

Advanced Infrared Thermometers

Description:

The model N600 series are professional non-contact infrared thermometers for many applications. They can accurately make temperature measurements from short distances up to as much as many feet. They are easy to use and the fact that the N630 and N650 have adjustable emissivity settings means they can give very accurate measurements from most any heat source.

Features:

- Non-contact temperature measurements
- On/Off switchable laser sighting
- High 12:1 DS ratio
- Selectable Fahrenheit or Celsius display
- Temperature range for N625 & N630: -25 to 999 F° (-32 to 535 C°)
- Temperature range for N650: -58 to 1830 F° (-50 to 999 C°)
- Adjustable emissivity from 0.1 to 1.00 (N630 & N650)

Applications:

- HVAC Electrical troubleshooting
- Automotive repair & maintenance
- Science experiments
- Measure terminals on circuits
- Air conditioning testing and maintenance
- Perform HVAC energy audits
- Manufacturing processes of semiconductor technologies
- Food safety and processing
- Surface temperature measurements
