

# **RP-4800**

Highly expanded, polyolefin heat-shrinkable tubing

RP-4800 is a radiation-crosslinked polyolefin material with a 4:1 expansion ratio. It was developed for a wide range of applications where a large expansion is required, such as harness repair. This high expansion simplifies installation and speeds repairs. The high expansion of RP-4800 tubing eliminates the need to remove connectors or large transitions and allows for easy harness assembly and repair. This heat-shrinkable, flexible, flameretardant tubing is also compatible with Raychem adhesives, providing a complete environmental seal.

RP-4800 tubing has excellent physical and mechanical properties that meet both military and industrial requirements. It is highly abrasionresistant and shows no significant degradation when exposed to common solvents and chemicals, including aviation fuel and hydraulic fluid.

RP-4800 tubing remains flexible at low temperatures and, for short periods, can withstand temperatures of up to 300°C without dripping or flowing.

### Temperature rating

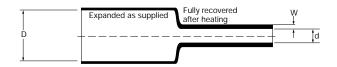

Full recovery temperature:	121°C
Continuous operating temperature:	–55°C to 135°C

\*\*Wall thickness will be less if recovery is restricted during shrinkag

#### Ordering information

Colors	Standard	Black
	Nonstandard	Brown, red, orange, yellow, green, blue, violet, gray, and white
Size selection	Always order the largest size that will shrink snugly over the component being covered.	
Standard packaging	On spools or in 4-foot lengths	
Ordering description	Specify product na	me, size, and color; for example, RP-4800-No.6-0 (0=Black).

### Specification values

	Property	Unit	Requirement	Method of test
Physical	Dimensions	mm <i>(inches)</i>	See reverse	ASTM D 2671
