

Type RP73 Series

Key Features

High precision -
Tolerance down to 0.05%
and TCR down to 5PPM

Power rating to 1.0W
Up to 200V DC operating
voltage

Terminal finish –
electroplated 100% matte
Sn

Applications

Communications

Industrial Controls

Instrumentation

Medical

The RP73 resistor series is a stable thin film chip resistor range offering increased power dissipation, higher temperature capabilities and increased working voltages compared to the standard RN73 series. The resistor is produced by sputtering a metal film onto high grade alumina and protecting with three complete printed layers. Values are normally offered in E96 and E24 series. The RP73 resistor has accurate and uniform physical dimensions to reduce placement problems.
