

Is Now Part of

**ON Semiconductor®**

To learn more about ON Semiconductor, please visit our website at  
[www.onsemi.com](http://www.onsemi.com)

Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore (\_), the underscore (\_) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (\_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at [www.onsemi.com](http://www.onsemi.com). Please email any questions regarding the system integration to [Fairchild\\_questions@onsemi.com](mailto:Fairchild_questions@onsemi.com).

# Single-Channel: 6N138, 6N139 Dual-Channel: HCPL2730, HCPL2731 Low Input Current High Gain Split Darlington Optocouplers

## Features

- Low current – 0.5mA
- Superior CTR-2000%
- Superior CMR-10kV/μs
- CTR guaranteed 0–70°C
- U.L. recognized (File # E90700)
- VDE recognized (File # 120915) Ordering option V, e.g., 6N138V
- Dual Channel – HCPL2730, HCPL2731

## Applications

- Digital logic ground isolation
- Telephone ring detector
- EIA-RS-232C line receiver
- High common mode noise line receiver
- μP bus isolation
- Current loop receiver

## Description

The 6N138/9 and HCPL2730/HCPL2731 optocouplers consist of an AlGaAs LED optically coupled to a high gain split darlington photodetector.

The split darlington configuration separating the input photodiode and the first stage gain from the output transistor permits lower output saturation voltage and higher speed operation than possible with conventional darlington phototransistor optocoupler. In the dual channel devices, HCPL2730/HCPL2731, an integrated emitter-base resistor provides superior stability over temperature.

The combination of a very low input current of 0.5mA and a high current transfer ratio of 2000% makes this family particularly useful for input interface to MOS, CMOS, LSTTL and EIA RS232C, while output compatibility is ensured to CMOS as well as high fan-out TTL requirements. An internal noise shield provides exceptional common mode rejection of 10 kV/μs.

## Schematic

## Package Outlines

**Absolute Maximum Ratings** ( $T_A = 25^\circ\text{C}$  unless otherwise specified)

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

| Symbol          | Parameter   |                 | Value          | Units            |

| $R_{I-O}$ | Resistance (Input to Output) <sup>(4)</sup>            | $V_{I-O} = 500\text{VDC}$   |      | $10^{12}$ |      | $\Omega$         |
| $C_{I-O}$ | Capacitance (Input to Output) <sup>(4)(5)</sup>        | $f = 1\text{MHz}$   |      | 0.6       |      | pF               |
| $I_{I-I}$ | Input-Input Insulation Leakage Current <sup>(6)</sup>  | $\text{RH} \leq 45\%$ , $V_{I-I} = 500\text{VDC}$ , $t = 5\text{s}$ ,<br>HCPL2730/2731 only             |      | 0.005     |      | $\mu\text{A}$    |
| $R_{I-I}$ | Input-Input Resistance <sup>(6)</sup>                  | $V_{I-I} = 500\text{VDC}$ , HCPL2730/2731 only  |      | $10^{11}$ |      | $\Omega$         |
| $C_{I-I}$ | Input-Input Capacitance <sup>(6)</sup>                 | $f = 1\text{MHz}$ , HCPL2730/2731 only  |      | 0.03      |      | pF               |

\*All Typicals at  $T_A = 25^\circ\text{C}$ **Notes:**

- Current Transfer Ratio is defined as a ratio of output collector current,  $I_O$ , to the forward LED input current,  $I_F$ , times 100%.
- Pin 7 open. (6N138 and 6N139 only)
- Common mode transient immunity in logic HIGH level is the maximum tolerable (positive)  $dV_{cm}/dt$  on the leading edge of the common mode pulse signal  $V_{CM}$ , to assure that the output will remain in a logic HIGH state (i.e.,  $V_O > 2.0\text{V}$ ). Common mode transient immunity in logic LOW level is the maximum tolerable (negative)  $dV_{cm}/dt$  on the trailing edge of the common mode pulse signal,  $V_{CM}$ , to assure that the output will remain in a logic LOW state (i.e.,  $V_O < 0.8\text{V}$ ).
- Device is considered a two terminal device: Pins 1, 2, 3 and 4 are shorted together and Pins 5, 6, 7 and 8 are shorted together.
- For dual channel devices,  $C_{I-O}$  is measured by shorting pins 1 and 2 or pins 3 and 4 together and pins 5 through 8 shorted together.
- Measured between pins 1 and 2 shorted together, and pins 3 and 4 shorted together.

**Electrical Characteristics** (Continued)  $T_A = 25^\circ\text{C}$  unless otherwise specified)

Current Limiting Resistor Calculations

$$R_1 \text{ (Non-Invert)} = \frac{V_{DD1} - V_{DF} - V_{OL1}}{I_F}$$

$$R_1 \text{ (Invert)} = \frac{V_{DD1} - V_{OH1} - V_{DF}}{I_F}$$

$$R_2 = \frac{V_{DD2} - V_{OLX} (@ I_L - I_2)}{I_L}$$

**Where:**

$V_{DD1}$  = Input Supply Voltage

$V_{DD2}$  = Output Supply Voltage

$V_{DF}$  = Diode Forward Voltage

$V_{OL1}$  = Logic "0" Voltage of Driver

$V_{OH1}$  = Logic "1" Voltage of Driver

$I_F$  = Diode Forward Current

$V_{OLX}$  = Saturation Voltage of Output Transistor

$I_L$  = Load Current Through Resistor R2

$I_2$  = Input Current of Output Gate

| INPUT      |          | R1 (V) | OUTPUT    |            |        |        |        |        |        |

## Ordering Information

| Option    | Example Part Number | Description                                   |
|-----------|---------------------|---|
| No Suffix | 6N138               | Standard Through Hole Device, 50 pcs per tube |
| S         | 6N138S              | Surface Mount Lead Bend                       |
| SD        | 6N138SD             | Surface Mount; Tape and reel                  |
| W         | 6N138W              | 0.4" Lead Spacing                             |
| V         | 6N138V              | VDE0884                                       |
| WV        | 6N138WV             | VDE0884; 0.4" lead spacing                    |
| SV        | 6N138SV             | VDE0884; surface mount                        |
| SDV       | 6N138SDV            | VDE0884; surface mount; tape and reel         |

## Marking Information

| Definitions |  |
|-------------|--|
| 1           | Fairchild logo   |
| 2           | Device number  |
| 3           | VDE mark (Note: Only appears on parts ordered with VDE option – See order entry table) |
| 4           | Two digit year code, e.g., '07'  |
| 5           | Two digit work week ranging from '01' to '53'  |
| 6           | Assembly package code  |

### Tape Specifications

### Reflow Profile

- Peak reflow temperature: 225C (package surface temperature)
- Time of temperature higher than 183C for 60–150 seconds
- One time soldering reflow is recommended

- NOTES:  
 A) NO STANDARD APPLIES TO THIS PACKAGE  
 B) ALL DIMENSIONS ARE IN MILLIMETERS.  
 C) DIMENSIONS ARE EXCLUSIVE OF BURRS, MOLD FLASH, AND TIE BAR EXTRUSION  
 D) DRAWING FILENAME AND REVISION: MKT-N08GREV7
