# AMP Circular Connectors for Commercial Signal & Power Applications

## Introduction

### Product Facts

- Lightweight, all-plastic and metal-shell connectors
- CPC connectors are UL 94V-0 rated and made of stabilized, heat resistant, self-extinguishing thermoplastic material
- Metal-shell CPC connector housings made of UL 94V-0 rated thermoplastic
- Operating temperature range: -40°C to +105°C
- Available in panel or chassis mount and free-hanging configurations
- Quick connect/disconnect capability with thread assist, positive detent coupling
- Built-in pin and socket protection
- Polarized for proper mating of connector halves
- Special connector configurations offer special solder and posted contacts, special receptacles with or without threaded inserts
- Full complement of optional accessories
- Recognized under the Component Program of Underwriters Laboratories Inc.  for 250 VAC, rms or 250 VDC, Service‡; Series 1 and Series 3 (600 V); Series 4 (600 V) and Series 2, Series 6 (250 V) File No. E28476

‡Select connectors are recognized for 600 volts service.

### Restriction on the use of Hazardous Substances (RoHS)

At Tyco Electronics, we're ready to support your RoHS requirements. We've assessed more than 1.5 million end items/components for RoHS compliance, and issued new part numbers where any change was required to eliminate the restricted materials.

Part numbers in this catalog are RoHS Compliant, unless marked otherwise. These products comply with European Union Directive 2002/95/EC as amended 1 January 2006 that restricts the use of lead, mercury, cadmium, hexavalent chromium, PBB, and PBDE in

- Certified by Canadian Standards Association, File No. LR 7189 
- Produced under a Quality Management System certified to ISO 9001  A copy of the certificate is available upon request.
- Certain products meet VDE Standard 062 

### Six connector series for different interconnection requirements:

- Series 1—Standard density, signal and low-current applications using durable Multimatch contacts (.062 [1.57] pin diameter)
- Series 2—High density applications using Size 20 DM and 20 DF contacts (.040 [1.02] pin diameter)
- Series 3—Low density, power applications with Type XII contacts capable of carrying up to 35 amperes of current
- Series 4—Combination of standard and power density application with Type III+ and Type XII contacts
- Series 5—Power density application with Size 8 screw machined and precision formed contacts
- Series 6—Combination of standard and power density application with Type III+ and Size 8 contacts

certain electrical and electronic products sold into the EU as of 1 July 2006.

Note - For purposes of this Catalog, included within the definition of RoHS Compliant are products that are clearly "Out of Scope" of the RoHS Directive such as hand tools and other non-electrical accessories. Information regarding RoHS compliance is provided based on reasonable inquiry of our suppliers and represents our current actual knowledge based on the information provided by our suppliers. This information is subject to change. For latest compliance status, refer to our website referenced at right.

### MIL-C-5015 Style Circular Plastic Connectors (CPC)

#### Product Facts

- Intermateable with Metal-Shell sizes 20-14 and 18-10, MIL-C-5015 Style connectors
- High impact resistant plastic housing made of UL 94V-0 rated material
- Lightweight
- Lower cost than standard MIL-C-5015 connectors
- Industry accepted Type III+ pin and socket contacts, available on reels in strip form for high volume, low cost, automatic machine terminations, or in loose piece form for low volume, prototype or maintenance and repair
- Improved alignment (U.S. Standard MIL-C-5015 Connectors) prevents mismatching with other housing insert arrangements
- Recognized under the Component Program of Underwriters Laboratories Inc.,  File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189 

### Miniature CPC Connectors

#### Product Facts

- Compact, high contact density, environmentally sealed connectors
- Uses existing Mini-Universal MATE-N-LOK stamped and formed pin and socket contacts
- Two shell sizes—available in 1 to 4 and 5 to 9 position configurations

### Getting the Information You Need

Our comprehensive on-line RoHS Customer Support Center provides a forum to answer your questions and support your RoHS needs. A RoHS FAQ (Frequently Asked Questions) is available with links to more detailed information. You can also submit RoHS questions and receive a response within 24 hours during a normal work week. The Support Center also provides:

- Cross-Reference from Non-compliant to Compliant Products
- Ability to browse RoHS Compliant Products in our on-line catalog

- Downloadable Technical Data

- Customer Information Presentation

- More detailed information regarding the definitions used above

So whatever your questions when it comes to RoHS, we've got the answers at

[www.tycoelectronics.com/leadfree](http://www.tycoelectronics.com/leadfree)

## Connector Series and Types

### Series 1—Size 16 Contacts

Series 1 connectors permit the use of multiple combinations of signal and coaxial circuits in the same housing by accepting durable Multimate contacts. These pin and socket contacts include Type III+ and

subminiature coaxial contacts, interchangeable in the same Multimate contact cavity. Type III+ contacts (.062 [1.57] pin diameter) are capable of carrying a maximum of 13 amperes when crimped in wire.

Type III solder contacts and posted contacts for pc board applications are also available. Many connector arrangements offer both standard and reverse sex contact loading—**from 4 thru 37 positions.**

### Series 2—Size 20 Contacts

Series 2 connectors accept Size 20 DF (precision formed) and Size 20 DM (screw-machined) pin and socket contacts with a .040 [1.02] pin diameter. Size 20 DF contacts are available in crimp and solder versions, as well as a posted version

for wrap-type and pc board applications. Maximum current carrying capability is 7.5 amperes. Many connector arrangements offer both standard and reverse sex contact loading—**from 8 thru 63 positions.**

### Series 3—Power Contacts

Series 3 connectors accept Type XII power contacts which can carry up to 25 amps per contact. These contacts will accommodate a wire size range of 16 to

10 AWG [1.4 to 5 mm<sup>2</sup>]. Two connector sizes are available in both standard and reverse sex connector arrangements **3 and 7 positions.**

### Series 4—Combination Size 16 and Power Contacts

Series 4 connectors accept Size 16 Multimate and Type XII power contacts, combining the signal and coaxial circuit capabilities of Series 1 connectors with the

power circuit capabilities of Series 3 connectors. Available in two connector sizes offering power mixing combinations totaling **16 and 22 positions.**

**Connector Series and Types** (Continued)

**Series 5—Power Contacts  
.125 POWERBAND**

Series 5 connectors combine the revolutionary performance of the new AMP POWERBAND Contact, high current contact in configurations similar to the Series 3 connectors. AMP POWERBAND contacts offer the electrical

performance of the best Mil Spec Size 8 screw-machined contacts with the economy and productivity of strip-fed, precision formed contacts.

Series 5 connectors are environmentally sealable to meet IEC IP 65 and IP 67 specifications.

Rated at 600 VAC or VDC, 45 amperes maximum in a single contact, the connectors are available in free-hanging and panel-mount applications—**one connector configuration containing three .125 POWERBAND contacts.**

**Series 6—Combination,  
Size 16 and .125  
POWERBAND Contacts**

Series 6 combines the high current and environmental sealing capability of Series 5, POWERBAND contacts, and the reliability of signal carrying, low current Type III+ contacts.

This combination of power and signal contacts is offered in **one connector configuration containing two .125 POWERBAND contacts and eight Type III+ signal pin and socket contacts.**

**MIL-C-5015 Style—Size 16  
Contacts**

This new addition to the AMP Circular Plastic Connector Line is specifically designed to be **intermateable with Metal-Shell size 20-14 and 18-10, MIL-C-5015 Style connector systems.** The high impact resistant plastic housing offers the advantages of light weight

and lower cost than existing metal-shell connectors. In addition the connector design prevents mismatching when used with other insert arrangements. As part of the AMP Multimate family of connectors, the MIL-C-5015 style connector offers the

economies of crimp Type III+ pin and socket contacts in reel-mounted, strip-form for high volume automatic machine termination, as well as in loose piece-form for low volume, prototype or maintenance and repair.

**Metal-Shell, Circular  
Plastic Connectors**

Metal-Shell CPC connectors consist of a black thermoplastic insert in a nickel-plated, zinc alloy shell. These connectors are currently available in

**shell sizes 14, 22 and 28, and in two basic configurations consisting of plugs and square flange receptacles.**

**Miniature CPC Connectors**

These compact connectors accept existing Mini-Universal MATE-N-LOK pin and socket contacts, 30-18 AWG [.05-.8 mm<sup>2</sup>].

Two shell sizes (8 or 11) are available, accommodating **from 1 to 4 and 5 to 9 positions.**

Featuring high contact density and IP67 sealing, these durable connectors are well suited for many wire-to-wire, wire-to-board, and wire-to-panel applications.

## Performance Characteristics — CPC and Metal-Shell CPC Connectors

More information on the performance of AMP CPC and metal-shell CPC connectors is available by requesting the following AMP Product Specifications:

- 108-10024**—  
CPC Connectors
- 108-10037**—  
Type XII Contacts
- 108-10020**—  
Size 20 DM and 20 DF  
Contacts
- 108-10040**—  
Metal-Shell CPC  
Connectors
- 108-10042**—  
Type III+ Contacts
- 108-1579**—  
Sealed CPC Connectors  
with Removeable Contacts

Test Description	Procedure	Requirements
Maintenance Aging	Contacts removed and reinserted 10 times using applicable tools	No damage to contacts or housings. Contact retention maintained
Contact Retention	Axial load applied to contact to displace to the rear of the connector	Contacts remain in place when subjected to a minimum 10 lb. load*
Dielectric Withstanding Voltage (MIL-STD-1344, Method 3001)	Connectors subjected to 1500 volts rms at sea level	No breakdown or flashover
Thermal Shock	Connectors subjected to five cycles of temperature change (-55°C and +125°C)	No damage
Vibration (MIL-STD-202, Method 204, Test Condition B)	Connectors vibrated (wired and mated). Contacts wired in series with 100 milliamperes flowing during the test	No damage or loosening of parts. No interruption of electrical continuity longer than 10 microseconds
Physical Shock (MIL-STD-202, Method 213A, Test Condition A)	Connectors shocked 50 G (wired and mated). Contacts wired in series with 100 milliamperes flowing during the test	No damage or loosening of parts. No interruption of electrical continuity longer than 10 microseconds
Durability	Connectors mated and unmated 25 times with tin plated contacts and 500 times with gold plated contacts	No wear through damage to plating
Corrosion (Salt Spray) (MIL-STD-202, Method 101, Test Condition B)	Mated connectors subjected to 5% salt spray for 48 hours	No damage
Protection Against Solids	a. Test wire is pushed into mated connectors b. Mated connectors subjected to circulating talcum powder	a. Must not touch live parts b. No dust deposits observed on mating surfaces
Protection Against Water	Water is projected through jets against mated connector from any direction and then temporarily immersed in water	No water deposits shall be observed on mating surfaces of contacts or housings
Temperature Life	Mated connectors subjected to a temperature of +125°C for 200 hours	No damage
Insulation Resistance (MIL-STD-1344, Method 3003)	Measurement made between adjacent contacts with connector mated	5000 megohms minimum ambient temperature
Humidity (MIL-STD-202, Method 103, Test Condition B)	Mated connectors subjected to 10 days moisture test	Minimum insulation resistance of 100 megohms

\*For size 16 contacts. Size 8 contacts 25 lb. load, min.

## Levels of Protection for Electric Operating Material According to IEC 60529 and IEC 60947, Appendix C

**Environmentally Protected Circular Plastic Connectors, for Mated CPC Connectors Utilizing Peripheral Seals and either Wire Entry Seals (for Discrete Wire Applications) or Heat Shrink Boots (for Jacketed Cable Applications). Available are Various Sizes, Series 1, 5 and 6.**

### Internal Protection (IP)

#### Definition:

- **Per IEC 60947, Appendix C**—Pertains to low voltage switchgear and control gear.
- **Per IEC 60529**—Pertains to degrees of protection provided by enclosures (IP code).

#### Sample Designation:

(Where x is a numeral value), i.e. IP 65

## IP Codes

**IP**  
Index Letter

**X<sub>1</sub>**  
Degree of Protection  
against ingress of solid  
foreign objects

**X<sub>2</sub>**  
Degree of Protection  
against ingress of water

Degree of Protection, X <sub>1</sub>	Protection against ingress of solid foreign objects	Degree of Protection, X <sub>2</sub>	Protection against ingress of water
	No Protection	0	No Protection
1	Protection against objects >50mm diameter—including inadvertently touched by hands	1	Vertical Dripping—Protection against vertical drops of water
2	Protection against objects >12.5mm—including fingers	2	Dripping <15°—Protection against dripping water when the enclosure is tilted 15° from vertical
3	Protection against objects >2.5mm diameter including tools	3	Spraying at an angle up to 60° from vertical
4	Protection against objects >1.0mm diameter—including grains	4	Splashing—Protection against water splashed from any direction
5	Protection against ingress of solid foreign bodies	5	Jetting—Protection against water stream out of a nozzle, from any direction
6	Protection against ingress of dust	6	Powerful Jetting—Protection against temporary flooding due to powerful jet streams out of a nozzle from any direction
		7	Temporary immersion—Protection against temporary immersion

## Current Carrying Capabilities

The total current capacity of each contact in a given connector is dependent upon the heat rise resulting from the combination of electrical loads of the contacts in the connector arrangement and the maximum ambient temperature in which the connector will be operating. Caution must be taken so that this combination of conditions does not cause the internal temperature of the connector to exceed the maximum operating temperature of the housing material. Several variables which must be considered when determining this maximum current capability for your application are:

■ **Wire Size**—Larger wire will carry more current since it has less internal resistance to current flow and generates less heat. The wire also conducts heat away from the connector.

■ **Connector Size**—In general, with more circuits in a connector, less current per contact can be carried.

■ **Current Load Distribution**—Spreading those lines with greater current loads throughout the connector, particularly around the outer perimeter, will enhance heat dissipation.

■ **Ambient Temperature**—With higher ambient temperatures, less current can be carried.

### Current Rating Verification Can a contact rated at 10 amps carry 10 amps?

Maybe yes, but probably not. The reason lies in the test conditions used to rate the contact. If these conditions do not adequately reflect the application conditions, the actual allowable current levels may be lower than specified levels. For example, many manufacturers, including Tyco Electronics, test a single contact in air. This gives an accurate measure of the basic current-carrying capacity of the contact. Use the contact alone in air and it can certainly carry 10 amperes. Use it in a multi-position connector surrounded by other current-carrying contacts or in high ambient temperatures, and the contact should carry less current.

Similarly, as the contact ages and stress relaxation, environmental cycling, and other degradation factors take their toll, the contact's current-carrying capacity decreases. A prudent design must set current levels for such end-of-

design-life (EODL) conditions. Practical current-carrying capacity is not an absolute, but an application-dependent condition.

#### New Method Simplifies Ratings

To help the designer set the appropriate current level, Tyco Electronics has developed a method of specifying current-carrying capacity. This method takes into account the various application factors that influence current rating.

#### The method can be summarized as follows:

- The contact is aged to EODL conditions by durability cycling, thermal cycling, and environmental exposure.
- The contact's resistance stability is verified.
- The current necessary to produce the specified temperature rise is measured. This T-rise is usually 30°C.
- A rating factor is determined to allow derating of multiple contacts in the same housing and for different conductor sizes.

#### Temperature

One other factor influencing current levels is the maximum operating temperature, for example, 105°C. If the application has a high ambient temperature (over 75°C) the contact's T-rise is limited by the maximum operating temperature. For example, an application temperature of 90°C limits the contact T-rise to 15°C. Since current produces heat (the I<sup>2</sup>R law), the current must be lowered to limit the T-rise.

A contact's T-rise depends not only on its I<sup>2</sup>R Joule heating, but also on its ability to dissipate the heat. Consider a contact in a multi-contact housing. Joule heating in multiple contacts will raise the local ambient temperature. Since the contact will not be able to dissipate its own heat as well by convection, the maximum T-rise will be realized at a lower current level. Consequently, the allowable current level must be lower to maintain an acceptable T-rise.

For a given connector, the current level will be set by the

loading density. A connector containing 50% current-carrying contacts will permit higher currents (per contact) than a connector will at 75% loading. The loading percentage assumes an even distribution of contacts within the housing. If all 10 contacts are grouped together in one section of a 20-position connector, the loading density may approach 100%.

#### The Importance of EODL

As stated, T-rise in a contact depends on both resistance and current. As it ages, a contact's resistance will increase. The contact designer will specify a maximum resistance for the contact, this level is the end-of-design-life resistance. Before the contact is tested for current, Tyco Electronics subjects it to a sequence of tests that exercises the major failure mechanisms and thereby simulates EODL conditions. Conditioning includes mating cycling, industrial mixed-flowing gases, humidity and temperature cycling, and vibration to sequentially introduce wear, corrosion, stress relaxation, and mechanical disturbance.

**Presentation — An Example\***

**Current Rating**

The presentation of current-carrying capacity in AMP product specifications includes two parts:

- First, a base curve showing current levels versus T-rise for a single circuit and the largest wire size (See figure 1). This represents the maximum current capacity of the contact. The curve is usually flat up to 75°C ambient and then drops off. Up to 75°C, the 30°C T-rise limits the amount of current, and above 75°C the current must be reduced to keep the combination of ambient temperature and T-rise from exceeding the maximum operating temperature of 105°C.
- Next are rating factors, a table of multipliers to account for connector loading and for smaller wire sizes (See figure 2). The designer first determines the base current for the ambient conditions of the application; then multiplies this base current by the rating factors to find the current level for the application's loading factor and wire size.

**Practical Values**

The current-rating method gives designers practical values applicable to their applications. While the specified current levels for a contact may be lower than for other testing methods, they are more practical and simplify the system design process.

"Spec-manship" is replaced by a realistic assessment of the current-carrying capacity of a contact under varying conditions of temperature, connector loading, and wire size.

Specific current-carrying data based on EOL and % loading is available from Tyco Electronics. Please contact your local Tyco Electronics Sales Engineer or call Tyco Electronics.

**Connector/Contact Acceptability**

As previously stated, choosing the correct connector/contact combination is fundamental to the successful function of all connectors. The Selector Chart shown at right, is designed to simplify your choice

of connectors and their acceptable contacts. Once you have selected the wire size, current-carrying capacity need, number of positions required, and the type of contacts needed in your choice of connector, refer to this matrix for a quick look at exactly what is acceptable in a given connector type.

**\*Note:** Data is *not* typical of a specific CPC connector configuration. For specific current rating information based on % connector loading, contact Tyco Electronics.

To demonstrate the method of specifying current, consider the following application conditions; an ambient temperature of 65°C, a 50% loading of contacts in the housing, and 20 AWG [0.6mm<sup>2</sup>] wire.

- From Figure 1, the base current rating is 14 ampere with 18 AWG [0.8mm<sup>2</sup>] wire.
- Figure 2, the rating factor for 50% loading and 20 AWG [0.6mm<sup>2</sup>] wire is 0.68.
- The specific rating for this application is the product of the base rating and the rating factor:  
 $14 \times 0.68 = 9.5$  ampere
- Each of the contacts can carry 9.5 ampere.
- However, if the ambient temperature is 80°C the allowable T-rise becomes 25°C. The base current must be lowered to 12.8 ampere so that the 105°C maximum operating temperature is not exceeded. The current rating then becomes:  
 $12.8 \times 0.68 = 8.7$  ampere.

Graph shows the relationship between base current, ambient temperature, and contact T-rise.

Rating factors allow the base current to be adjusted for various connector loading and wire sizes.

## Circular Plastic Connectors, Series 1, VDE Tested

**CPC Connectors, Series 1, for Cable or Panel Mount**  
(Accepts Type III+, High-Current Power, Type II and Subminiature Coax Contacts)

- Designed to meet requirements of VDE as shown in DIN Specification 57627
- Recognized under the Component Program of Underwriters Laboratories Inc. for 600 VAC and 600 VDC service, File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

Listed part numbers are for connectors only; **contacts must be ordered separately.**

### Material

**Housing**—Thermoplastic, 94V-0 rated, black

### Related Product Data

### Replacement Coupling Rings

Shell Size	Part No.
13	213813-1
17	213810-1
23	213812-1

### Keying

- A**—Standard Configuration: 5 Keys
- B**—Optional Configuration: 4 Keys

### Square Flange Receptacle

### Free-Hanging Receptacle

**\*Note:**  
See page 25 for callout dimensions

### Plug

### Standard Sex Connectors (Receptacles accept pin contacts, Plugs accept socket contacts)

Arrangement	Shell Size	No. of Positions	Keying	Square Flange Receptacle		Plug
				With Threaded Inserts <sup>1</sup>	With Mounting Holes	
13-7			A	211401-4	211401-1	211399-1
			A	211767-2	211767-1	211766-1
17-9			A	211771-2	211771-1	211770-2
			B	—	213870-1	213853-1

<sup>1</sup>Four 4-40 threaded inserts per receptacle.

### Reverse Sex Connectors (Receptacles accept socket contacts, Plugs accept pin contacts)

Arrangement	Shell Size	No. of Positions	Keying	Square Flange Receptacle		Free-Hanging Receptacle	Plug
				With Threaded Inserts <sup>1</sup>	With Mounting Holes		
13-7			A	211398-4	211398-1	211398-2	211400-1
			A	—	211769-1	211769-3	211768-1
17-9			B	—	796439-2	—	796450-1
			A	—	211773-1	—	211772-1
23-19			B	—	213868-1	—	213852-1

<sup>1</sup>Four 4-40 threaded inserts per receptacle.

Key Style "A" is the Standard 5 Locating Key arrangement. Key Style "B" is the 4 Locating Key arrangement.

**Square Flange Receptacles, Printed Circuit Board Mount**  
with .025 [0.64] sq. solder tails

**Material and Finish**

**Housing**—Thermoplastic, 94V-0 rated, black

**Contacts**—

**A**—Duplex plated gold flash on entire contact with .000030 [0.00076] min. gold on contact engagement area, tin on the termination area

**C**—Plated tin on the entire contact, tin on the termination area

**Related Product Data**

**Contact Arrangement**—Page 24

**Performance Characteristics**—Page 6

**Technical Documents**—Page 80

**Keying**

Molded-in keying in two configurations:

**A**—Standard Configuration: 5 Keys

**B**—Optional Configuration: 4 Keys to prevent mismatching of standard and reverse sex.

**Other Available Posted Contacts**

Tyco Electronics can make available contacts with various solder tail lengths for loading into the standard or reverse sex, square flange receptacles for applications requiring custom solder tail lengths.

**Standard Sex (Posted Pin Contacts)**

\*\*\*Call Technical Support for Automatic Machine Applicator Part Numbers.

**Extraction Tool Part No. 539972-1.**

**High Current Power Contact—Size 16**

The features of the High Current Size 16 contact have been designed to retrofit into the existing AMP Connectors such as CPC (Circular Plastic Connector), CMC (Circular Metal Connector), G Series, M Series, Metrimate Square Grid and Drawer Connector housings. An initial T-Rise test in free air has shown a 23 amp capability with a 30° T-Rise. The contact may be crimped onto 14 AWG wire with an AMP hand tool **Part No. 601967-1**. Use turret TH502 **(1-601967-6)** for the pin and turret TH501 **(1-601967-5)** for the socket.

## Signal Contacts

### Size 20 DF, Precision Formed, Crimp Contacts

**Contact Size**—20

**Pin Diameter**—.040 [1.02]

**\*Test Current**—7.5 ampere  
(Single contact, free-air test current; not to be construed as contact rating current. Use only for testing.)

**\*Note:** Total current capacity of each contact in any given connector is dependent on the heat rise resulting from the combination of electrical loads of all contacts in the connector arrangement and the maximum ambient temperature in which the connector will be operating. See page 8.

### Material

**Pin Body**—Brass

**Socket**—Phosphor bronze

### Contact Finish

**A**—Select gold flash over nickel on entire contact, with additional .000030 [0.00076] gold on mating end

**B**—Duplex plated .000030 [0.00076] gold on mating end, tin on termination end, with entire contact nickel underplated

**C**—Gold flash over nickel on entire contact

**D**—Duplex plated gold flash on mating end, tin on termination end, with entire contact nickel underplated

<sup>1</sup>Wire strip length—.281 [7.14].

<sup>2</sup>Ground contact.

<sup>3</sup>Die insert Part No. 90145-2 is for crimping 16 AWG [1.25-1.4 mm<sup>2</sup>] wire.

<sup>4</sup>Die insert Part No. 90145-1 is for crimping 14-12 AWG [2-3 mm<sup>2</sup>] wire.

<sup>5</sup>Recommended for high current/vibration applications where fretting corrosion is a problem.

<sup>7</sup>Die Set requires "C" Head Adapter Part No. 318161-1; Adapter Holder Part No. 356304-1 (with ratchet) or 189928-1 (without); and Power Unit Part No. 189721-2 (hand actuated) or 189722-2 (foot actuated).

Extraction Tool No. 91019-3.

\*\*\*Call Technical Support for Automatic Machine Applicator Part Numbers.

**Power Contacts, Series 3** (Continued)

**High Current Type XII Crimp Contacts**

The Multimate features of the High Current Type XII contact have been designed to fit into the existing AMP Connectors such as CPC (Circular Plastic Connector), CMC (Circular Plastic Metal-Shell Connector), G Series, M Series, and CMPC (Circular Multipin Connector) housings. An initial T-Rise test in free air has shown a 60 amp capability with a 30° T-Rise with 8 gage wires. The contact may be crimped onto 8 AWG wire with a Daniels Hand Tool M310 or AMP P/N 356114-1 and Positioner TP1068 or AMP P/N 356119-1.

**Current-Carrying Capacity**

The graph shows current-carrying capacity versus temperature rise for a fully energized 3 position CPC plug P/N 206037-2 and receptacle P/N 206036-2. These initial representative amperage ratings were conducted with 8 AWG wires that were 3 feet long.

  4. Replacement screws are available in the following sizes: 3/8 in. [9.52]—**5019024-1**, 1/2 in. [12.7]—**5019024-2**, 5/8 in. [15.88]—**5019024-3**, 1 in. [25.4]—**5019024-4**, 3/4 in. [19.05]—**5019024-5**.
  5. Cable clamp inserts not sold separately.

For additional information concerning cable clamps, refer to Instruction Sheet 408-7582.

**Note:** All part numbers are RoHS Compliant.

**CPC Connector Accessories (Continued)**

**Self-Centering Cable Clamp (for Shell Size 23)**

The self-centering cable clamp is used in applications where strain relief protection is required and the cable or wire bundle is large and/or stiff.

**Material**

Black thermoplastic, UL 94V-0 rated

**Part Numbers**

207774-3 (individually packaged)

207774-4 (bulk packaged)

- Notes:**
1. Clamping area is adjustable by inverting clamping inserts; maximum cable diameter is 1.125 [28.58].
  2. Components for cable clamp are packaged unassembled. This includes the cable clamp, two screws (1.00 [25.4]) and the clamping inserts.
  3. Cable clamp can be threaded directly onto plugs or receptacles, or onto back-shell extenders (page 40).

**Right-Angle Cable Clamps**

Right-angle cable clamps are used in tight areas where typical 180° cable clamp strain reliefs will not fit.

**Material**

Black thermoplastic, UL 94V-0 rated

## One-Piece Sealed Circular Plastic Connectors

### Product Facts

- Economical environmentally sealed connector designed for industrial applications
- Meets major Industrial Standards
- High strength, impact resistant thermoplastic housing, rated UL 94V-0
- Contains wire entry and peripheral seals
- AMP POWERBAND precision formed power contact (Series 5 and 6)
- Type III+ precision formed signal/low current contacts (Series 1 and Series 6)
- Other configurations in Series 1 can be made available, contact your local Tyco Electronics Sales Engineer or Tyco Electronics, Harrisburg, PA

The new Sealed One-Piece Circular Plastic Connectors are the latest product innovation to the sealed CPC product family. This design allows for easy assembly. The housing and the seal are attached. A newly designed wire entry seal protects the rear of the connector and a peripheral seal protects the connector interface. Simply crimp the contact onto a wire and insert the crimped wire contact through the seal and into the housing cavity. The connector loads the same as if the seal wasn't there. All connector cavities come in a sealed condition. No plugs are required if you do not use a position cavity. We have the

capability to provide this product sealing to you in all the shell sizes. If you don't see your particular size configuration, contact your local Tyco Electronics Sales Engineer or call Tyco Electronics for the latest information.

### Industry Standards

#### One-Piece Sealed CPC products meet –

- IP 67 (Temporary immersion)

Fluid Protection Against – diesel fuel, gear and engine lubricants, gasoline, anti-freeze, hydraulic fluid, water, salt sprays, etc.

### Performance Characteristics

meets the same performance characteristics as shown on page 6.

**Operating Temperature Range**—  
-50°C to +125°C [-58°F to +257°F]

#### UL Voltage Rating—

- Series 1 600 V (AC or DC)
- Series 6 250 V (AC or DC)

.125 POWERBAND Power Contact –  
45 amps, single contact  
rating at 30°C T-Rise

Type III+ Contacts –

- 13 amps, single contact  
rating at 30°C T-Rise

#### Flammability Rating—

UL 94V-0 rated

#### Sealing Capability—

Per IP 67

#### Housing Material—

High strength, impact  
resistant thermoplastic

#### Fluid Resistance—

Diesel fuel, gear and engine lubricants,  
gasoline, anti-freeze, hydraulic fluid,  
water

**Note:** All part numbers are RoHS Compliant.

## Two-Piece Sealed Circular Plastic Connectors

### Product Facts

- Economical environmentally sealed connector designed for industrial applications
- Meets major Industrial Standards
- High strength, impact resistant thermoplastic housing, rated UL 94V-0
- Contains wire entry, peripheral, and full interfacial seals
- AMP POWERBAND precision formed power contact (Series 5 and 6)
- Type III+ precision formed signal/low current contacts (Series 6)
- Other configurations in Series 1 can be made available, contact your local Tyco Electronics Sales Engineer or Tyco Electronics, Harrisburg, PA

### Technical Documents

#### Instruction Sheet

408-4317 Two-Piece Sealed CPC Connectors

#### Product Specification

108-1579 Sealed CPC Connectors with Removable Contacts

Sealed CPC connectors are the latest additions to the growing family of AMP Circular Plastic Connectors. Sealed CPC connectors were developed as part of the Series 5 and 6 product line, specifically to meet the increasing demand for an economical environmentally sealed connector.

Sealed CPC connectors are designed to meet the requirements of UL, CSA, and VDE for environmentally sealed connectors used in industrial applications.

In addition, sealed CPC connectors are designed to meet the latest SAE and ASAE requirements as outlined in the standards listed here.

Sealed CPC connectors incorporated the latest technology in thermoplastic design and use the new AMP POWERBAND precision formed high current contact.

Illustrated above are the Series 5 (power) and Series 6

(power/signal mix) sealed connector configurations. Other sizes are available in a Series 1 (signal/low current) configuration. Contact your local Tyco Electronics Sales Engineer, or call Tyco Electronics for the latest design information.

### Industry Standards

#### Two-Piece Sealed CPC connectors meet—

- IP65

### Performance Characteristics

**Operating Temperature Range—**  
-50°C to +125°C [-58°F to +257°F]

#### UL Voltage Rating—

Series 5 600 V (AC or DC)  
Series 6 250 V (AC or DC)  
.125 POWERBAND Power Contact –  
45 amps, single contact  
rating at 30°C T-Rise  
Type III+ Contacts –  
13 amps, single contact  
rating at 30°C T-Rise

**Flammability Rating—**  
UL 94V-0 rated

**Sealing Capability—**  
Per IP 65

**Housing Material—**  
High strength, impact  
resistant thermoplastic

**Fluid Resistance—**  
Diesel fuel, gear and engine lubricants,  
gasoline, anti-freeze, hydraulic fluid,  
water

**Note:** All part numbers  
are RoHS Compliant.

(Instruction Sheet 408-4374)

See pages 17-23 for complete product information and part numbers of Size 16 contacts applicable in Sealed CPC Connectors.

### Material and Finish

**Contacts**—Copper with beryllium copper spring

#### Plating Code

**A** — Post plated .000200 [0.00508] min. silver in mating area with .000050 [0.00127] min. silver on remainder of contact, all over .000050 [0.00127] min. nickel

**B** — Post plated .000030 [0.00076] min. gold in mating area with gold flash on remainder of contact, all over .000050 [0.00127] min. nickel

**.125 POWERBAND**  
Pin Contact

**.125 POWERBAND**  
Socket Contact

### Related Product Data

<sup>†</sup>For use in One-Piece or Two-Piece Sealed Circular Plastic Connectors (CPC), Series 5 and 6.

‡Single contact, free-air test current; not to be construed as contact rating current. Use only for testing.

Refer to contact current carrying capability information, page 8.

**Note:** Standard Size 8, High Current Upgrade Size 8, and .125 POWERBAND contacts are **not** interchangeable.

\*A typical 626 Pneumatic Tool System requires: a power unit (**Part No. 189721-2**, hand actuated or **189722-2**, foot actuated), an adapter holder (**Part No. 356304-1**, with ratchet), and "C" Head adapter **Part No. 318161-1**.

Specifically designed for AMP CPC Connectors, Series 5 and 6, the new .125 POWERBAND contact offers the performance of a

MIL-Spec screw machined Size 8 contact with the economy of a stamped and formed, strip-feed contact. Strip-feed contacts

offer maximum production capabilities using standard AMP bench-mount, semi-automatic termination equipment. For low volume,

prototype or maintenance and repair requirements, the .125 POWERBAND contact is available in loose piece form.

**Note:** All part numbers are RoHS Compliant.

**Two-Piece Sealed Circular Plastic Connectors, Series 5**

**CPC Connectors, Series 5 Sealed – Reverse Sex**

Listed part numbers are for connectors only; **contacts must be ordered separately.**

**Material**

**Housing**—Nylon, glass-filled UL rated 94V-0, black
