Drop-in Networking Starter Kit

Wireless PAN-to-IP Application & Development Kit

The Drop-in Networking Starter Kit is designed to demonstrate the functionality of Digi's Drop-in Networking solutions and how these versatile and easy-to-apply products can be used to implement innovative wireless device networking applications.

Features/Benefits

- Easy-to-use, cost reduced kit includes:
 - ConnectPort X8 gateway (1)
 - XBee RS-232 adapter (1)
 - XBee Sensor adapter (1)
 - XBee modules and interface boards (2)
 - Watchport/T temperature sensor (1)
- Allows quick configuration of a low-power mesh or multipoint network
- Wirelessly enable an existing serial device using the XBee RS-232 adapter
- ConnectPort X8 gateway provides WPAN-to-Ethernet connectivity
- Includes Python programming tools for custom software development

Overview

Digi's Drop-in Networking solutions are designed to provide end-to-end wireless connectivity to distributed electronic devices so those devices and the information they hold can be accessed and managed from anywhere. Drop-in Networking enables product and service differentiation by making devices smarter through wireless network connectivity and using this added intelligence to deliver faster, more accurate and more relevant information to end users.

The Drop-in Networking Starter Kit provides the hardware and software tools to add low-cost wireless communication functionality to new and existing products. Each kit contains the following items and can be configured in a matter of minutes:

ConnectPort™ X8 Gateway (1) - Wireless Personal Area Network (WPAN)-to-Ethernet model; collects data traffic from XBee devices, in this case the two included XBee adapters and the two XBee modules, and IP-enables that data traffic. The ConnectPort X8 is also available with cellular and Wi-Fi connectivity

XBee® RS-232 Adapter (1) - Provides wireless connectivity to any RS-232 serial device.

XBee® Sensor Adapter (1) - Wirelessly enables the Watchport/T temperature sensor.

Watchport®/T Temperature Sensor (1) - Provides remote temperature readings.

XBee® Modules and Interface Boards (2) - Provide embeddable wireless capability for integration into original product designs (e.g., sensors, meters, pumps, controllers).

Other - Also includes power supplies, cable adapters, user documentation, and Python code samples.

Performance RF Data Rate 250 Kbps 250 Kbps Indoor/Urban Range Up to 133 ft (40 m) Up to 100 ft (30 m) Outdoor/RF Line-of-Sight Range Up to 400 ft (20 m) Up to 300 ft (90 m) Transmit Power 1.25 mW (+1 dBm) / 2 mW (+3 dBm) boost mode 1 mW (0 dBm) Receiver Sensitivity (1% PER) -96 dBm in boost mode -92 dBm General Frequency Band 2.4 GHz Sleep Modes Low-power sleep modes enable power-down currents less than 10 uA Support Topologies Point-to-point, Point-to-multipoint, Mesh Point-to-point, Point-to-multipoint, Peer-to-peer Environmental Operating Temperature -40° C to +85° C (Industrial)

Operating Temperature -40° C to +85° C (Industrial)
Duradust Time
Product Type ConnectPort™ X8 Gateway
General
Configuration Options Interfaces – Physical: Serial, Ethernet, USB; Air: Low-power RF via XBee module, Cellular & Wi-Fi via PCIe module (not included)
Other Options GPS and Local Storage – Available separately via PCIe module
Programmability On-board Python engine; kit includes sample applications
Security IPsec and SSL VPNs on WAN connections with DES, 3DES or AES encryption, 128-bit AES on ZigBee network
Enclosed PCIe modules to reduce breakage/theft Extended operating temperature (-20° C to +60° C) Hardened metal enclosure with integrated mounting slots
Router/Security Features NAT, port forwarding, access control lists (IP filtering)
Management HTTP interface, password access control, IP service port control, optional network management via Digi Connectware Manager
Power Requirements
Power Input 9-30VDC (12 VDC power supply included)
Power Consumption 1.2 W (idle) / 3.4 W (max)
Product Type XBee® Adapters
General Control Contro
Wireless Same as module specifications above Same as module specifications above
Form Factor Small form factor for easy handling/installation
Interface Options Serial (RS-232, RS-485), USB, Sensor (Accepts Digi's Watchport Sensors), Digital I/O, Analog I/O
Powering Options External power supply or N-cell alkaline batteries; Lithium battery powered models available separately
Product Type Watchport®/T Temperature Sensor
General
Compatibility Plugs into included XBee Sensor adapter for wireless remote temperature monitoring
Maximum Reading Rate 20 per second
Temperature Accuracy: - +/- 3.6° F (+/- 2° C) at -40° F to +14° F (-40° C to -10° C) - +/- 0.9° F (+/- 0.5° C) at 14° F to 185° F (-10° C to +85° C)
Temperature Resolution 0.1° C
Power Consumption 15 (normal operation) / 1.0 mA (suspend mode)

Digi International, the leader in device networking for business, develops reliable products and technologies to connect and securely manage local or remote electronic devices over the network or via the web. With over 20 million ports shipped worldwide since 1985, Digi offers the highest levels of performance, flexibility and quality.
