The TDR 2WI series is a family of compact 2 W DC/DC-converters with 4:1 input voltage ranges and tightly regulated output voltages even under no load conditions. The product is available in THD-package. They work with high efficiency over the full load range and come with a remote On/Off input. The usability in temperature ranges of up to 85°C without power derating, continuous short circuit protection and excellent immunity against environmental influences make these converters very reliable. A TDR 2WI converter is the ideal solution for space critical high end applications in communication equipment, instrumentation and industrial electronics.
