# OMRON MOS FET Relays

## G3VM-101HR

### Low 100-m $\Omega$ ON Resistance. Higher power, 1.4-A switching with a 100-V load voltage, SOP package.

- Continuous load current of 1.4 A (connection C = 2.8 A).
- Dielectric strength of 1,500 Vrms between I/O.

#### **RoHS compliant**

A Refer to "Common Precautions".

### ■ Application Examples

- Broadband systems
- Measurement devices
- Data loggers
- Industrial equipment

### ■ List of Models

Note: The actual product is marked differently from the image shown here.

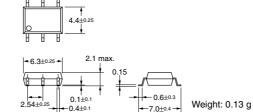

| Contact form | Terminals        | Load voltage (peak value)<br>(See note.) | Model          | Number per stick | Number per tape |
|--------------|------------------|--|----------------|------------------|-----------------|
| SPST-NO      | Surface-mounting | 100 V                                    | G3VM-101HR     | 75               |                 |
|              | terminals        |  | G3VM-101HR(TR) |                  | 2,500           |

Note: The AC peak and DC value is given for the load voltage.

#### Dimensions

Note: All units are in millimeters unless otherwise indicated.

### Recommended Operating Conditions

Use the G3VM under the following conditions so that the Relay will operate properly.

| Item                                 | Symbol          | Minimum | Typical | Maximum | Unit |
|--------------------------------------|-----------------|---------|---------|---------|------|
| Load voltage (AC peak/DC)            | V <sub>DD</sub> |         |         | 100     | V    |
| Operating LED forward current        | I <sub>F</sub>  | 5       | 7.5     | 20      | mA   |
| Continuous load current (AC peak/DC) | Io              |         |         | 1.1     | A    |
| Operating temperature                | T <sub>a</sub>  | -20     |         | 65      | °C   |
