Cree[®] Screen Master[®] 5-mm Oval LED C566C-RFF/AFF C566C-RFE/AFE

PRODUCT DESCRIPTION

The oval LED is specifically designed for variable-message signs and passenger-information signs.The ovalshaped radiation pattern and high luminous intensity ensure that these devices are excellent for wide-fieldof -view outdoor applications where a wide viewing angle and readability in sunlight are essential.

These lamps are tinted and diffused. The encapsulation resin contains anti-UV material in order to reduce the effects of long-term exposure to direct sunlight.

FEATURES

- Size (mm): 5
- Color and Typical Dominant Wavelength: Red (621nm) Amber(591nm)
- Luminous Intensity (mcd) C566C-RFF/RFE:(1520-4180) C566C-AFF/AFE:(1520-4180)
- Viewing angle: 70 X 35 degree
- Lead Free
- RoHS Compliant

APPLICATIONS

- Electronic Signs & Signals (ESS)
- Full Color video screen
- Motorway Signs
- Variable Message Sign (VMS)
- Advertising signs
- Petrol Signs

ABSOLUTE MAXIMUM RATINGS ($T_A = 25^{\circ}C$)

Items	Symbol	Absolute Maximum Rating	Unit	
		Red and Amber		
Forward Current	I _F	50 Note1	mA	
Peak Forward Current Note2	I _{FP}	200	mA	
Reverse Voltage	V _R	5	V	
Power Dissipation	P _D	130	mW	
Operation Temperature	T _{opr}	-40 ~ +95	°C	
Storage Temperature	T _{stg}	-40 ~ +100	°C	
Lead Soldering Temperature	T _{sol}	Max. 260°C for 3 sec. max. (3 mm from the base of the epoxy bulb)		
Electrostatic Discharge Classification (MIL-STD-883E)	ESD	Class 2		

Note:

1. For long term performance the drive currents between 10mA and 30mA are recommended. Please contact CREE sales representative for more information on recommended drive conditions.

2. Pulse width ≤ 0.1 msec, duty $\leq 1/10$.

TYPICAL ELECTRICAL & OPTICAL CHARACTERISTICS (T_A = 25^{\circ}C)

Characteristics	Color	Symbol	Condition	Unit	Minimum	Typical	Maximum
Forward Voltage	Red/Amber	V _F	$I_{F} = 20 \text{ mA}$	V		2.1	2.6
Reverse Current	Red/Amber	I _R	$V_{R} = 5 V$	μA			100
Dominant Wayalangth	Red	λ_{D}	$I_{F} = 20 \text{ mA}$	nm	619	621	624
Dominant Wavelength	Amber	λ_{D}	$I_{F} = 20 \text{ mA}$	nm	584	591	596
Luminous Intensity	Red	I_v	$I_{F} = 20 \text{ mA}$	mcd	1520	2200	
Luminous intensity	Amber	I_v	$I_F = 20 \text{ mA}$	mcd	1520	2200	

Note: Continuous reverse voltage can cause LED damage.

INTENSITY BIN LIMIT (I_F = 20 mA)

Reu

Bin Code	Min.(mcd)	Max.(mcd)
U0	1520	2130
V0	2130	3000
W0	3000	4180

Amber							
Bin Code	Min.(mcd)	Max.(mcd)					
U0	1520	2130					
V0	2130	3000					
W0	3000	4180					

 \bullet Tolerance of measurement of luminous intensity is $\pm 15\%$

COLOR BIN LIMIT ($I_F = 20 \text{ mA}$)

Red		
Bin Code	Min.(nm)	Max.(nm)
RB	619	624

Amber							
Bin Code	Min. (nm)	Max. (nm)					
A2	584	587					
A3	587	590					
A4	590	593					
A5	593	596					

• Tolerance of measurement of dominant wavelength is $\pm 1 \text{ nm}$

Notes:

- 1. The above kit numbers represent order codes that include multiple intensity-bin and color-bin codes. Only one intensity-bin code and one color-bin code will be shipped on each reel. Single intensity-bin, single color-bin codes will not be orderable.
- 2. Please refer to the "Cree LED Lamp Reliability Test Standards" document ^{#1} for reliability test conditions.
- 3. Please refer to the "Cree LED Lamp Soldering & Handling" document #2 for information about how to use this LED product safely.

GRAPHS

The above data are collected from statistical figures that do not necessarily correspond to the actual parameters of each single LED. Hence, these data will be changed without further notice.

90

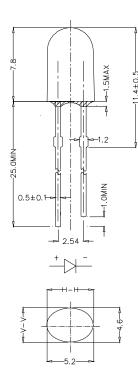

MECHANICAL DIMENSIONS

All dimensions are in mm. Tolerance is ± 0.25 mm unless otherwise noted.

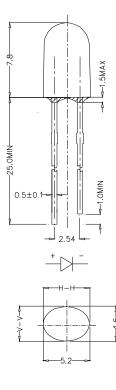

An epoxy meniscus may extend about 1.5 mm down the leads.

Burr around bottom of epoxy may be 0.5 mm max.

C566C-RFF/AFF:

NOTES

Lead Frame Materials

Ag-plated and Lead-free Solder-plated iron.

RoHS Compliance

The levels of RoHS-restricted materials in this product are below the maximum concentration values (also referred to as the threshold limits) permitted for such substances, or are used in an exempted application in accordance with EU Directive 2011/65/EC (RoHS2), as implemented by EU member states on January 2, 2013 and amended on March 31, 2015 by EU Directive 2015/863/EU.

RoHS Declarations for this product can be obtained from your Cree representative or from the Product Ecology section of the Cree website.

Vision Advisory Claim

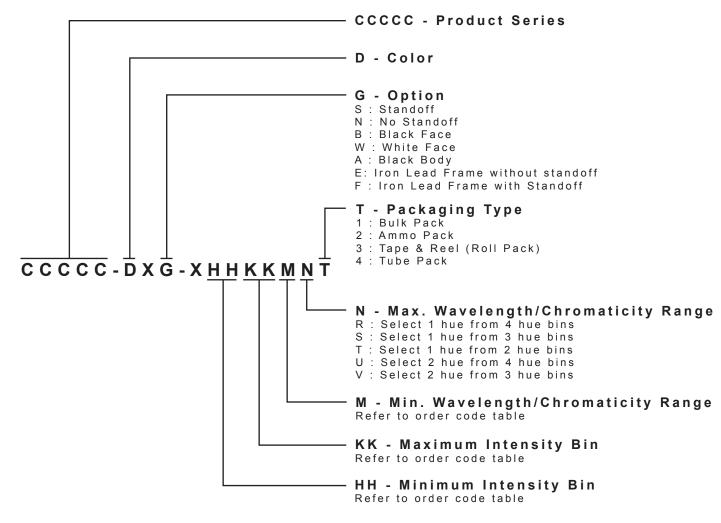

Users should be cautioned not to stare at the light of this LED product. The bright light can damage the eye.

KIT NUMBER SYSTEM

All dimensions in mm.Cree LED lamps are tested and sorted into performance bins. A bin is specified by ranges of color, forward voltage, and brightness. Sorted LEDs are packaged for shipping in various convenient options. Please refer to the "Cree LED Lamp Packaging Standard" document for more information about shipping and packaging options.

Cree LEDs are sold by order codes in combinations of bins called kits. Order codes are configured in the following manner:

* Please contact our sales representative for ordering information.

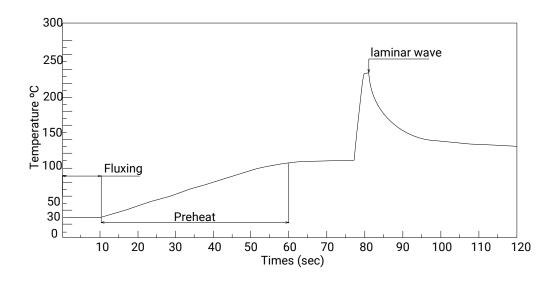

REFLOW SOLDERING

The LED soldering specification is shown below(suitable for both leaded solder & lead-free solder):

Manual Soldering		Solder Dipping		
Soldering iron	35 W max	Preheat	110 °C max	
Tomporatura	300 °C max	Preheat time	60 seconds max	
Temperature 300 °C max	Sou of max	Solder-bath temperature	260 °C Max	
Soldering time	3 seconds max	Dipping time	5 seconds max	
Position	Not less than 3 mm from the base of the package.	Position	Not less than 3 mm from the base of the package.	

• Manual soldering onto the PCB is not recommended because soldering time is uncontrollable.

• The recommended wave soldering is as below:

- Do not apply any stress to the LED package, particularly when heated.
- Only bottom preheat is suggested & should not preheat on top in order to reduce thermal stress experienced by the LEDs.
- The LEDs must not be re used once they have been extracted from PCB.
- After soldering the LEDs, the package should be protected from mechanical shock or vibration until the LEDs have reached 40 °C or below.
- Precautions must be taken as mechanical stress on the LEDs may be caused by PCB warpage or from the clinching and cutting of the LED leads.
- When it is necessary to clam the LEDs during soldering, it is important to ensure no mechanical stress is exerted on the LEDs.
- Cut the LED lead at normal room temperature. Lead cutting at high temperature may cause failure of the LEDs.

Refer to "http://www.cree.com/led-components/media/documents/sh-HB.pdf" for soldering & handling details.

PACKAGING

Features:

- The LEDs are packed in cardboard boxes after packaging in normal or anti-electrostatic bags.
- Cardboard boxes will be used to protect the LEDs from mechanical shock during transportation.
- The boxes are not water resistant, and they must be kept away from water and moisture.
- The Bulk Pack types of packaging.
- Max 500 pcs per bulk and Max 2500 pcs per ammo.

Bulk Pack Packaging Type:

Ammo Pack Packaging Type:
