

# **High Intensity SMD LED PLCC-2**

#### DESCRIPTION

This device has been designed to meet the increasing demand for AllnGaP technology.

The package of the VLME310. is the PLCC-2 (equivalent to a size B tantalum capacitor).

It consists of a lead frame which is embedded in a white thermoplast. The reflector inside this package is filled up with clear epoxy.

## PRODUCT GROUP AND PACKAGE DATA

- Product group: LED
- Package: SMD PLCC-2
- · Product series: standard
- Angle of half intensity: ± 60°

### **FEATURES**

- SMD LED with exceptional brightness
- · Luminous intensity categorized
- Compatible with automatic placement equipment
- EIA and ICE standard package
- · Compatible with IR reflow, vapor phase and wave solder processes according to CECC 00802 and J-STD-020
- Available in 8 mm tape
- Low profile package
- · Non-diffused lens: excellent for coupling to light pipes and backlighting
- Low power consumption
- Luminous intensity ratio in one packaging unit  $I_{Vmax}/I_{Vmin} \le 1.6$
- Preconditioning according to JEDEC<sup>®</sup> level 2a
- AEC-Q101 gualified
- Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

#### **APPLICATIONS**

- · Automotive: backlighting in dashboards and switches
- Telecommunication: indicator and backlighting in telephone and fax
- Indicator and backlight for audio and video equipment
- · Indicator and backlight in office equipment
- Flat backlight for LCDs, switches, and symbols
- General use

	2	140	180	
S	c 1	180	224	
3	2	224	280	

#### Note

Luminous intensity is tested at a current pulse duration of 25 ms

and an accuracy of  $\pm$  11 %. The above type numbers represent the order groups which include only a few brightness groups. Only one group will be shipped on each reel (there will be no mixing of two groups on each reel) each reel).

In order to ensure availability, single brightness groups will not be orderable.

In a similar manner for colors where wavelength groups are measured and binned, single wavelength groups will be shipped in any one reel.

In order to ensure availability, single wavelength groups will not be orderable

### **PACKAGE DIMENSIONS** in millimeters

# Vishay Semiconductors

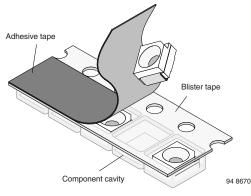

Dimensions: reflow and vapor phase (wave soldering)

### **METHOD OF TAPING / POLARITY AND TAPE AND REEL**

#### SMD LED (VLM3 - SERIES)

Vishay's LEDs in SMD packages are available in an antistatic 8 mm blister tape (in accordance with DIN IEC 40 (CO 564) for automatic component insertation. The blister tape is a plastic strip with impressed component cavities, covered by a top tape.

## BAR CODE PRODUCT LABEL (example)

- A. Type of component
- B. Manufacturing plant
- C. SEL selection code (bin):
  - e.g.: P1 = code for luminous intensity group 2 = code for color group
- D. Date code year / week
- E. Day code (e.g. 1: Moday)
- F. Batch no.
- G. Total quantity
- H. Company code

## **DRY PACKING**

The reel is packed in an anti-humidity bag to protect the devices from absorbing moisture during transportation and storage.

## FINAL PACKING

The sealed reel is packed into a cardboard box. A secondary cardboard box is used for shipping purposes.

## Vishay Semiconductors

### **RECOMMENDED METHOD OF STORAGE**

Dry box storage is recommended as soon as the aluminum bag has been opened to prevent moisture absorption. The following conditions should be observed, if dry boxes are not available:

- Storage temperature 10 °C to 30 °C
- Storage humidity  $\leq$  60 % RH max.

After more than 672 h under these conditions moisture content will be too high for reflow soldering.

In case of moisture absorption, the devices will recover to the former condition by drying under the following condition:

192 h at 40 °C + 5 °C / - 0 °C and < 5 % RH (dry air / nitrogen) or

96 h at 60  $^{\circ}\text{C}$  + 5  $^{\circ}\text{C}$  and < 5 % RH for all device containers or

24 h at 100 °C + 5 °C not suitable for reel or tubes.

An EIA JEDEC standard JESD22-A112 level 2a label is included on all dry bags.

CAUT This bag o MOISTURE - SENS	ontains
1. Shelf life in sealed bag 12 months at <4	0°C and < 90% relative humidity (RH)
<ol> <li>After this bag is opened devices that wi vapor-phase reflow, or equivalent proc 260°C) must be:         <ul> <li>a) Mounted within 672 hours at fib) Stored at ≤10% RH.</li> </ul> </li> </ol>	
<ul> <li>3. Devices require baking before mounting</li> <li>a) Humidity Indicator Card is &gt;109</li> <li>b) 2a or 2b is not met.</li> </ul>	
4. If baking is required, devices may be ba 192 hours at 40°C + 5°C/-0°C and 96 hours at 60±5°Cand <5%RH 24 hours at 100±5°C	<5%RH (dry air/nitrogen) or

## ESD PRECAUTION

Proper storage and handling procedures should be followed to prevent ESD damage to the devices especially when they are removed from the antistatic shielding bag. Electrostatic sensitive devices warning labels are on the packaging.

#### VISHAY SEMICONDUCTORS STANDARD BAR CODE LABELS

The Vishay Semiconductors standard bar code labels are printed at final packing areas. The labels are on each packing unit and contain Vishay Semiconductors specific data.
