Nav-Pad™

ADA compliant, tactile keypad for audible system navigation

Storm Assistive Technology Products provide improved accessibility for those with impaired vision, restricted mobility or limited fine motor skills.

Kiosks, ATMs, ticketing machines and voting terminals usually present information about available products and services via a visual display or touch screen. Nav-Pad™ is a highly tactile interface that improves accessibility, making navigation and selection of screen based menus possible for those with impaired vision or restricted movement. Nav-Pad™ is available as a non-encoded switch matrix version or as an encoded USB compatible device.

Nav-Pad™ was developed in association with the Trace Research & Development Center with support from the University of Wisconsin. Nav-Pad™ is a compliant tactile interface device for use as part of an ADA audible menu navigation system or EZ-Access® implementation.

All dimensions in mm

- Available in standard 5 key, and 8 key configurations to suit most applications.
- Available as a non-encoded switch matrix terminated via a male, goldplated, square pin, 0.1" (2.54mm) pitch connector with locking ramp.
- Also available as an encoded USB compatible device, supplied with an attached 'hard-wired' 2.5m USB cable.
- Weather resistant.
- Keytop colours, shapes and tactile symbols make them readily identifiable by both sight and touch.

Environmental

Vibration & Shock:	ETSI 6M3
Impact Resistance:	IK09 (10J Rating)
Operational temperature:	-20°C to +70°C (dry)
Weather Resistance:	IP65 (when panel mounted)

Performance

Operational Key Life:	>4 million cycles per key
Certification:	CE / FCC / UL

Specification

Rating:	5V +_0.25V (USB 2.0)
Connection:	Mini USB B Socket
Panel Cutout	109.5mm x 95.5mm 5mm Radius Corners 1.2 – 2mm panel thickness (recommended)
Underpanel Seal	Included
