

The drawing consists of two views of a mechanical component. The top view is a side profile showing a stepped profile with three distinct horizontal sections. The dimensions are labeled as follows: H is the total height, G is the height of the first section, and F is the height of the second section. A dimension line with arrows indicates the extent of these measurements. The bottom view is a cross-section of the component, showing a central bore with a diameter of $\varnothing 10$ mm. The cross-section reveals the internal structure, including a central shaft and a surrounding housing with a flange on the right side.
