Notes

(1) To specifically order a wirewound sub-assembly for resistance values that overlap between the wirewound and metal oxide technologies, the model will be a CPxxxx...85 for standard body and CPxxxx...91 for body with stand-offs. To specifically order a metal oxide sub-assembly for resistance values that overlap between the wirewound and metal oxide technologies, the model will be a CPxxxx...100 for a standard body and CPxxxx...101 for body with stand-offs. If no dash type is specified, either technology may be supplied

(2) **Metal oxide versions are not recommended for new designs**

Note

- Wirewound CP resistors can reliably function as a fuse and as a resistor. Such components involve compromise between fusing and resistive functions; therefore, each design should be tailored to the application to ensure optimum performance.
