

A Unit of Teledyne Electronic Technologies

Optically Isolated 1.0A with Short-Circuit Protection & Trip Status DC Solid-State Relay

PART NUMBER	RELAY DESCRIPTION
C75-2	SSR with Short Circuit Protection & Terminals for Through Hole Mount
C75-2S	SSR with Short Circuit Protection, Trip Status, & Terminals for Through Hole Mount
C75-2SH	SSR with Short Circuit Protection, Trip Status, Over Voltage Spike Protection Terminals for Through Hole Mount
SC75-2	SSR with Short Circuit Protection & Terminals for Surface Mount
SC75-2S	SSR with Short Circuit Protection, Trip Status, & Terminals for Surface Mount
SC75-2SH	SSR with Short Circuit Protection, Trip Status, Over Voltage Spike Protection. Terminals for Surface Mount

ELECTRICAL SPECIFICATIONS

(-40°C to 85°C UNLESS OTHERWISE SPECIFIED)

INPUT (CONTROL) SPECIFICATIONS

Parameter (see Note 1)	Min	Max	Units	
Control Voltage Range	4.5	5.5	Vdc	
Input Current @5Vdc (See Figure 1)	12	18	mAdc	
Must Turn-On Voltage	4.2		Vdc	
Must Turn-Off Voltage		1.5	Vdc	

OUTPUT (LOAD) SPECIFICATIONS

Min	Max	Units			
Load Voltage Rating		Vdc			
Transient Blocking Voltage					
Output Current Rating @25°C (See Figure 2)					
On Resistance (See Figure 3)					
Leakage Current at Rated Voltage					
Turn-On Time					
Turn-Off Time					
Input to Output Capacitance @ 1KHz					
1000		Vac			
Insulation Resistance 10 ⁸		Ohm			
	130	°C			
Electrical System Spike (see note 8)					
STATUS SPECIFICATIONS					
Min	Max	Units			
Status Leakage Current @ 15Vdc					
Status Blocking Voltage					
Status "On" Voltage @ 10 mAdc					
Status "On" Current 10		mAdc			
	1000 10 ⁸ CATIONS Min	60 80 2) 1.0 0.9 100 2.0 2.0 5 1000 10 ⁸ 130 ±600 CATIONS Min Max 1 32 0.4			

FEATURES/BENEFITS

- · Short Circuit Protected: Prevents damage to system components, assemblies and system wiring
- Trip Status: Provides status monitoring and feedback of the protection state
- Optical Isolation: Isolates control circuits from load transients Eliminates ground loops and signal ground noise

 • Low Off-State Leakage: For high
- off-state impedance
- Switches High Currents: To 1.0 Adc
- High Dielectric Strength: For safety and for protection of control and signal level circuits

DESCRIPTION

The C75-2S solid state relay utilizes a power FET switch that is protected against overload and short circuit currents. Protection is provided against turn-on into a short circuit, shorts that occur while conducting loads up to rated or for long term overload currents above rated that slowly overheat the relay. Once the protection trips the relay off it will remain off until reset by cycling the input control. Using the C75-2S to switch power loads can prevent fires, damage to system assemblies and system wiring. The power FET output offers low "On" resistance and can switch loads in either the high or the low side of the power line. The C75-2 is packaged in a 16 pin DIP, with surface mount or through hole mounting available. The C75-2SH also provides an open collector trip status feedback to the relay's control side for short circuit and thermal trip monitoring.

H = Relay has an internal over voltage suppressor for inductive loads.
