

PowerMod HP connectors, developed by Anderson Power Products, are the innovative New Generation of High Power Interconnections for the Electronics Industry.

The touch-safe, positive latching, PowerMod HP female connector design presents a new standard for high power connector safety. The ergonomic latch release is simple to operate and is colored blue for clear identification. Housings are a black UL94V-O flame retardant material.

PowerMod HP contacts are durable and rated for circuit interruption (true hot-pluggable). Size A contacts are available in #6 to #2 American wire gauge and 16mm² to 35mm² metric wire sizes for global design freedom. Our optional strain relief ensures superior contact reliability under adverse operating conditions.

APP PowerMod HP connectors embody the highest quality in the industry and meet all applicable industry standards.

Features

- **Positive latching**

Integral latches with ergonomic release provide over 50 lbs retention

- **Strain relief option**

Reduces risk of wire insulation creep and reduces transmission of wire loads to contacts improving service life

- **Low connector mating forces**

Connectors can be mated and unmated with one hand without the use mechanical aids

- **Silver plated, high conductivity contacts**

Offers greater longevity for high power, elevated temperature applications

- **Ease of assembly**

Intuitive design allows for simplicity of assembly
