

# AMP Soft Shell Pin and Socket Connectors

**Restriction on the use of  
Hazardous Substances  
(RoHS)**

At Tyco Electronics, we're ready to support your RoHS requirements. We've assessed more than 1.5 million end items/components for RoHS compliance, and issued new part numbers where any change was required to eliminate the restricted materials.

Part numbers in this catalog are RoHS Compliant, unless marked otherwise. These products comply with European Union Directive 2002/95/EC, as amended 1 January 2006, that restricts the use of lead, mercury, cadmium, hexavalent chromium, PBB, and PBDE in certain electrical and electronic products sold into the EU as of 1 July 2006.

Note: For purposes of this Catalog, included within the definition of RoHS Compliant are products that are clearly "Out of Scope" of the RoHS Directive such as hand tools and other non-electrical accessories. Information regarding RoHS compliance is provided based on reasonable inquiry of our suppliers and represents our current actual knowledge based on the information provided by our suppliers. This information is subject to change. For latest compliance status, refer to our website referenced at right.

**Getting the Information  
You Need**

Our comprehensive on-line RoHS Customer Support Center provides a forum to answer your questions and support your RoHS needs. A RoHS FAQ (Frequently Asked Questions) is available with links to more detailed information. You can also submit RoHS questions and receive a response within 24 hours during a normal work week. The Support Center also provides:

- Cross-Reference from Non-compliant to Compliant Products
- Ability to browse RoHS Compliant Products in our on-line catalog
- Downloadable Technical Data
- Customer Information Presentation
- More detailed information regarding the definitions used above

So whatever your questions when it comes to RoHS, we have the answers at [www.tycoelectronics.com/leadfree](http://www.tycoelectronics.com/leadfree)

**Introduction**

AMP Soft Shell Pin and Socket Connectors provide a highly reliable and economic means of grouping multiple-lead connections in today's computer, computer/peripheral equipment, business machines, entertainment centers, appliances and other sophisticated commercial equipment. The electrical connector is an integral component in these applications. They also offer worldwide application approval because of their reliability and economy. Electrical functions have increased in complexity and new designs continually call for the maximum use of space. The Soft Shell Pin and Socket family of connectors offers the design and features to answer these modern industry requirements.

This catalog is organized by contact centerline spacing (High Density and Standard Density) to provide you with the basic information necessary to select the Soft Shell connector system best suited for your specific application. It contains general information to acquaint you with the complete family of connectors and application tooling.

Since your specific application will determine the degree of automatic, semiautomatic or manual application tooling required, complete specifications are covered on pages 207-204.

**Summary Chart**

| Page No.                | Product Name                       | No. of Positions       | Centerline (in) mm  | Wire Size (AWG) | Wire Insulation Dia. Max. (in) mm | Current Rating Max (A)* | Voltage Rating Max.   | Operating Temp. Range (C) | UL94 Flammability Rating | Sealed Version Available | Approvals   |
|-------------------------|------------------------------------|------------------------|---|-----------------|-----------------------------------|-------------------------|---|---------------------------|--------------------------|--------------------------|---|
| <b>High Density</b>     |                                    |                        |   |                 |                                   |                         |   |                           |                          |                          |   |
| 9                       | 2.5 mm Signal Double Lock (SDL)    | 2-13                   | (.098) 2.50   | 26-20           | (.071) 1.80                       | 3                       | 50 VAC or VDC   | -30° to +105°             | V-0                      | No                       | UL, CSA, VDE  |

## 2.5 mm Signal Double Lock (2.5 SDL) Connectors (Wire-to-Board and Wire-to-Wire)

### Product Facts

- Connector for signal circuits with one row of contacts on 2.5 mm centerline
- Wire-to-board and wire-to-wire connectors, consisting of plug and cap housings for wire termination and PC board-mount post headers
- Mounted to plug and cap housings for wire application, double lock plate provides for positive loading of contacts in the housing. It also helps contacts mate completely
- Double lock plate is contained within the plug and cap housing completely, which provides neat overall appearance
- Accepts 26-20 AWG wire (e.g. UL 1007, 1061, 1571, etc.) with insulation diameters of up to 1.8 mm
- PC board-mount post header is available in two styles: standard profile and high profile
- High-profile post header has locking feature at location fit to resin coating, which is applied onto the board for waterproof protection as in home appliances. It does not hamper mating and locking of post header with plug housing
- Locking structure is inner-lock type and has a clean surface
- Solder tail section of post header is provided with kinks to retain the header firmly on PC board during soldering
- Radial tape-mounted version of post header is also available that is applicable to radial mounting machines
- Recognized under the Component Program  of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association,  File No. LR7189
- VDE Approved, File No.  B 04 11 39175013

2.5 mm Signal Double Lock Connectors (2.5 SDL) are 2.5 mm centerline, compact, one-row connectors for signal circuits.

With contacts on 2.5 mm centerline, both wire-to-wire and wire-to-board connectors are available.

The connectors consist of plug and cap housings for wire termination, double lock plates for plug and cap housings, crimp snap-in contacts, and a PC board-mount post header. A double lock plate is available for both plug and wire-to-wire cap housing to provide for positive loading. It helps prevent contacts from coming off or mating halfway. The plate is contained within the plug and cap housing completely. The plug and cap housing can be used without a double lock plate.

The connector accepts 26-20 AWG wire (e.g. UL 1007, 1061, 1571, etc.) with insu-

lation diameters of up to 1.8 mm.

The PC board-mount post header is available in two styles: standard profile and high profile.

The high-profile type connectors can be used for home appliances, which require waterproof protection. It does not hamper mating and locking of the post header with the plug housing, even if the board has resin coating on it.

The locking structure is inner-lock type and has a clean surface.

The solder tail of the loose-piece post header has kinks to secure the connector on the PC board until it is soldered.

Radial tape-mounted version of post header is also available and this is applicable to radial mounting machines.

### Performance Characteristics

**Voltage Rating**—50 VAC/DC

**Current Rating**—3 A

**Overall Resistance**—  
10 mΩ max. (initial)  
20 mΩ max. (final)

**Insulation Resistance**—  
500 Ω (500 VDC)

**Dielectric Withstanding Voltage**—  
1,100 VAC, one minute

**Contact Resistance**—20 mΩ max.

**Operating Temperature**—  
-30° ~ +105°C  
(The upper limit includes temperature rise from power carrying)

**Applicable Wire**—26-20 AWG (UL 1007, 1061, 1571)

**Wire Insulation Range**—  
0.93~ 1.8 mm

**PC Board Thickness**—1.6 mm

## Micro MATE-N-LOK 3 mm Connector System

### Product Facts

- Wire-to-wire and wire-to-board pin and receptacle connector system
- Contacts are on 3 mm [.118] centerline spacing
- 2-12 contact positions – single row
- 2-24 contact positions – dual row
- Panel mount or free-hanging wire-to-wire configurations
- Dual beam contact design for reliable interconnection
- Contacts accept 24-20 [0.2-0.6] and 30-26 [0.05-0.15] AWG wire with insulation diameter of .060 [1.52] maximum
- Contacts available in strip form or loose piece
- Pcb mount pin header assemblies in both vertical and right-angle styles
- Surface mount or through-hole pcb pin header attachment
- Pcb headers are IR reflow process compatible
- Recognized under the Component Program of Underwriters Laboratories Inc.  to US and Canadian Standards, File No. E28476
- Passed Tests for VDE under Registration Number 40005280/Continuous Surveillance 

The Micro MATE-N-LOK 3 mm Connector System is a wire-to-wire and wire-to-board connector system with contacts on a 3 mm [.118] centerline. Both single-row and dual-row configurations are available. Crimp, snap-in pin and receptacle contacts are used to terminate 24-20 [0.2-0.6] and 30-26 [0.05-0.15] AWG wire. Plug and receptacle housings allow wire-to-wire and wire-to-panel configurations.

Header assemblies for wire-to-board interconnections include vertical and right-angle components. These IR reflow process compatible headers are available in through-hole and surface mount configurations.

Typical uses of the Micro MATE-N-LOK 3 mm Connector System include the appliance, instrumentation, industrial machinery, home equipment, and security system industries.

### Technical Documents

#### Application Specification

114-13000 Micro MATE-N-LOK Connectors

#### Product Specification

108-1836 3 mm Micro MATE-N-LOK Connector

### Performance Characteristics

**Voltage Rating**—250 vac

**Current Rating**—5 amp max. on 20 AWG wire

**Contact Resistance**—20 milliohms max. final

**Dielectric Withstanding Voltage**—1500 VAC

**Insulation Resistance**—1000 megohms min.

**Operating Temperature**—-40°C to +105°C

**Mating Force**—1.5lb [6.67N] max per contact

**Current Rating Verification for 30°C Maximum Temperature Rise 100% Energized**

| Number of Circuit Positions | Multiplication Factor |      |
|-----------------------------|-----------------------|------|
|                             | Wire Size (AWG)       |      |
| 2 to 6                      | 0.40                  | 1    |
| 8 to 20                     | 0.40                  | 0.85 |
| 22 to 24                    | 0.36                  | 0.85 |

To determine acceptable current carrying capacity for connector size and wire gage indicated, use the Multiplication Factor from the chart above and multiply it times the Base rated Current at the maximum ambient operating temperature shown in the current rating figure.

**Engineering Notes**

---

**Grace Inertia Connectors (GIC), 3.5 mm Centerline  
(Wire-to-Wire Connectors)**

**Product Facts**

- Small wire-to-wire connectors (3.5 mm centerline) can handle 18 AWG wire
- Locking mechanism helps prevent connectors from being disconnected during movement or transportation
- Four kinds of keying per color-coded housing
- Improved housing shape offers easier mating
- Complies with lead free requirements
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. E28476

**Performance Characteristics**

- Voltage Rating**—300 VAC
- Current Rating**—7 A (max.)
- Centerline**—3.5 mm
- Applicable Wire**—26 to 18 AWG
- Temperature Rating**—  
-30°C to 105°C

This connector employs the inertia locking mechanism, which simultaneously locks when mated to help prevent mismatching. It is widely used for large-sized household electric appliances, such as refrigerators, washing machines, or dispensers. Depending on the working environment, a locking sound is difficult to confirm during mating of a connector. However, this connector supports secure mating operation even in such a working environment.

**Material and Finish**

- Housing**—6/6 Nylon UL94V-0 (CTI 600 V or more)
- Terminal**—Pre-tin Copper alloy

**.062 [1.57] Commercial Pin and Socket Connectors**

**Product Facts**

- Polarized
- Cavity identification
- Low contact-mating force
- Dual locking lances
- Detent and positive locking
- Contacts available in brass and phosphor bronze with tin and gold plating
- Panel mount and free-hanging styles
- "F" crimp contacts
- Applicator and hand tool available
- Economical commercial-grade connectors
- Compatible with high-speed application machinery and most other manufacturers' soft shells
- Wire range 30 to 18 AWG [0.05 to 0.9 mm<sup>2</sup>]
- Accepts wires with insulation diameters as large as .110 [2.79]
- Housings available in 1 to 9 positions
- **.062 plug and receptacle housings accept pin or socket contacts. The preferred convention is to use socket contacts with receptacle housings**
- Not for interrupting current
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

**Performance Characteristics**

The .062 Commercial Pin and Socket Connectors performance characteristics found on pages 53-54 are based on free-hanging and panel mount connectors, loaded with contacts crimped on stranded wire.

- Durability**—10 mating cycles
- Dielectric Withstanding Voltage**—1.0 kVAC
- Insulation Resistance**—1000 megohms min. initial
- Voltage Rating**—250 V AC or DC
- Connector Mating**—2.5 lb. [11.1 N] max. per contact
- Connector Unmating**—0.3 lb. [1.3 N] min. per contact
- Contact Insertion Force**—4.0 lb. [17.8 N] max. per contact
- Contact Retention**—7 lb. [31.1 N] min.  
15 lb. [66.6 N] min. for contacts 770983-1 and 794380-1

**.062 [1.57] Commercial Pin and Socket Connectors** (Continued)

**Performance Characteristics**  
(Continued)

**Maximum Current**—Maximum current rating of .062 Commercial Pin and Socket connectors is limited by the maximum operating temperature of the housings which is 105°C including the temperature rise of the contacts which is a maximum of 30°C. There are several variables which have a direct effect on this maximum current-carrying capability for a given connector and must be considered for each application. These variables are:

**Wire Size**—Larger wire will carry more current since it has less internal resistance to current flow and thus generates less heat. Longer wire lengths also enhance current-carrying capabilities since the wire conducts heat away from the connector.

**Connector Size**—In general, the more circuits in a connector, the less current can be carried.

**Ambient Temperature**—The higher the ambient temperature, the less current can be carried in any given connector.

**Related Product Data**

108-1037

**Application Specification** —  
114-1013

**Current Rating Verification for 30°C Maximum Temperature Rise 100% Energized**

**Wire-to-Wire**

**.062 Commercial Pin and Socket Connectors Calculated Current Table**

| Number of Circuits | Wire Gauge |      |      |      |
|--------------------|------------|------|------|------|
|                    | 18         | 20   | 22   | 24   |
| 2                  | 7.00       | 6.00 | 5.00 | 4.00 |
| 3                  | 7.00       | 6.00 | 5.00 | 4.00 |
| 4                  | 6.00       | 6.00 | 5.00 | 4.00 |
| 4                  | 6.00       | 5.00 | 4.00 | 3.00 |
| 6                  | 6.00       | 5.00 | 4.00 | 3.00 |
| 9                  | 5.00       | 4.00 | 4.00 | 3.00 |

Values are based on initial Temperature Rise versus Current Testing and are intended to be a guide in the selection of a connector family. All applications should be tested by the end user. The values listed are per circuit for fully loaded housings being 100% energized. **Note:** All combinations were not tested, and this chart contains interpolated and extrapolated values.

**Minimum Wire Lengths for T-Rise vs. Current Testing**

| AWG | Min. Length (in.) | AWG | Min. Length (in.) |
|-----|-------------------|-----|-------------------|
| 30  | 2.6               | 18  | 9.4               |
| 28  | 3.2               | 16  | 11.3              |
| 26  | 4.1               | 14  | 13.7              |
| 24  | 5.1               | 12  | 16.4              |
| 20  | 7.8               | 10  | 19.3              |

**Note:** If wire lengths used are less than those listed above, the current-carrying ability of the system will be reduced due to less heat being conducted away from the connector. The customer should fully test all applications.

**Termination Resistance/Contact Crimp Tensile Force**

| Wire Size |                 | Termination Resistance |                                   | Contact Crimp Tensile Force |      |
|-----------|-----------------|------------------------|-----------------------------------|-----------------------------|------|
| AWG       | mm <sup>2</sup> | Test Current (Amps)    | Resistance Milliohms (Max. Init.) | Force (Min.)                |      |
|           |                 |                        |                                   | lbs.                        | N    |
| 24        | 0.2             | 1.5                    | 3.50                              | 10                          | 44.5 |
| 22        | 0.3–0.4         | 3.0                    | 3.50                              | 10                          | 44.5 |
| 20        | 0.5–0.6         | 4.5                    | 3.00                              | 13                          | 57.8 |
| 18        | 0.8–0.9         | 6.0                    | 3.00                              | 14                          | 62.3 |

**Note:** This is the total resistance between wire crimps of a mated pin and socket.

**Power Double Lock (PDL) Connectors (Wire-to-Board and Wire-to-Wire)**

**Product Facts**

- Power circuit connectors of compact design
- Uses double lock plate on the wire side that helps prevent partial mating of contacts
- Double lock plate compatible with high-count positions of more than 3 rows
- Tab and receptacle contacts resist scooping of contacts at mating / unmating
- Locking of plug to cap housings and plug to board-mounted headers made by the semi-inner locking system that helps preclude the possibility of disengagement by external pressure
- Both wire-to-wire and wire-to-board applications available from the same Series lineup
- Board-mounted header compatible with resin coating, causing no hindrance with the plug locking function
- Design complies with a range of safety standards
- The housing lance design provides no lance on contacts and helps prevent entanglement of contacts with one another
- Fully polarized
- The following contact centerline by row centerline arrangements available:
  - For wire-to-wire application:  
3.96 mm x 4.6 mm  
6.5 mm x 6.5 mm
  - For wire-to-board application:  
3.96 mm x 4.6 mm  
7.92 mm x 4.6 mm  
6.5 mm x 6.5 mm
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR7189
- VDE Approved, File No. B 04 11 39175010

Power Double Lock Connectors are compact connectors designed for use in power circuit applications and are ideally suited for wiring in refrigerators, air conditioners, washing machines, gas equipment, copying machines and automatic vending machines. These connectors can be used alone by inserting wire-terminated crimp snap-in contacts into the housing. However, to achieve more positive contact mounting, plug and cap housings can be equipped with a double lock plate that helps to completely insert contacts. There are three contact centerline spacings available: 3.96 mm, 6.5 mm and 7.92 mm. Of these, the 7.92 mm centerline contact arrangement is for 2-position board-mounted headers. The mating wire-mounted plug connector uses the second circuit of the 3-position 3.96 mm centerline housing with no contact loaded. Available with the 3.96 mm centerline contact arrangement are wire-mounted plug housings and the mating wire-mounted cap housings (for free-hanging and panel mounted

applications) and board-mounted tab headers. The 6.5 mm centerline contact arrangement is used in wire-mounted plug housings and the mating board-mounted tab headers. The plug housings are loaded with receptacle contacts and the cap housings with tab contacts. The tab headers for board mounting are preloaded with solder-dipping tab contacts with tail. Contacts accept two wire size ranges: 28-22 AWG (with insulation outer diameter of 1.3 to 2.0 mm) and 20-18 AWG (with insulation outer diameter of 2.0 to 3.1 mm). The tab header for board mounting has a locking mechanism where it is compatible with resin coating that is applied to the board for waterproof. It is designed to work with the plug locking function. The solder tail section of tab contact has kink feature. Interacting with the mounting boss with kink feature, the solder tab secures the header on the board firmly during soldering.

The double lock plate is compatible with high-count positions of more than 3 rows. Also, the housing lance design of this connector, featuring no lance on contacts, makes handling of the connector very easy, as there is minimal entanglement of contacts with one another.

**Performance Characteristics**

- Voltage Rating**—300 VAC (for 3.96 mm wire-to-wire, 6.5 mm wire-to-board and 7.92 mm wire-to-board applications)  
50 VAC (for 3.96 mm wire-to-board application)
- Current Rating**—14A max. (Based on initial I-rise vs. current testing using 16 AWG wire in a 2-position connector)
- Fine Rating**—1 mV, 1 $\alpha$ A min.
- Operating Temperature**— $-30^{\circ}$  ~  $+105^{\circ}$ C

**Note:** Maximum diameter is 2.8 mm when Double Lock Plate is used.

\*Part Number suffix -2 represents high contact pressure type.

Extraction Tool P/N : 234912-1 (For receptacle contact)  
234914-1 (For tab contact)

**Note:** Contact the Tooling Assistance Center (TAC) at 1-800-722-1111 for Applicator Part Number.

**Product Composition**

**Power Double Lock Connector is composed of the components listed below:**

- Tab and receptacle contacts
- Free-hanging plug housing
- Free-hanging cap housing
- Panel mount cap housing
- PC Board-mount tab header
- Double Lock Plate

**Note:** All dimensions shown are metric.

**Note:** All part numbers are RoHS Compliant.

**Power Double Lock (PDL) Connectors (Wire-to-Board and Wire-to-Wire) (Continued)**

**3.96 mm Centerline Free-Hanging Plug Housing**

**1 Circuit**

Wire-to-Wire

Material—UL94V-0, 6/6 Nylon

**Part Number**

- 316768-1 (Natural)
- 316768-2 (Red)
- 316768-4 (Yellow)
- 316768-6 (Blue)

## Mini-Universal MATE-N-LOK Connectors

### Product Facts

- Compact, durable housings
- Pins and sockets can be accommodated in the same housings
- Contacts fully protected in the housings. Both pins and sockets can be used on the power supply wiring
- Fully polarized to provide proper plug-to-cap mating incorporating a positive locking mechanism to help prevent accidental disengagement of mated connectors. Also facilitates panel mounting
- Free-hanging or panel mount
- Housings available in 1, 2, 3, 4, 6, 9, 12 and 15 circuit configuration for wire-to-wire connection
- Connectors can be mounted to .031-.079 [0.79-2.00] thick panels
- Printed circuit board pin headers are available in 2 thru 24 circuit vertical and right-angle configurations
- Hermaphroditic housings available in 2, 3 and 4 circuits for free-hanging applications
- Low insertion/extraction forces
- Contacts accept wire size range 30-16 AWG [.05-1.2 mm<sup>2</sup>]
- Test probe contacts available
- .163 [4.14] centerline spacing
- Not for interrupting current
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

### Performance Characteristics

The Mini-Universal MATE-N-LOK Connector performance characteristics found on pages 83-84 are based on free-hanging and panel mount connectors, loaded with contacts crimped on stranded wire.

**Low Level Termination Resistance**  
20 milliohms max. total resistance between wire crimps of a mated pin and socket

**Dielectric Withstanding Voltage**—  
1.5 KVAC between adjacent circuits

**Insulation Resistance**—  
1000 megohms minimum between adjacent circuits

**Voltage Rating**—600 V AC or DC

**Contact Retention**—8 lb. min. per contact

**Durability**—20 cycles, mating and unmating

### Technical Documents

#### Product Specifications

- 108-1542 Mini-Universal MATE-N-LOK Connectors
- 108-1543 Mini-Universal MATE-N-LOK Headers
- 108-5151 Mini-Universal MATE-N-LOK Connectors (UL94V-2)
- 108-5138 Mini-Universal MATE-N-LOK Connectors (UL94V-0)

#### Application Specification

- 114-16017 Mini-Universal MATE-N-LOK Connectors

#### Instruction Sheets

- 408-3234 Mini-Universal MATE-N-LOK Connectors
- 411-5105 Mini-Universal MATE-N-LOK Connectors

**Mini-Universal MATE-N-LOK Connectors (Continued)**

**Performance Characteristics (Continued)**

**Maximum Current**—Maximum current rating of Mini-Universal MATE-N-LOK connectors is limited by the maximum operating temperature of the housings which is 105°C including the temperature rise of the contacts which is a maximum of 30°C. There are several variables which have a direct effect on this maximum current-carrying capability for a given connector and must be considered for each application. These variables are:

**Wire Size**—Larger diameter wire will carry more current since it has less internal resistance to current flow and thus generates less heat. Longer wire lengths also enhance current-carrying capabilities since the wire conducts heat away from the connector.

**Connector Size**—In general, the more circuits in a connector, the less current can be carried.

**Ambient Temperature**—The higher the ambient temperature, the less current can be carried in any given connector.

**Printed Wiring Board Conductor Size**—The finished trace conductor width and thickness should be maximized to allow for the greatest current-carrying capacity and heat dissipation.

Mini-Universal MATE-N-LOK connectors also will withstand the following tests:

**Housing Panel Retention**—  
26 lb. min.

**Housing Lock Strength**—9 lb. min.

**Thermal Shock**— -55°C to +105°C

**Temperature-Humidity Cycling**—  
25°C to 65°C at 95 RH

**Vibration**—10-55-10 cycles per minute at .06 inch total excursion

**Physical Shock**—18 drops, 50 G half-sine at 11 milliseconds

**Current Rating Verification for 30°C Maximum Temperature Rise 100% Energized**

**Wire-to-Wire Mini-Universal MATE-N-LOK Connectors — Calculated Current Table**

| Number of Circuits | Wire AWG |      |      |      |      |      |      |
|--------------------|----------|------|------|------|------|------|------|
|                    | 16       | 18   | 20   | 22   | 24   | 26   | 30   |
| 2                  | 9.50     | 9.00 | 7.50 | 6.00 | 5.00 | 4.00 | 3.00 |
| 3                  | 8.50     | 8.00 | 7.00 | 5.50 | 4.50 | 4.00 | 3.00 |
| 4                  | 8.00     | 7.00 | 6.00 | 5.00 | 4.50 | 3.50 | 2.50 |
| 6                  | 7.00     | 6.50 | 5.50 | 4.50 | 4.00 | 3.00 | 2.50 |
| 9                  | 6.00     | 5.50 | 4.50 | 4.00 | 3.50 | 3.00 | 2.00 |
| 12                 | 6.00     | 5.50 | 4.50 | 3.50 | 3.00 | 2.50 | 2.00 |
| 15                 | 5.50     | 5.00 | 4.00 | 3.50 | 3.00 | 2.50 | 2.00 |

Values are based on initial Temperature Rise versus Current Testing and are intended to be a guide in the selection of a connector family. All applications should be tested by the end user. The values listed are per circuit, for fully loaded housings being 100% energized. **Note:** All combinations above were not tested and this chart contains interpolated and extrapolated values.

**Minimum Wire Lengths for T-Rise vs. Current Testing**

| AWG | Min. Length (in.) | AWG | Min. Length (in.) |
|-----|-------------------|-----|-------------------|
| 30  | 2.6               | 18  | 9.4               |
| 28  | 3.2               | 16  | 11.3              |
| 26  | 4.1               | 14  | 13.7              |
| 24  | 5.1               | 12  | 16.4              |
| 20  | 7.8               | 10  | 19.3              |

**Note:** If wire lengths used are less than those listed above, the current-carrying ability of the system will be reduced due to less heat being conducted away from the connector. The customer should fully test all applications.

**Wire-to-Board**

Due to the vast differences in trace geometry and printed circuit board configurations, we are unable to provide a separate current carrying chart for our printed circuit board header products. However, the above Wire-to-Wire charts may be used as a guideline for headers if the trace width and thickness is equal to the listed wire gauge. For vertical headers, only 95% of the Wire-to-Wire value should be used. For right-angle headers, only 75% of the Wire-to-Wire value should be used. The chart values are only a tool for connector selection and will require the customer to fully test their application.

**Termination Resistance/Contact Crimp Tensile Force**

| Wire Size |                 | Termination Resistance |                                   | Contact Crimp Tensile Force |    |
|-----------|-----------------|------------------------|-----------------------------------|-----------------------------|----|
| AWG       | mm <sup>2</sup> | Test Current (Amps)    | Resistance Milliohms (Max. Init.) | Force (Min.)                |    |
|           |                 |                        |                                   | lbs.                        | N  |
| 30        | .05             | —                      | —                                 | —                           | —  |
| 28        | .08             | —                      | —                                 | —                           | —  |

<sup>1</sup>Mini-Universal MATE-N-LOK plug and cap housings accept pin or socket contacts. Use the appropriate contacts in the plug housing as required by the mating connector. All **Plugs** are **free-hanging** and **Caps** are **free-hanging** or **panel mount**, unless otherwise noted.

<sup>2</sup>Panel mount only.

<sup>3</sup>Hermaphroditic: Mates to itself.

<sup>4</sup>Free-hanging only.

<sup>5</sup>Duplex Finish—Plated with .000030 [.000762] min. gold in mating area and matte tin on solder tail end over .000050 [.00127] min. nickel underplate on entire contact.

<sup>6</sup>Tin Finish—Plated with .000150 [.00381] min. tin over .000050 [.00127] min. nickel underplate on entire contact.

<sup>7</sup>For Splash-Proof Sealing.

**Note: All part numbers are RoHS Compliant.**

**Mini-Universal MATE-N-LOK Connectors (Continued)**

**Contacts**

Pin diameter .039 [0.99]

**Material**

Brass or Phosphor bronze  
Stock Thickness .008 [0.20]  
These contacts are to be used in Mini-Universal MATE-N-LOK Plug or Cap housings only.

<sup>1</sup> Duplex Finish — Plated with .000030 [.000762] min. gold in mating area and .000100 [.00254] min. tin in crimping area over .000050 [.00127] min. nickel underplate on entire contact.  
<sup>2</sup> .671 [17.04] and .659 [16.74] dimensions are .689 [17.50] for indicated part numbers.  
<sup>3</sup> HDM Applicator part number ending in -1 is used on AMPOMATOR CLS Machine with T or G Terminators, -2 is used on AMP-O-LECTRIC Model K Machine, -3 is used on AMP-O-ELECTRIC Model G Machine. See pages 207-210 for further information.  
<sup>4</sup> HDM Applicator part number ending in -3 is used on AMPOMATOR CLS Machine with T or G Terminators, -4 is used on AMP-O-LECTRIC Model K Machine, -5 is used on AMP-O-LECTRIC Model G Machine. See pages 207-210 for further information.

**Note: All part numbers are RoHS Compliant.**

**Keying Plug**

**Material**

UL94V-0 Nylon, white color

**Part Number**  
174670-1

**Test Probe Contact**

**Material and Finish**

Phosphor bronze, nickel plated

**Part Number**  
172971-1

**Notes:**

1. The test probe is inserted into the housing in the same direction as indicated by the arrow shown to the right.
2. The test probe can be used in the Cap or Plug Housing.
3. Test probes are supplied unassembled.

**Contact Extraction Tool**  
No. 189727-1  
IS 408-4118

**Contact Insertion Tool**  
(For inserting contacts applied to small diameter wire)  
No. 91002-1  
IS 408-7347

## Mini-Universal MATE-N-LOK Sealed Connector System

### Product Facts — Sealed Connector System

- Splash-proof design allows use in areas where high humidity, intermittent liquid splashing or foam-in applications require a sealed connector for improved electrical performance
- Wire-to-wire and wire-to-board
- Dual row, 2 to 10 positions (even only) and 16 positions
- Mates with all standard Mini-Universal MATE-N-LOK connector housings and pin headers (except Blindmate)
- Positive, polarized keyed and latched orientation to ease application
- Utilizes proven Mini-Universal MATE-N-LOK contacts with existing application tooling
- Tested to Sealing Level of IP56 and IP57 per IEC 60529
- Primarily used in Appliance, Vending and HVAC applications
- Compact, durable housings
- Pins and sockets can be accommodated in the same housings
- Contacts fully protected in the housings. Both pins and sockets can be used on the power supply wiring
- Fully polarized to provide proper plug-to-cap mating incorporating a positive locking mechanism to help prevent accidental disengagement of mated connectors. Also facilitates panel mounting
- Free-hanging or panel mount
- Connectors can be mounted to .031-.079 [0.79-2.00] thick panels
- With seals, contacts accept wire size range 26-18 AWG [.12-.8 mm<sup>2</sup>] with insulation diameter of .040-.083 [1.02-2.11]
- .163 [4.14] centerline spacing
- Not for interrupting current

### Performance Characteristics

The Mini-Universal MATE-N-LOK Connector performance characteristics found on pages 95-96 are based on free-hanging and panel mount connectors, loaded with contacts crimped on stranded wire.

#### Low Level Termination Resistance

20 milliohms max. total resistance between wire crimps of a mated pin and socket

#### Dielectric Withstanding Voltage—

1.5 KVAC between adjacent circuits

#### Insulation Resistance—

1000 megohms minimum between adjacent circuits

#### Voltage Rating—600 V AC or DC

**Contact Retention**—8 lb. min. per contact

**Durability**—20 cycles, mating and unmating

**Engineering Notes**

---

**Mini-Universal MATE-N-LOK 2 Connectors**

**Product Facts**

- One molded piece, secondary locking plug and cap housing assemblies
- Three-point stabilization to provide better terminal position
- Fully polarized to provide proper plug-to-cap mating
- Lanceless contacts for tangle-free handling
- Toolless contact removal
- Tin or duplex gold plated contacts
- Available in 2 through 24 circuit sizes wire-to-wire and wire-to-board
- Mates with standard Mini-Universal MATE-N-LOK headers and connectors
- Contacts available in strip and loose piece
- Polarized housings available in UL 94V-0 or UL 94V-2 flammability rated material
- Mini-Universal MATE-N-LOK 2 pins and sockets can be intermixed in Mini-Universal MATE-N-LOK 2 housings
- Mini-Universal MATE-N-LOK 2 pins and sockets can not be used in standard Mini-Universal MATE-N-LOK housings
- Contacts accept wire size range 30-16 AWG [.05-1.2 mm<sup>2</sup>]
- .163 [4.14] centerline spacing
- Not for interrupting current
- Recognized under the Component Program of Underwriters Laboratories Inc. to US and Canadian Standards, File No. E28476

**Performance Characteristics**

The Mini-Universal MATE-N-LOK 2 Connector performance characteristics found on pages 99-100 are based on free-hanging connectors, loaded with contacts crimped on stranded wire.

**Low Level Termination Resistance**

20 milliohms max. total resistance between wire crimps of a mated pin and socket

**Dielectric Withstanding Voltage**

1500 V AC or DC between adjacent circuits at sea level

**Insulation Resistance**—

100 megohms minimum between adjacent circuits

**Voltage Rating**—600 V AC or DC

**Contact Retention**—15 lb. min. per contact

**Durability**—25 cycles, mating and unmating

**Current Rating**—up to 10.5 amps per circuit; 2 position

**Mating Force**—2.5 lb. max. per circuit

**Unmating Force**—0.25 lb. minimum per circuit

| Wire Size |                 | Termination Resistance |                                   | Contact Crimp Tensile Force |    |
|-----------|-----------------|------------------------|-----------------------------------|-----------------------------|----|
| AWG       | mm <sup>2</sup> | Test Current (Amps)    | Resistance Milliohms (Max. Init.) | Force (Min.)                |    |

**Instruction Sheet**

408-3393 Mini-Universal MATE-N-LOK 2 Connectors

Mini-Universal MATE-N-LOK 2 connectors also will withstand the following tests:

**Housing Lock Strength**—6 lb. min.

**Thermal Shock**—-55°C to +105°C

**Temperature-Humidity Cycling**—25°C to 65°C at 95 RH

**Vibration**—10-55-10 cycles per minute at .06 inch total excursion

**Physical Shock**—18 drops, 50 G half-sine at 11 milliseconds

Mini-Universal MATE-N-LOK 2 Connectors  
.163 [4.14] Centerline

**Mini-Universal MATE-N-LOK 2 Connectors (Continued)**

**Performance Characteristics (Continued)**

**Maximum Current**—Maximum current rating of Mini-Universal MATE-N-LOK 2 connectors is limited by the maximum operating temperature of the housings which is 105°C (gold) or 85°C (tin) including the temperature rise of the contacts which is a maximum of 30°C. There are several variables which have a direct effect on this maximum current-carrying capability for a given connector and must be considered for each application. These variables are:

**Wire Size**—Larger diameter wire will carry more current since it has less internal resistance to current flow and thus generates less heat. Longer wire lengths also enhance current-carrying capabilities since the wire conducts heat away from the connector.

**Connector Size**—In general, the more circuits in a connector, the less current can be carried.

**Ambient Temperature**—The higher the ambient temperature, the less current can be carried in any given connector.

**Printed Wiring Board Conductor Size**—The finished trace conductor width and thickness should be maximized to allow for the greatest current-carrying capacity and heat dissipation.

**Current Rating Verification for 30°C Maximum Temperature Rise 100% Energized**

**2 Circuit Connector (Wire-to-Wire)**

**6 Circuit Connector (Wire-to-Wire)**

**Contacts**

Pin diameter .039 [0.99]

**Material**

Brass

Stock Thickness .010 [0.25]

These contacts can be used in either Mini-Universal MATE-N-LOK 2 Plug or Cap housings **only**.

**Not to be used with Mini-Universal MATE-N-LOK Connectors**

<sup>1</sup>Mini-Universal MATE-N-LOK 2 plug and cap housings accept pin or socket contacts. Use the appropriate contacts in the plug housing as required by the mating connector. All **Plugs** and **Caps** are **free-hanging**.  
<sup>2</sup>Duplex Finish — Plated with .000030 [.000762] min. gold in mating area and matte tin on solder tail end over .000050 [.00127] min. nickel underplate on entire contact.  
<sup>3</sup>Tin Finish — Plated with .000150 [.00381] min. tin over .000050 [.00127] min nickel underplate on entire contact.  
<sup>4</sup>All PC Board pin headers have 94V-0 flammability rating and can mate to V-0 or V-2 plug housings.

**Note:** All part numbers are RoHS Compliant.

**Engineering Notes**

---

**(MR) Miniature Rectangular Connectors**

**Product Facts**

- Housings positively lock to help prevent accidental disengagement
- Either cap or plug housing can be mounted in same rectangular panel cutout without additional hardware
- UL94V-0 housings
- Plug and cap design includes molded-in polarizing feature for proper mating
- Numbered cavities for easy circuit identification
- Egg crate design of plug half fully encloses socket contacts, reducing shock hazard
- Molded skirt extension on cap protects pin contacts
- Strain reliefs for 6 through 36 positions are available
- Choice of tin or gold plated contacts
- Not for interrupting current
- Socket solder tail contacts available for hot side PC Board mounting
- High density achieved through .165 [4.19] contact centerline spacing
- Extraction tool removes both pins and sockets
- Contacts accept 26-18 AWG [.12-.8 mm<sup>2</sup>] wire sizes and insulation diameters of .025-.115 [.635-2.92]
- Same applicator crimps pins and sockets
- Vertical PC Board pin headers are available
- Pin header standoffs on housings at board interface facilitates gas venting and cooling during soldering
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

**Performance Characteristics**

The Miniature Rectangular Connector performance characteristics found on pages 109-110 are based on free-hanging and panel mount connectors, loaded with contacts crimped on stranded wire.

**Dielectric Withstanding Voltage**—2.5 KVAC between adjacent circuits

**Insulation Resistance**—1500 megohms minimum initial between adjacent circuits

**Voltage Rating**—250 V AC

**Connector Mating**—Split Pin—1.0 lb. max. per circuit

**Connector Unmating**—Split Pin—.25 lb. min. per circuit

**Contact Insertion Force**—1.75 lb. max. per contact

**Contact Retention**—10 lb. min. per contact

**Durability**—25 cycles, mating and unmating

**Performance Characteristics**

(Continued)

**Maximum Current**—Maximum current rating of Miniature Rectangular connectors is limited by the maximum operating temperature of the housings which is 105°C including the temperature rise of the contacts which is a maximum of 30°C. There are several variables which have a direct effect on this maximum current-carrying capability for a given connector and must be considered for each application. These variables are:

**Wire Size**—Larger diameter wire will carry more current since it has less internal resistance to current flow and thus generates less heat. Longer wire lengths also enhance current-carrying capabilities since the wire conducts heat away from the connector.

**Connector Size**—In general, the more circuits in a connector, the less current can be carried.

**Ambient Temperature**—The higher the ambient temperature, the less current can be carried in any given connector.

**Printed Wiring Board Conductor Size**—The finished trace conductor width and thickness should be maximized to allow for the greatest current-carrying capacity and heat dissipation.

Miniature Rectangular connectors also will withstand the following tests:

**Vibration**—10-55-10 cycles per minute at .06 inch total excursion

**Physical Shock**—18 drops, 50 G sawtooth at 10 milliseconds

**Housing Panel Retention**—50 lb. min.

**Housing Lock Strength**—20 lb. min.

**Thermal Shock**—-55°C to +85°C

**Temperature-Humidity Cycling**—25°C to 65°C at 95 RH

**Corrosion**—48 hr. at 5% salt concentration

**Current Rating Verification for 30°C Maximum Temperature Rise 100% Energized**

**Wire-to-Wire  
MR Calculated Current Table**

| Number of Circuits | Wire Gauge |      |      |      |      |
|--------------------|------------|------|------|------|------|
|                    | 18         | 20   | 22   | 24   | 26   |
| 2                  | 9.00       | 8.00 | 6.50 | 5.50 | 5.00 |
| 3                  | 8.50       | 7.00 | 6.00 | 5.00 | 4.50 |
| 4                  | 7.00       | 6.50 | 5.50 | 5.00 | 4.00 |
| 6                  | 6.00       | 6.00 | 5.00 | 4.00 | 4.00 |
| 9                  | 5.00       | 5.00 | 4.00 | 4.00 | 3.50 |
| 12                 | 4.50       | 4.50 | 4.00 | 3.50 | 3.00 |
| 15                 | 4.50       | 4.00 | 3.50 | 3.00 | 2.50 |
| 20                 | 4.00       | 4.00 | 3.50 | 3.00 | 2.50 |
| 24                 | 4.00       | 3.50 | 3.00 | 2.50 | 2.00 |
| 36                 | 3.50       | 3.00 | 2.50 | 2.00 | 2.00 |

Values are based on initial Temperature Rise versus Current Testing and are intended to be a guide in the selection of a connector family. All applications should be tested by the end user. The values listed are per circuit for fully loaded housings being 100% energized. **Note:** All combinations were not tested and this chart contains interpolated and extrapolated values.

**Minimum Wire Lengths for T-Rise vs. Current Testing**

| AWG | Min. Length (in.) | AWG | Min. Length (in.) |
|-----|-------------------|-----|-------------------|
| 30  | 2.6               | 18  | 9.4               |
| 28  | 3.2               | 16  | 11.3              |
| 26  | 4.1               | 14  | 13.7              |
| 24  | 5.1               | 12  | 16.4              |
| 20  | 7.8               | 10  | 19.3              |

**Note:** If wire lengths used are less than those listed above, the current-carrying ability of the system will be reduced due to less heat being conducted away from the connector. The customer should fully test all applications.

**Wire-to-Board**

Due to the vast differences in trace geometry and printed circuit board configurations, we are unable to provide a separate current carrying chart for our printed circuit board header products. However, the above Wire-to-Wire charts may be used as a guideline for headers if the trace width and thickness is equal to the listed wire gauge. For vertical headers, only 95% of the Wire-to-Wire value should be used. For right-angle headers, only 75% of the Wire-to-Wire value should be used. The charted values are only a tool for connector selection and will require the customer to fully test their application.

**Termination Resistance/Contact Crimp Tensile Force**

| Wire Size | Termination Resistance | Contact Crimp Tensile Force |                                     |      |     |
|-----------|------------------------|-----------------------------|-------------------------------------|------|-----|
|           |                        | Test Current (Amps)         | Resistance (Milliohms (Max. Init.)) | lbs. | N   |
| 26        | .12                    | 1                           | 5.00                                | 5    | 22  |
| 24        | .2                     | 1.5                         | 5.00                                | 8    | 36  |
| 22        | .3                     | 3                           | 4.50                                | 14   | 62  |
| 20        | .5                     | 4.5                         | 4.00                                | 14   | 62  |
| 18        | .8                     | 6                           | 4.00                                | 30   | 133 |

**Note:** This is the total resistance between wire crimps of a mated pin and socket.

**Notes:**

1. When mounted in a .060 [1.52] thick panel, the cap's mating end extends .800 [20.32] beyond the panel front; wire end extends .220 [5.58] from the panel rear. Plug mating end extends .580 [14.73] beyond the panel front; wire end extends .220 [5.58] from the panel rear.
2. The panel should be punched so that the housing enters the panel in the same direction as the punch for ease of assembly.

**Notes:**

1. These strain reliefs can be used with either pin or socket housings.
2. **Customer supplied:** One No. 6 Panhead Type B self-taping screw, 3/8 long. Plating is optional to conform to customer requirements.
3. Strain reliefs are also available in UL94V-2 nylon, black in color. To order strain reliefs in this material use the appropriate dash numbers: 1-XXXXXX-9.

**Housings**—pages 113-114

**Notes:**

1. Commoning bars can be used to common adjacent pin contacts in any column or row. Maximum stack per pin is two.
2. The above illustrates the proper insertion of the Commoning Bar.
3. Use the mating socket housing to assemble the Commoning Bar onto the pins.

<sup>1</sup>Duplex Finish—Plated with .000030 [.000762] min. gold in mating area, matte tin on solder tail end over .000050 [.00127] min. nickel underplate on entire contact.

**Note:** All part numbers are RoHS Compliant.

High Density

(MR) Miniature Rectangular Connectors .165 [4.20] Centerline

## VAL-U-LOK Connector System (Wire-to-Wire, Wire-to-Board and Wire-to-Panel)

### Product Facts

- Low cost, wire-to-wire, wire-to-board and wire-to-panel connectors with 4.2 mm centerline
- Easy mate and unmate with positive latch design
- Single row, 3-5 positions: receptacles, panel mount or free-hanging plugs
- Double row, 2-24 positions (even only): receptacles, panel mount or free-hanging plugs, and vertical or right-angle pin headers
- Available in UL 94V-2 or UL 94V-0 flammability rated nylon
- Products are lead free to help promote a cleaner environment
- Intermateable and interchangeable with Molex Mini-Fit, Jr. and intermateable AMP-DUAC connectors
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476 
- Certified by Canadian Standards Association, File No. 208567 
- Tyco Electronics Design For Environment (DFE) Standard 230-5

High Density

VAL-U-LOK Connector System  
.165 [4.20] Centerline

### Performance Characteristics

#### Electrical

- Voltage**—600 VAC
- Current**—9 amps max. in 2-position applications
- Dielectric Withstanding Voltage**—1500 VAC min.
- Insulation Resistance**—1000 megohms min.
- Operating Temperature**—-40°C to +105°C [-40°F to +221°F]

#### Mechanical

- Connector Mating**—1.55 lb. [6.90 N] max. per circuit
- Connector Unmating**—.11 lb. [.49 N] min. per circuit
- Contact Retention**—4.88 lb. [21.71 N] min. per contact
- Durability**—30 cycles, mating and unmating

### Material and Finish

- Housings**—Nylon, UL 94V-2 and UL 94V-0
- Contacts**—Brass or Phos. Bronze with tin plating (Lead-Free) or gold plating

### Technical Documents

- Design Objective**  
108-2112
- Application Specification**  
114-13172
- Engineering Test Report**  
502-1204

### Applications

- Computer motherboards/power supplies
- Harness assemblies used in the Vending, Gaming and Appliance industries
- Car alarm systems
- Heating systems

## AMP-DUAC Connectors

### Product Facts

- Wire-to-board and wire-to-wire connector system
- Free-hanging or panel mount plug housings
- Vertical header with or without mounting pegs and with or without drain holes
- Selective loading available on vertical headers
- 4.2 mm x 4.2 mm centerline
- Male and female contacts designed for 26-22 AWG and 22-18 AWG wire
- Receptacle housings accept female contacts with less orientation than competitive product
- Right-angle headers
- Designed for power applications
- Positive latch feature helps prevent disconnection
- AMP-DUAC (dual action) receptacle contacts
- Anti-stubbing contact design
- Polarized housings
- Intermateable with Molex Mini-Fit Jr. connectors
- Recognized under Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR7189

AMP-DUAC Connectors, for power or signal applications, belong to the broad family of Tyco Electronics Soft Shell connectors.

The dual action design of the female receptacle contact provides for low insertion force, yet maintains high-performance current capacity. To help meet your production requirements, semiautomatic bench machines and hand tools are available for strip and loose piece contacts, respectively.

High density, 4.2 mm x 4.2 mm [.165 x .165] centerline, dual-row receptacle housings mate with plug housings (free-hanging or panel mount) or pc board headers (vertical or right-angle). Selective contact loading is available for vertical headers.

All housings are polarized for easier mating and locking latches help maintain reliable connections.

AMP-DUAC wire-to-board, wire-to-panel, and wire-to-wire connectors are intermateable with Molex Mini-Fit Jr. series connectors.

### Technical Documents

- Product Specifications**  
108-1699—Headers  
108-19099—Receptacles
- Application Specification**  
114-19048—Use of Receptacles
- Qualification Test Report**  
501-434  
501-576

### Performance Data

- Voltage Rating**—600 VAC
- Current Rating**—9 amps maximum in 2 position applications
- Low Level Resistance**—10 megohms max.
- Dielectric Withstanding Voltage**—1500 VAC/min.
- Insulation Resistance**—1000 megohms minimum
- Operating Temperature**—-55°C to +105°C [-67°F to +221°F]
