

# Gain Equalizers

## Series Description

DLI's Gain Equalizers are designed as a small, low cost solution to your gain slope challenges. These equalizer designs employ a monolithic construction with precision thin-film conductor and resistor films with proprietary high dielectric constant ceramics for superior RF performance and repeatability. Components are well suited for use with pick and place equipment.

Available in tape and reel packaging for high volume applications.

## Applications

- Broadband Microwave Modules; EW, ECM, ECCM
- Equalizer is utilized as a compensation circuit to correct for a loss slope created by other elements within a circuit such as in amplifier stages

## Benefits

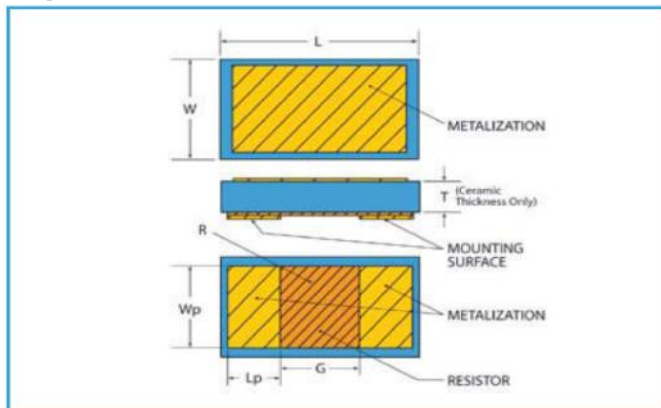

- Low Excess Insertion Loss
- Footprint interchangeable; gain slopes from 1 to 3.5 dB
- Conductive Epoxy and solder SMT mountable
- Characteristic Impedance: 50Ω
- Operating & Storage Temp: -55°C to +125°C
- Moisture Sensitivity Level: MSL1
- No Ground Connection Required
- Superior, repeatable microwave performance

## Die Attach Recommendations

- 1) Equalizer width should be approximately as wide as 50  $\Omega$  line trace on PCB.
- 2) The gap in the microstrip line should be nominally equal to dimension G.
- 3) Vacuum pick-up tool recommended for component handling. If pressure is to be applied during component placement, it should be done uniformly across the part.
- 4) Thin, unmounted circuit boards are prone to warp-age during reflow. This can cause solder attach defects and cracking of components during handling or subsequent housing installation.

## Custom Solutions

We realize that our standard offerings won't meet all customer requirements. DLI offers custom solutions with quick turn time.

Custom designs will be tailored to meet your system requirements by utilizing a design with one of our high K materials.

Temperature performance requirement? We can design on one of DLI's temperature stable materials.

Please contact Applications Engineering for more information.

## Design Kits

Two design kits are available for quick fix or circuit tuning needs. Each kit has 5 pieces of variant equalizer.

Standard Series includes: AEQ2050, AEQ2199, AEQ2234, AEQ3042 and AEQ3055.

EW Series includes: AEQ05467, AEQ05468, AEQ05469, AEQ05470, AEQ05471 and AEQ05472.
