

# Aluminum Capacitors Little-Lytic™ Electrolytics

| QUICK REFERENCE DATA                                      |                                                                                                                                                                                                                                                                    |
|-----------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| DESCRIPTION                                               | VALUE                                                                                                                                                                                                                                                              |
| Operating temperature                                     | -40 °C to +105 °C                                                                                                                                                                                                                                                  |
| Tolerance on C <sub>R</sub>                               | G = +75 %, -10 % and<br>F = +50 %, -10 %                                                                                                                                                                                                                           |
| Ripple current                                            | 10 mA to 600 mA max. at 120 Hz,<br>depending upon capacitance<br>and voltage.                                                                                                                                                                                      |
| Life validation test<br>2000 h at +85 °C                  | After test, capacitance value shall<br>not have changed by more than ± 20 %,<br>the equivalent series resistance in ohms<br>shall not have exceeded 150 % of initial<br>requirement and the leakage current<br>shall not have exceeded the<br>initial requirement. |
| DC leakage current                                        | Maximum DC leakage current at +25 °C<br>for all capacitors is 15 µA, except units<br>in case code DD, which is 15.8 µA.                                                                                                                                            |
| Shelf test<br>250 h at +85 °C,<br>with no voltage applied | The capacitance and equivalent series<br>resistance shall meet the initial<br>requirements and the DC leakage<br>current shall not exceed 300 % of the<br>initial requirement.                                                                                     |

## FEATURES

- Proven dependable performance in the industrial and electronic equipment with either transistor or modified electron-tube circuits
- All terminal connections welded, eliminating possibility of open or intermittent contacts occasionally found in pressure joints of conventional capacitors
- Superior in size, performance characteristics, shelf life, construction and reliability
- Metal-encased with clear plastic outer insulating sleeve
- Excellent circuit performance when used as coupling capacitors
- Minimum drain and long battery life when used in battery bypass applications
- Better performance under life test than most miniature aluminum electrolytic capacitors
- Axial lead
- Material categorization: for definitions of compliance please see [www.vishay.com/doc?99912](http://www.vishay.com/doc?99912)

## CAPACITANCE VS. TEMPERATURE

| DIMENSIONS in millimeters |           |            |
|---------------------------|-----------|------------|
| CASE CODE                 | D         | L          |
| BA                        | 6.3 ± 0.7 | 13.0 ± 1.4 |
| BB                        | 6.3 ± 0.7 | 17.5 ± 1.7 |
| CB                        | 8.0 ± 0.6 | 17.5 ± 1.7 |
| CC                        | 8.0 ± 0.6 | 20.5 ± 1.8 |
| DB                        | 9.0 ± 0.7 | 17.5 ± 1.7 |
| DC                        | 9.0 ± 0.7 | 20.5 ± 1.8 |
| DD                        | 9.0 ± 0.7 | 24.0 ± 1.5 |
| DF                        | 9.0 ± 0.7 | 32.0 ± 1.5 |
| DH                        | 9.0 ± 0.7 | 38.0 ± 1.8 |

## DIMENSIONS AND AVAILABLE FORMS

**ORDERING EXAMPLE**

Order by distribution part no. Example: TE1055

**Note**

- For lead (Pb)-free / RoHS compliant products add the suffix "-E3" to the shortened Distribution part. no.

Example: TE1055-E3

Statements about product lifetime are based on calculations and internal testing. They should only be interpreted as estimations. Also due to external factors, the lifetime in the field application may deviate from the calculated lifetime. In general, nothing stated herein shall be construed as a guarantee of durability.

## Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Vishay. Product names and markings noted herein may be trademarks of their respective owners.
