Note :  $^{1}$  Collector Current is calculated from the following formula.

 $I_{C}(T_{c}) =$  Tjmax - T<sub>c</sub>

 $R_{th}(j-c) \times V_{CE}(sat)(Tj, I_C(Tc))$ 

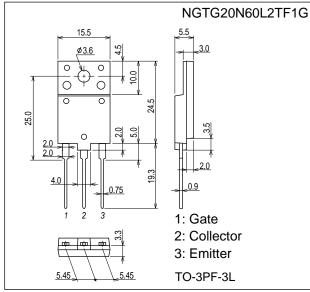

\*2 Our condition is radiation from backside.

The method is applying silicone grease to the backside of the device and attaching the device to water-cooled radiator made of aluminium.

Stresses exceeding Maximum Ratings may damage the device. Maximum Ratings are stress ratings only. Functional operation above the Recommended Operating Conditions is not implied. Extended exposure to stresses above the Recommended Operating Conditions may affect device reliability.
