

SBP

Self Laminating Wire and Cable Markers

Technical Datasheet

TTDS-211 Revision 13 - March 2020

SBP is a clear vinyl film with a white thermal transfer printable area. On application, the clear film over-laminates and protects the printed area.

SBP is supplied with a permanent acrylic based adhesive and on a white liner with reference holes for printer sensor detection. The "self laminating" feature protects the printed area from exposure to fluids, moisture and mechanical abrasion.

SBP is UL recognised to PGIS2 for indoor and outdoor use as wrap or flag (tag) in accordance with ANSI/UL 817, Cord Sets and Power-Supply Cords and UL 2238 Certification Requirement Decision (CRD) of the "Standard for Cable Assemblies and Fitting for Industrial Control and Distribution". For conditions of use see UL file MH61871.

The SBP label solution comprises of a complete identification system with printers, software, ribbons and wide range of standard sizes. The label can be used in "WRAP self-laminating" mode and "FLAG self-laminating" mode down to a diameter of 2.0mm (0.08 inch).

SBP print performance and durability can only be guaranteed when:

- Printed using TE Connectivity printers and ribbons as defined in TE document 411-121005
- Applied on wire & cable using repeatable self-laminated labelling guide 411-121050

Features

- Thermal Transfer Printable
- Over lamination protects the printed area and enables a higher level of print durability
- Range of sizes and colors available (see page 4)
- Variety of label layouts and roll core diameters,
- Useable down to 2.0mm diameter, even on Fluoropolymer wire jackets.

Temperature Rating

- Operating Temperature Range
-40 to 110°C (-40°F to 230°F)
- Minimum Application Temperature 10°C (50°F)

Specifications / Approvals

Industry

UL recognized PGIS2 - file MH61871 - "SBP"

Applications

- Ideal for wire and cable identification in general.
- Excellent conformability to round, irregular or flexible surfaces including flat ribbon cables.
- Small diameter cables and wire (2.0mm / 0.08 inch or greater) in wrap mode or flag mode.
- Industrial, Automotive, Rail, Aerospace and Defense, Electrical

Design for Environment

- Does not contain any declarable or prohibited substances from the UNIFE Railway Industry Substances List
- Further information and a downloadable declaration covering RoHS and REACH compliance can be found at the TE Product Compliance Support Centre:

<http://www.te.com/usa-en/utilities/product-compliance.html>

Shelf Life

2 years when following good commercial storage practice detailed below.

Storage

Product should be stored in the original packaging, with any plastic covers which were included during shipping. Store out of direct sunlight in a clean, dry, dust free, environment.

Product should be stored at approximately 22°C and 50% relative humidity.

Typical Label Thickness

- Label (including adhesive): 0.0105 mm / 0.0041 inch
- Liner: 0.080 mm / 0.0031 inch

Technical Performance

	Requirement	Results			
Print Permanence					
Marking of Electrical Insulating Materials, SAE AS 5942	Legible after 50 rubs 1kg weight with an eraser	Pass			
Resistance to Solvents, MIL STD 202 Method 215	Legible after 30 wipes	Pass			
Fluid Exposure		Adhesive	Printed legend		
• Isopropyl alcohol	Labels to remain on wire and legible / SAE AS 5942 (TE doc 109-121012)	Pass*	Pass		
• IRM 902		Pass	Pass		
• MIL PRF 23699		Pass	Pass		
• MIL-H-83282	Wrap and flagged installed samples, 24 hours immersion 23°C followed by 20 rubs	Pass	Pass		
• Diesel Fuel		Pass	Pass		
• Kilfrost DF plus		Pass	Pass		
• Tap water		Pass	Pass		
• 5% Salt solution		Pass	Pass		
• Detergent (1% solution)		Pass	Pass		
• Brake fluid		Pass	Pass		
• Jet A fuel		Pass	Pass		
*Some loosening of flag possible					
Adhesion to FTM1 (180°)	Typical Peel force (N/25mm (oz/in.))				
Test surface:	FTM1 (180°)	20min Dwell	72hr Dwell		
• Stainless steel		20 (73)	22 (82)		
• Glass		17 (62)	21 (75)		
• Aluminium		9 (32)	18 (64)		
• Polypropylene		9 (32)	9 (32)		
• Tufnol		15 (53)	20 (73)		
• To SBP Label Surface (wrap)		17 (64)	23 (83)		
• Adhesive to Adhesive (flag)		20 (73)	20 (73)		
Flammability					
Average burn time, ASTM D1000	Burn time less than 10 seconds.	Pass, typical burn time 7second			
Burn rate FMVSS 302	Maximum burn rate 102mm/min.	Pass, typical burn rate 35mm/min			
Weatherability					
Artificial weathering to ASTM G154	Labels to remain on wire and legible after 3000hr, UV-A and UV-B	Pass, samples remain legible and do not unwrap or unravel*			
* Note orange and red may fade under UV, print remains legible.					
Thermal performance					
Heat Aging	Labels to remain on wire and legible after 168hr at 90±2°C	Pass, samples remain legible and do not unwrap or unravel			
Thermal Cycling	Labels to remain in on wire and legible after 10 cycles of 1hr @ -50°C then 1hr @ 90°C	Pass, samples remain legible and do not unwrap or unravel			

Where possible, TE have tested product as a finished item, including the print. Operational tests are followed by an assessment of mark adherence to validate fit form and function.
