I²PAK (TO-262)

N-Channel MOSFET

FEATURES

- Surface mount
- Available in tape and reel
- Dynamic dV/dt rating
- · Repetitive avalanche rated
- Fast switching
- Ease of paralleling
- Simple drive requirements
- · Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

Note * This

This datasheet provides information about parts that are RoHS-compliant and / or parts that are non-RoHS-compliant. For example, parts with lead (Pb) terminations are not RoHS-compliant. Please see the information / tables in this datasheet for details.

DESCRIPTION

Third generation power MOSFETs from Vishay provide the designer with the best combination of fast switching, ruggedized device design, low on-resistance and cost-effectiveness.

The D²PAK (TO-263) is a surface mount power package capable of accommodating die size up to HEX-4. It provides the highest power capability and the lowest possible on-resistance in any existing surface mount package. The D²PAK (TO-263) is suitable for high current applications because of its low internal connection resistance and can dissipate up to 2.0 W in a typical surface mount application.
