |
| Ambient Temperature Range                                     | T <sub>A</sub>  | -40 | +125 | °C   |
| High Level Input Voltage for MOSFET to be on                  | V <sub>IH</sub> | 3   | 5.5  | V    |
| Low Level Input Voltage for MOSFET to be off                  | V <sub>IL</sub> | 0   | 0.7  | V    |
| Peripheral Supply Voltage (voltage to which load is referred) | V <sub>P</sub>  | 0   | 16   | V    |

#### **Thermal Characteristics**

Notes:

<sup>8.</sup> The drain current is restricted only when the device is in saturation (see graph 'Typical Output Characteristic'). This allows the device to be used in the fully on state without interference from the current limit. The device is fully protected at all drain currents, as the low power dissipation generated outside saturation makes current limit unnecessary.

<sup>9.</sup> Over-temperature protection is designed to prevent device destruction under fault conditions. Fault conditions are considered as "outside" normal operating range, so this part is not designed to withstand over-temperature for extended periods.

#### LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

- A. Life support devices or systems are devices or systems which:
  - 1. are intended to implant into the body, or
  - 2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.
- B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
