

# Ultra Low Profile 0805 Balun 75Ω to 100Ω Balanced

DOOM (250C)

## **Description**

The BD0922J75100AHF is a broadband low profile sub-miniature balanced to unbalanced transformer designed for differential inputs and output locations on next generation wireless chipsets and any application requiring an impedance transformation in an easy to use surface mount package. The BD0922J75100AHF is ideal for high volume manufacturing and is higher performance than traditional ceramic and lumped element baluns. The BD0922J75100AHF has an unbalanced port impedance of  $75\Omega$  and  $100\Omega$  balanced port impedance. This transformation enables single ended signals to be applied to differential ports on modern semiconductors. The output ports have equal amplitude (-3dB) with 180 degree phase differential. The BD0922J75100AHF is available on tape and reel for pick and place high volume manufacturing.

-55

**Detailed Electrical Specifications:** Specifications subject to change without notice.

		ROOW (25°C)			
<u>Features:</u>	Parameter	Min.	Тур.	Max	Unit
<ul> <li>900 – 2200 MHz</li> <li>0.7mm Height Profile</li> <li>75 Ohm to 2 x 50 Ohm</li> <li>Broadband applicability</li> <li>Covers all commercial</li> </ul>	Frequency	900		2200	MHz
	Unbalanced Port Impedance		75		Ω
	Balanced Port Impedance		100		Ω
	Return Loss	9.1	11.9		dB
communications bands in one	Insertion Loss*		1.30	1.64	dB
<ul><li>part</li><li>Low Insertion Loss</li><li>Surface Mountable</li><li>Tape &amp; Reel</li></ul>	Amplitude Balance		0.55	0.80	dB
	Phase Balance		2.66	4.67	Degrees
	CMRR		28.7	24	dB
Non-conductive Surface	Power Handling			2	Watts
RoHS Compliant					

<sup>\*</sup> Insertion Loss stated at room temperature (Insertion Loss is approximately 0.1 dB higher at +85 °C)

## **Mounting Configuration:**

In order for Xinger surface mount components to work optimally, the proper impedance transmission lines must be used to connect to the RF ports. If this condition is not satisfied, insertion loss, Isolation and VSWR may not meet published specifications.

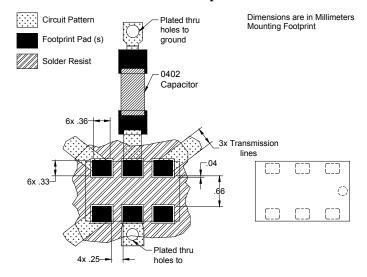

All of the Xinger components are constructed from organic PTFE based composites which possess excellent electrical and mechanical stability. Xinger components are compliant to a variety of ROHS and Green standards and ready for Pb-free soldering processes. Pads are Gold plated with a Nickel barrier.

An example of the PCB footprint used in the testing of these parts is shown below. In specific designs, the transmission line widths need to be adjusted to the unique dielectric coefficients and thicknesses as well as varying pick and place equipment tolerances.

#### No Bias Footprint

#### **DC Bias Footprint**

# **Packaging and Ordering Information**

Parts are available in reel and are packaged per EIA 481-2. Parts are oriented in tape and reel as shown below. Minimum order quantities are 4000 per reel. See Model Numbers below for further ordering information.
