- High Coverage, Self-Wrapping Design
- Easy, Cost Effective Installation
- More Flexible than Split Convoluted or Spiral Wrap
- Ideal For Protecting Components Without Disconnecting Them
- Melt Temp. 482°F

Material
PET Polyethylene Terephthalate

Grade
F6W

Filament Diameter
.009″ Monofilament Polyester
1200 Denier Multifilament

Drawing Number
TF001F6W-WD

Woven, Split Tubular Harness Wrap

Colors Available:
Black (BK), White (WH), & Carbon (CB).

Woven Wrap has been engineered from the ground up to meet the demanding specifications of today's modern wiring harness industry.

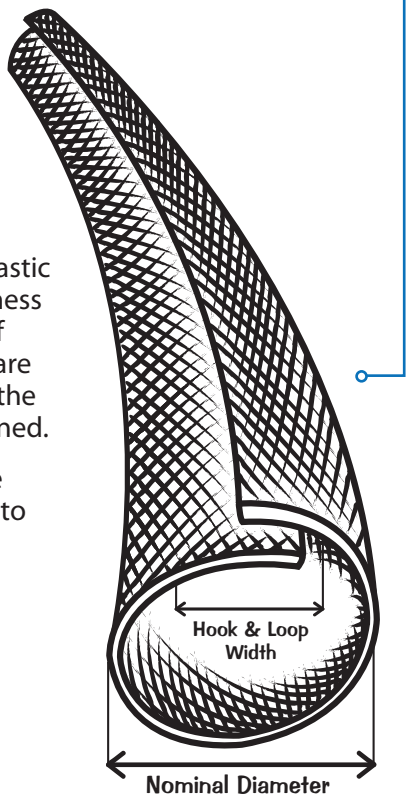
F6-WW utilizes many of the same characteristics as our original F6 split braided sleeving including the easy wrap around design and the extra overlap to insure complete protection of important electronic communication and power systems.

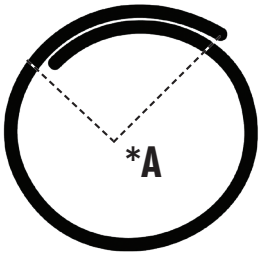
The new woven construction provides superior elastic flexibility with unbeatable coverage over any harness assembly. Through a unique process, the blend of monofilament and multifilament polyester fibers are formed into a sleeving with memory that causes the sleeve to self-close, and also snap back when opened.

Wire harness professionals will also appreciate the increased abrasion resistance F6-WW will provide to their cable assemblies.

Colors Available:

Black (BK), White (WH), & Carbon (CB).





The Right Overlap For Your Harness

The engineered overlap allows ideal flexibility without exposing wires and cables.
