# Aluminium Housed Wirewound Resistors

WH Series

- High power dissipation up to 300W •
- All welded construction •
- Suitable for severe environments
- Designed for excellent thermal conductivity to heatsink •
- Spade terminal option •
- **RoHS compliant**

### **Electrical Data**

		WH5	WH10	WH25	WH50	Notes

### Construction

Cap and lead assemblies are fitted to a high purity ceramic substrate. The resistive element is wound onto the substrate and welded to the caps. The wound rod is then moulded and fitted into aluminium housing to give optimum stability and reliability.

### Marking

The resistors are legend marked with type reference, resistance value and tolerance which will withstand all accepted industrial cleaning fluids. Values are marked in accordance with IEC 62

Noise (in decade of frequency)	μV/V	Not specified	0	0	0
Insulation resistance	ohms	1G min		10G mir	۱
Pulse and overload performance	Not specified	See graphs			

Note: A 0.05 ohm addition is to be added to the performance of all resistors < 10 ohms.

#### **Pulse and Overload Performance**

For short durations of  $\leq 0.1$ s the energy graph should be used. For longer durations the overload graph applies.

### **Application Notes**

After soldering, care should be taken to ensure that there are no flux residues on the end faces of the moulding compound, otherwise insulation resistance will be reduced. The minimum surface tracking distances from termination to casing are shown in the Physical Data tables as dimension Dt.

It is recommended that the resistor base should be coated thinly with heatsink compound before mounting to obtain the stated operating characteristics. The heatsink compound increases thermal conductivity to the heatsink.

#### **General Note**

TT electronics reserves the right to make changes in product specification without notice or liability. All information is subject to TT electronics' own data and is considered accurate at time of going to print.

### Aluminium Housed Wirewound Resistors

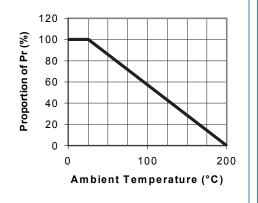

WH Series

The standard aluminium heatsinks are defined in the table below. If smaller heatsinks are used then derating should be applied as indicated in the graph below. If no heatsink is employed, use the ratings for 1cm<sup>2</sup>.

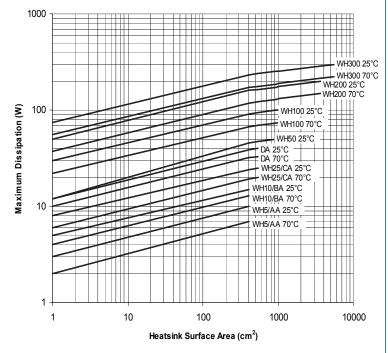

### Reference heatsink dimensions

Type (CECC)	Thickness (mm)	Area (cm²)
WH5 (AA)	1	410
WH10 (BA)	1	410
WH25 (CA)	1	544
WH50 (DA)	1	544
WH50 @ 50W	1.5	930
WH100	3	1000
WH200	3	3800
WH300	3	5800

#### Derating for ambient temperature

#### Derating for reduced heatsink dimensions

### Packaging

WH resistors are packed in plastic bags and boxed.

### **Ordering Procedure**

 Example: WH25 with spade terminals at 100 ohms with a 5% tolerance:

 WH25T - 100RJI

 Type

 Termination

 Standard

 T

 Spade terminal

 Value (use IEC62 code)

 F

 T%

 J

 5%

 G
 2%

 K

 10%

#### Packing

	WH5, 10		250/box	
	WH25, 50	Bulk	200/box	Standard
'	WH100	Duik	45/box	Standard
	WH200, 300	-	10/box	

The following options apply toWH5, 10, 25 & 50 only:

For CECC released product state on order the CECC number and style. Example: WH25-3K3JI CECC40203-006 CA For SnPb finish instead of Pb-free replace the packing suffix with PB. Example: WH25-3K3JPB
