## REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

#### SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using these products.

⚠ REMINDERS
Do not use or store in locations where there are conditions such as gas corrosion (salt, acid, alkali, etc.).
Before soldering, be sure to preheat components.  The preheating temperature should be set so that the temperature difference between the solder temperature and product temperature does not exceed 150°C.
Soldering corrections after mounting should be within the range of the conditions determined in the specifications.  If overheated, a short circuit, performance deterioration, or lifespan shortening may occur.
Self heating (temperature increase) occurs when the power is turned ON, so the tolerance should be sufficient for the set thermal design.
Do not use for a purpose outside of the contents regulated in the delivery specifications.
