

## Up to 0.8 A, up to 600 V sensitive standard SCR thyristor

### Features

- On-state rms current,  $I_{T(RMS)}$  0.8 A
- Repetitive peak off-state voltage up to 600 V
- Triggering gate current from 5 to 200  $\mu$ A
- ECOPACK2 compliant

### Applications

- Gate driver for large Thyristors
- Overvoltage crowbar protection
- Ground fault circuit interrupters
- Arc fault circuit interrupter
- Standby mode power supplies
- Residual current detector
- Smoke detectors
- DC 24/48 V proximity sensors
- Capacitive ignition circuit

### Description

Thanks to highly sensitive triggering levels, the P010XX SCR series is suitable for all applications where available gate current is limited, such as ground fault circuit interrupters, pilot circuits in solid state relays, stand-by mode power supplies, smoke and alarm detectors.

Available in through-hole or surface mount packages, the voltage capability of this series has been upgraded since its introduction and is now available up to 600 V.

## 2 Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK packages, depending on their level of environmental compliance. ECOPACK specifications, grade definitions and product status are available at: [www.st.com](http://www.st.com). ECOPACK is an ST trademark.
