

240x128 WITH CONTROLLER SAP1024/T6963C

EA DIP240J-7LWTP

EA DIP240B-7LWTP
dimensions 113x70x12mm

FEATURES

- * VERY BRIGHT AND CONTRASTY DISPLAY
- * ALSO WITH ANALOGUE TOUCH PANEL
- * DIRECT MOUNTING ON PCB
- * BUILT-IN CONTROLLER SAP1024/T6963C
- * 8-BIT DATA BUS INTERFACE
- * BUILT-IN COMPLETE CHARACTER SET
- * TEXT AND GRAPHIC SIMULTANOUSLY
- * SELF DEFINABLE CHARACTERS
- * LARGE DISPLAY MEMORY WITH 32kB (> 8 PAGES)
- * POWER SUPPLY +5V, typ. 60mA (W./O. BACKLIGHT)
- * CONTRAST POWER GENERATOR ON-BOARD
- * OPERATING TEMPERATURE RANGE -20 ... +70°C
- * TEMPERATURE COMPENSATION CIRCUIT ON-BOARD

ORDERING INFORMATION

LCD-GRAPHIC MODULE 240x128 BLUE, WITH LED-B./L.
WITH TOUCH PANEL, ANALOGUE, 4-WIRE
DITO. IN BLACK&WHITE
WITH TOUCH PANEL, ANALOGUE, 4-WIRE
SOCKET 1x20, 4.5mm HEIGHT (1 PC.)

LC-GRAPHIC DISPLAY EA DIP240-7

The very successful display line from ELECTRONIC ASSEMBLY, called DIP-series get's with it's EA DIP240-7 a new member now. Simple placing and soldering into pcb will manage not even electrical contact but also mechanical mounting.

The displays EA DIP240-7 provide a full graphic resolution of 240x128 dots and are at once all advantages of modern displays: standard controller T6963 on-board, fashionable LED- backlight with blue optic, single supply +5V, no additional power supply is required, wide operating temperature range incl. built-in temperature compensation.

LED BACKLIGHT

Both types are equipped with a white LED-backlight. Please note that LEDs are wearable parts. Life time about 50,000 hours and more, depending from ambient conditions. A current limiting resistor for max. 120mA is built-in already. Please take into account a derating for temperatures higher than >+25°C. To extend life time backlight can be switched on and off directly via processor port (pin LEDOff). Life time can be increase by reduction of driving current, too.

CONTROLLER SAP1024/T6963C BUILT-IN

All modules provide a built-in SAP1024 or T6963C. Therefore a direct interface to 8-Bit processor system is available together with a comfortable command set. With that there's a complete character set built-in for example. This can be extended or completely exchanged by some self-definable characters, too. Every single character may be advised by a, attribute like "invers", "blink" or "invisible".

More than 8 pages are available even in graphic mode (32kB). Text can be joined via "and-", "or-", "exor-" function with graphics layer.

CONTRAST ADJUSTMENT

Contrast pre-adjusted ex works. Thanks to the integrated temperature compensation there's no need to adjust while operation anymore.

Is contrast adjustment requested nevertheless, R20 need to be removed and J5 closed. An external potentiometer need to be connected like shown in the schematic at the right.

PINOUT

19	TOP	Touch Panel	39	A	LED backlight Anode +5V
20	RIGHT	Touch Panel	40	C	LED backlight Cathode 0V

TOUCH PANEL

Ordering code EA DIP240B-7KLWTP (and EA DIP240J-7LWTP of course) do include a built-in touch panel.

Touch panel is an analogue one with 4-wire. Connection can be done via touch panel controller like MK712 from MICROCLOCK or ADS7846 from Burr-Brown. If there's a microcontroller with 4 switchable analogue inputs /digital outputs then touch panel can be connected directly to the uC.
