

## SST/SST-FR

Self-Sealing, Heat-Shrinkable Tubing

#### **Product Facts**

- Thick adhesive liner forms an effective barrier against fluids and moisture
- Thick-wall insulation, strain relief and abrasion protection
- No need for greases, tape, or epoxy
- Expansion ratios as high as 3:1
- Available in flame-retardant material
- SST has the following agency approvals:
  - ABS (American Bureau of Shipping)
    Lloyd's (Lloyd's Register of
  - Lloyd's (Lloyd's Register of Shipping)
- RoHS compliant

## Applications

SST provides a simple, positive splice-sealing method that offers protection under adverse environmental conditions. Tubing supplied with standard sealant provides water sealing and environmental protection in wet or underground applications. The thermoplastic adhesive not only seals, but also provides mechanical strain relief. The polymer tubing has excellent insulating, abrasion-resistance, and strain-relief properties.

### Installation

Minimum shrink temperature: 90°C [195°F] Minimum full recovery

temperature: 121°C [250°F]

#### **Operating Temperature Range**

-55°C to 110°C [-67°F to 230°F]

†In place of asterisk\* substitute length of tubing to be ordered. For example, SST\*-11, as the second column indicates, comes in 48-inch lengths, so a 48-inch cut piece of SST tubing would be SST 48-11.

11 Wall thickness will be less if tubing recovery is restricted during shrinkage.
\*\*30-inch length standard for /226 coating only.
