

# TPD13S523 13-Channel ESD Protection Solution With Current-Limit Load Switch For HDMI Transmitter Ports

## 1 Features

- IEC 61000-4-2 Level 4 Contact ESD Protection
  - $\pm 12$ -kV Contact Discharge on External Lines
- Single-Chip ESD Solution for HDMI 1.4 and HDMI 1.3 Interface
- On-Chip 5-V Load Switch With Current Limit and Reverse Current Protection
- Supports UTILITY Line Protection for HDMI 1.4 Audio Return Line
- $< 0.05$ -pF Differential Capacitance Between the TMDS Signal Pair
- Industry Standard 16-TSSOP and Space-Saving 16-RSV Package
- Supports Data Rates in Excess of 3.4 Gbps
- $R_{DYN} = 0.5 \Omega$  (Typical)
- Commercial Temperature Range:  $-40^{\circ}\text{C}$  to  $85^{\circ}\text{C}$

## 2 Applications

- End Equipment
  - Set Top Boxes
  - E-Books
  - Tablets
  - Smart Phones
  - Camcorders
- Interfaces
  - HDMI

## 3 Description

The TPD13S523 device is a single-chip integrated IEC 61000-4-2 ESD protection solution for HDMI 1.4 or HDMI 1.3 interfaces. This device offers 13 channels of TVS diodes with flow-through pin mapping that matches HDMI connector high-speed lines. While providing ESD protection, the TPD13S523 adds little to no additional distortion to the high-speed differential signals. The monolithic integrated circuit technology ensures that there is excellent matching between the two-signal pair of the differential line ( $< 0.05$ -pF differential matching between TMDS lines). This offers an advantage over discrete ESD solutions where variations between two different ESD protection circuits may significantly degrade the differential signal quality.

The TPD13S523 incorporates an on-chip current limited load switch that is compliant with HDMI 5-V out electrical specifications. The short-circuit protection at 5V\_OUT ensures that the device is not damaged in case there is an accidental short to GND. The load switch also incorporates a reverse-current blocking feature which ensures that the HDMI driver side is not erroneously turned on when two HDMI drivers are connected together.

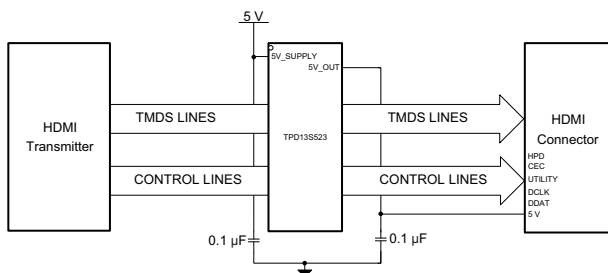

Typical applications for the TPD13S523 include set top boxes (STB), e-books, tablets, smart phones, and camcorders.

### Device Information<sup>(1)</sup>

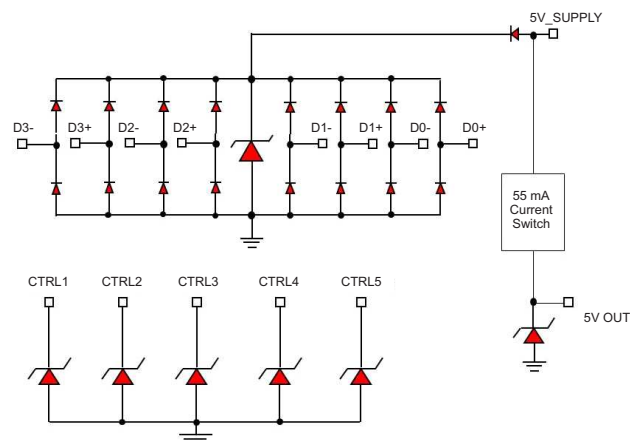

PART NUMBER	PACKAGE	BODY SIZE (NOM)
TPD13S523	TSSOP (16)	5.00 mm x 4.40 mm
	UQFN (16)	2.60 mm x 1.80 mm

## 4 Revision History

NOTE: Page numbers for previous revisions may differ from page numbers in the current version.

### Changes from Revision C (June 2015) to Revision D Page

- Added table note to [Absolute Maximum Ratings](#) .....
- Added test condition frequency to capacitance .....

### Changes from Revision B (December 2012) to Revision C Page

- Added *ESD Ratings* table, *Feature Description* section, *Device Functional Modes*, *Application and Implementation* section, *Power Supply Recommendations* section, *Layout* section, *Device and Documentation Support* section, and *Mechanical, Packaging, and Orderable Information* section .....

### Changes from Revision A (May 2012) to Revision B Page

- Added RSV package to ORDERING INFORMATION table .....
- Removed PREVIEW status from RSV package .....

## 5 Pin Configuration and Functions

All the CTRLx pins have the same ESD circuit and are interchangeable.

All the CTRLx pins have the same ESD circuit and are interchangeable.

### Pin Functions

PIN			I/O	DESCRIPTION
NAME	UQFN	TSSOP		
CTRL1	15	1	I/O	ESD Clamp for Control Lines: provides ESD protection to HDMI control lines: CEC, SCL, SDA, HPD, and UTILITY. All the control pins have the same ESD circuit and are interchangeable. <sup>(1)</sup>
CTRL2	16	2	I/O	ESD Clamp for Control Lines: provides ESD protection to HDMI control lines: CEC, SCL, SDA, HPD, and UTILITY. All the control pins have the same ESD circuit and are interchangeable. <sup>(1)</sup>
CTRL3	1	3	I/O	ESD Clamp for Control Lines: provides ESD protection to HDMI control lines: CEC, SCL, SDA, HPD, and UTILITY. All the control pins have the same ESD circuit and are interchangeable. <sup>(1)</sup>
CTRL4	2	4	I/O	ESD Clamp for Control Lines: provides ESD protection to HDMI control lines: CEC, SCL, SDA, HPD, and UTILITY. All the control pins have the same ESD circuit and are interchangeable. <sup>(1)</sup>
CTRL5	5	7	I/O	ESD Clamp for Control Lines: provides ESD protection to HDMI control lines: CEC, SCL, SDA, HPD, and UTILITY. All the control pins have the same ESD circuit and are interchangeable. <sup>(1)</sup>
5V_SUPPLY	3	5	I	<b>Supply Pin for HDMI 5V_OUT</b> 5 V, connects to internal VCC plane on the PCB board; connect a 0.1 to 1- $\mu$ F capacitor shunt to ground.
5V_OUT	4	6	O	<b>Current Limited HDMI 5V_OUT:</b> connect to HDMI 5V_OUT; offers IEC61000-4-2 ESD protection; connect a 0.1 to 1- $\mu$ F capacitor shunt to ground.
GND	6	8	G	Ground
D0+	14	16	I/O	High-speed ESD Clamp: provides ESD protection for TMDS lines. <sup>(1)</sup>
D0-	13	15	I/O	High-speed ESD Clamp: provides ESD protection for TMDS lines. <sup>(1)</sup>
D1+	12	14	I/O	High-speed ESD Clamp: provides ESD protection for TMDS lines. <sup>(1)</sup>
D1-	11	13	I/O	High-speed ESD Clamp: provides ESD protection for TMDS lines. <sup>(1)</sup>
D2+	10	12	I/O	High-speed ESD Clamp: provides ESD protection for TMDS lines. <sup>(1)</sup>
D2-	9	11	I/O	High-speed ESD Clamp: provides ESD protection for TMDS lines. <sup>(1)</sup>
D3+	8	10	I/O	High-speed ESD Clamp: provides ESD protection for TMDS lines. <sup>(1)</sup>
D3-	7	9	I/O	High-speed ESD Clamp: provides ESD protection for TMDS lines. <sup>(1)</sup>

(1) Connector pins are Dx+, Dx-, CTRLx, and 5V\_OUT

## 6 Specifications

### 6.1 Absolute Maximum Ratings

T<sub>A</sub> = -40°C to 85°C <sup>(1)</sup>

		MIN	MAX	UNIT
V <sub>CC</sub> voltage tolerance	5V_SUPPLY	-0.3	6	V
IO voltage tolerance	Connector pins <sup>(2)</sup>	-0.3	6	V
IEC 61000-4-5 peak current (8/20 μs)	Connector pins <sup>(2)</sup>		3	A
IEC 61000-4-5 peak power (8/20 μs)	Connector pins <sup>(2)</sup>		30	W
Storage temperature, T <sub>stg</sub>		-65	125	°C

- (1) Stresses beyond those listed under *Absolute Maximum Ratings* may cause permanent damage to the device. These are stress ratings only, which do not imply functional operation of the device at these or any other conditions beyond those indicated under *Recommended Operating Conditions*. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- (2) Connector pins are Dx+, Dx-, CTRLx, and 5V\_OUT

### 6.2 ESD Ratings

		VALUE	UNIT
V <sub>(ESD)</sub> Electrostatic discharge	Human body model (HBM), per ANSI/ESDA/JEDEC JS-001 <sup>(1)</sup>	±2000	V
	Charged device model (CDM), per JEDEC specification JESD22-C101 <sup>(2)</sup>	±500	
	IEC 61000-4-2 Contact Discharge	±12000	
	IEC 61000-4-2 Air-gap Discharge	±14000	

- (1) JEDEC document JEP155 states that 500-V HBM allows safe manufacturing with a standard ESD control process.
- (2) JEDEC document JEP157 states that 250-V CDM allows safe manufacturing with a standard ESD control process.

### 6.3 Recommended Operating Conditions

T<sub>A</sub> = -40°C to 85°C

		MIN	MAX	UNIT
VCC Voltage	5V_SUPPLY	4.5	5.5	V
IO voltage at external signal pins	Signal Pins <sup>(1)</sup>	-0.3	5.5	V
Operating free-air temperature		-40	85	°C

- (1) External Signal pins are Dx+, Dx-, CTRLx, and 5V\_OUT

### 6.4 Thermal Information

THERMAL METRIC <sup>(1)</sup>		TPD13S523		UNIT
		PW [TSSOP]	RSV [UQFN]	
		16 PINS	16 PINS	
R <sub>θJA</sub>	Junction-to-ambient thermal resistance	119.9	153.2	°C/W
R <sub>θJC(top)</sub>	Junction-to-case (top) thermal resistance	54.5	70.9	°C/W
R <sub>θJB</sub>	Junction-to-board thermal resistance	65.0	74.7	°C/W
Ψ <sub>JT</sub>	Junction-to-top characterization parameter	9.7	2.9	°C/W
Ψ <sub>JB</sub>	Junction-to-board characterization parameter	n/a	74.7	°C/W
R <sub>θJC(bot)</sub>	Junction-to-case (bottom) thermal resistance	n/a	n/a	°C/W

- (1) For more information about traditional and new thermal metrics, see the *Semiconductor and IC Package Thermal Metrics* application report, [SPRA953](#).

## 6.5 Electrical Characteristics

 $T_A = -40^{\circ}\text{C}$  to  $85^{\circ}\text{C}$  (unless otherwise noted)

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
<b>LOAD SWITCH</b>						
$I_{CC}$	Supply current at 5V_SUPPLY	5V_SUPPLY = 5V, 5V_OUT = Open	6.5	7	10	$\mu\text{A}$
$I_{SC}$	Short-circuit current at 5V_OUT	5V_SUPPLY = 5V, 5V_OUT = GND	100	116	147	mA
$I_{BACKDRIVE}$	Reverse leakage current at 5VOUT	5V_SUPPLY = 0V, 5V_OUT = 5 V		0.01	0.69	$\mu\text{A}$
$V_{DROP}$	5V_OUT output voltage drop	5V_SUPPLY = 5V, $I_{5V\_OUT} = 55$ mA		170	205	mV
<b>CONNECTOR PINS</b>						
$V_{RWM}$	Reverse stand-off voltage				5.5	V
$V_{CLAMP}$	Clamp voltage with ESD strike	$I_{pp} = 1$ A, 8/20 $\mu\text{s}$ <sup>(1)</sup>			13	V
		$I_{pp} = 3$ A, 8/20 $\mu\text{s}$ <sup>(1)</sup>			15	
$I_{IO}$	Leakage current through external signal pins <sup>(2)</sup>	5V_SUPPLY = 5V, $V_{IO} = 5$ V	2	7	65	nA
$I_{OFF}$	Current from IO Port to supply pins when powered down through signal pins <sup>(3)</sup>	5V_SUPPLY = 0 V, $V_{IO} = 2.5$ V	1	5	44	nA
$V_F$	Diode forward voltage through external signal pins <sup>(2)</sup> ; lower clamp diode	$I_D = 8$ mA	0.7	0.85	0.95	V
$R_{DYN}$	Dynamic resistance of ESD clamps external pins <sup>(3)</sup>	Pin to ground <sup>(2)</sup>		0.5		$\Omega$
$C_{IO\_TMDS}$	IO capacitance Dx+, Dx- pins to GND	5V_SUPPLY = 5 V, $V_{IO} = 2.5$ V; $f = 1$ MHz		1		pF
$\Delta C_{IO\_TMDS}$	Differential capacitance for the Dx+, Dx- lines	5V_SUPPLY = 5 V, $V_{IO} = 2.5$ V; $f = 1$ MHz		0.05		pF
$C_{IO\_CONTROL}$	CTRLx pin capacitance	5V_SUPPLY = 5 V, $V_{IO} = 2.5$ V; $f = 1$ MHz		1		pF
$V_{BR}$	Break-down voltage through signal pins <sup>(3)</sup>	$I_{IO} = 1$ mA	6			V

(1) Non-repetitive current pulse of an 8/20  $\mu\text{s}$  exponentially decaying waveform according to IEC 61000-4-5.

(2) Extraction of  $R_{DYN}$  using least squares fit of TLP characteristics between  $I=1\text{A}$  AND  $I=10\text{A}$ .

(3) Signal pins are Dx+, Dx-, and CTRLx.

## 7 Detailed Description

### 7.1 Overview

The TPD13S523 device is a single-chip ESD solution for the HDMI transmitter port. By providing system-level ESD protection for a full HDMI port, the TPD13S523 can protect the core IC from ESD strikes and absorb the associated energy.

While providing the ESD protection, the TPD13S523 adds little-to-no signal distortion to the high-speed differential signals. In addition, the monolithic integrated circuit technology ensures that there is excellent matching between the two-signal pair of the differential line.

The TPD13S523 also provides an on-chip regulator with current output ratings of 55 mA at pin 38. This current enables HDMI receiver detection even when the receiver device is powered off.

### 7.2 Functional Block Diagram

**Figure 10. Electrical Equivalent Circuit Diagrams**

### 7.3 Feature Description

#### 7.3.1 IEC 61000-4-2 Protection

The connector-facing I/O pins can withstand ESD events up to  $\pm 12$ -kV contact and  $\pm 14$ -kV air. An ESD clamp diverts the current to ground.

#### 7.3.2 Single-Chip ESD Solution

The TPD13S523 provides a complete ESD protection scheme for an HDMI 1.4 compliant port. No additional components are required for ESD protection and current-limiting besides this device.

## Feature Description (continued)

### 7.3.3 On-Chip 5-V Load Switch

The TPD13S523 provides an on-chip regulator with a current output rating of 55-mA. This regulator also prevents reverse current flow from occurring, in compliance with the HDMI 5-V supply specification.

### 7.3.4 Supports UTILITY Line Protection

This device provides protection for all control lines in HDMI, including the UTILITY pin.

### 7.3.5 < 0.05-pF Differential Capacitance Between TMDS Pairs

The TPD13S523 has a very low capacitance variation (< 0.05 pF) between different TMDS ESD clamps. This provides excellent matching and does not degrade differential signal quality.

### 7.3.6 Industry Standard Package and Space-Saving Package

The TPD13S523 is offered in 2 different packages. A 16-pin industry standard TSSOP package is provided for ease of routing and easy layout. A 16-pin UQFN (RSV) is provided where small size is needed in the application.

### 7.3.7 Supports Data Rates in Excess of 3.4 Gbps

The TMDS ESD clamps have a very low capacitance that is capable of supporting HDMI data rates exceeding 3.4 Gbps.

### 7.3.8 $R_{DYN} = 0.5 \Omega$

The TMDS ESD clamps have a very low  $R_{DYN}$  of 0.5 $\Omega$  (typ) which provides excellent ESD protection clamping characteristics for the upstream core transmitter.

### 7.3.9 Commercial Temperature Range

The TPD13S523 is rated to operate from -40°C to 85°C.

## 7.4 Device Functional Modes

TPD13S523 is active with the conditions in the [Recommended Operating Conditions](#) met. Each connector side pin has an ESD clamp that triggers when voltages are greater than  $V_{BR}$  or less than the lower diode's  $V_f$ . During ESD events, voltages as high as  $\pm 12$ -kV contact ESD can be directed to ground through the internal diode network. Once the voltages on the protected line fall below these trigger levels (usually within 10's of nano-seconds), these pins revert to a nonconductive state.

## 8 Application and Implementation

### NOTE

Information in the following applications sections is not part of the TI component specification, and TI does not warrant its accuracy or completeness. TI's customers are responsible for determining suitability of components for their purposes. Customers should validate and test their design implementation to confirm system functionality.

### 8.1 Application Information

The TPD13S523 provides IEC 61000-4-2 Level 4 Contact ESD protection for an HDMI 1.4 transmitter port. An integrated current limit switch ensures compliance with the HDMI 5-V power supply requirements. This section presents a simplified discussion of the design process for this protection device.

### 8.2 Typical Application

A typical application schematic for an HDMI 1.4 transmitter port protected by the TPD13S523 is shown in [Figure 11](#). The eight TMDS lines and five control lines are connected to their respective pins for ESD protection. The 5-V power path is connected through the 55-mA current limit switch.

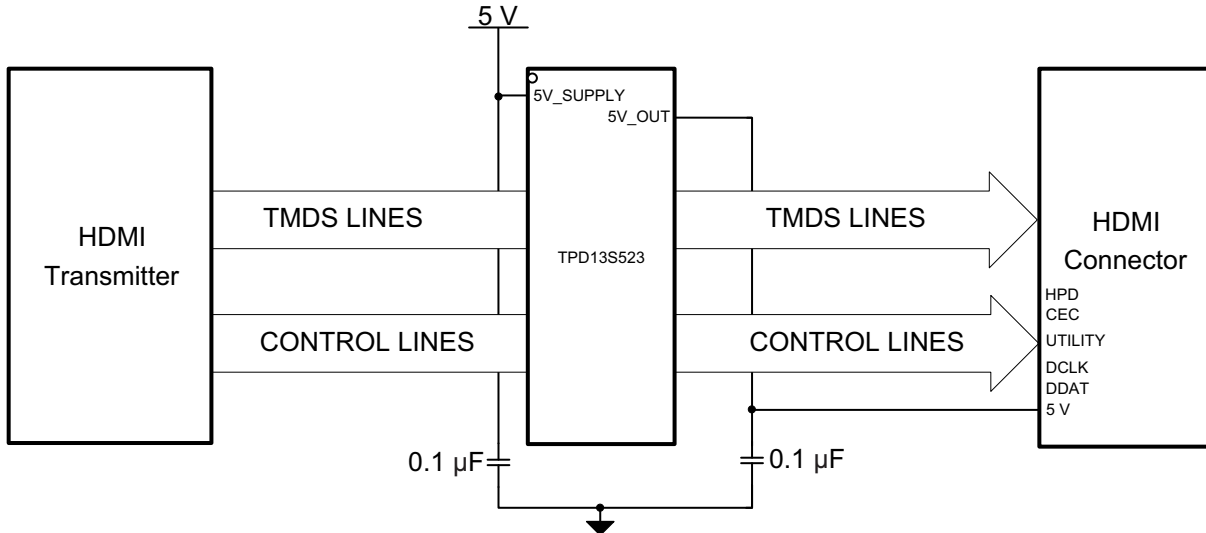

Figure 11. TPD13S523 Configured With an HDMI 1.4 Transmitter Port

#### 8.2.1 Design Requirements

For this design example, use the parameters listed in [Table 1](#) as input parameters.

Table 1. Design Parameters

PARAMETER	EXAMPLE VALUE
Voltage on 5V_SUPPLY	4.8 V - 5.3 V
HDMI Data Rate	3.4 Gbps

#### 8.2.2 Detailed Design Procedure

To begin the design process, the designer must know the following parameters:

- 5V\_SUPPLY voltage range
- Maximum HDMI data rate

### 8.2.2.1 5V\_SUPPLY Voltage Range

The TPD13S523 is capable of operating the 5V\_SUPPLY up to 5.5 V, with recommended voltage from 4.5 V to 5.5 V. In this example, the supply range is 4.8 V to 5.3 V, which satisfies this requirement.

### 8.2.2.2 Maximum HDMI Data Rate

The TPD13S523 is capable of operating at HDMI data rates in excess of 3.4 Gbps, compliant to the HDMI 1.4 maximum data rate. In this example, the maximum HDMI 1.4 data rate of 3.4 Gbps has been chosen.

### 8.2.3 Application Curves

## 9 Power Supply Recommendations

The designer must consider the requirement for the 5V\_OUT voltage level. To ensure the voltage is within tolerance under load, set 5V\_SUPPLY to at least  $4.8\text{ V} + V_{\text{DROPP}}$  (205 mV). Otherwise, TPD13S523 is a passive ESD protection device and there is no need to power it.

## 10 Layout

### 10.1 Layout Guidelines

The TPD13S523 device offers little or no signal distortion during normal operation due to low I/O capacitance and ultra-low leakage current specifications. In the event of an ESD stress, this device ensures that the core circuitry is protected and the system is functioning properly. For proper operation, the following layout and design guidelines should be followed:

1. Place the TPD13S523 as close to the connector as possible. This allows the TPD13S523 to remove the energy associated with ESD strike before it reaches the internal circuitry of the system board.
2. Place two 0.1- $\mu\text{F}$  capacitors very close to the 5V\_SUPPLY and 5V\_OUT pins. These capacitors will help limit the noise at the 5V\_OUT power line, and also help with system level ESD protection.
3. Ensure that there is enough metallization for the GND pad. During normal operation, the TPD13S523 ESD pins consume ultra-low leakage current. During the ESD event, GND pin will see multiple amps of current. A sufficient current path enables safe discharge of all the energy associated with the ESD strike.
4. The critical routing paths for HDMI interface are the high-speed TMSD lines. With the PW package, all the TMSD lines (pin Dxx) can be routed in a single signal plane and still maintain the differential coupling and trace symmetry. This helps reduce the overall board manufacturing cost. The slow speed control lines can be routed in another signal layer through vias.
5. If the UTILITY or any other pin is not utilized, tie the pin to a ground rather than leave floating. Use a 75- $\Omega$  resistor to protect against shorts to ground.

## 10.2 Layout Examples

## 12 Mechanical, Packaging, and Orderable Information

The following pages include mechanical, packaging, and orderable information. This information is the most current data available for the designated devices. This data is subject to change without notice and revision of this document. For browser-based versions of this data sheet, refer to the left-hand navigation.

**PACKAGING INFORMATION**

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead/Ball Finish (6)	MSL Peak Temp (3)	Op Temp (°C)	Device Marking (4/5)	Samples
TPD13S523PWR	ACTIVE	TSSOP	PW	16	2000	Green (RoHS & no Sb/Br)	NIPDAU	Level-1-260C-UNLIM	-40 to 85	RA523	<a href="#">Samples</a>
TPD13S523RSVR	ACTIVE	UQFN	RSV	16	3000	Green (RoHS & no Sb/Br)	NIPDAU	Level-1-260C-UNLIM	-40 to 85	ZTT	<a href="#">Samples</a>

(1) The marketing status values are defined as follows:

**ACTIVE:** Product device recommended for new designs.

**LIFEBUY:** TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

**NRND:** Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

(2) **RoHS:** TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".

**RoHS Exempt:** TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.

**Green:** TI defines "Green" to mean the content of Chlorine (Cl) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

**Important Information and Disclaimer:**The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

SMALL OUTLINE PACKAGE

SOLDER PASTE EXAMPLE  
BASED ON 0.125 mm THICK STENCIL  
SCALE: 10X

4220204/A 02/2017

NOTES: (continued)

8. Laser cutting apertures with trapezoidal walls and rounded corners may offer better paste release. IPC-7525 may have alternate design recommendations.
9. Board assembly site may have different recommendations for stencil design.

# EXAMPLE BOARD LAYOUT

RSV0016A

UQFN - 0.55 mm max height

ULTRA THIN QUAD FLATPACK - NO LEAD

LAND PATTERN EXAMPLE  
EXPOSED METAL SHOWN  
SCALE: 25X

4220314/C 02/2020

NOTES: (continued)

3. For more information, see Texas Instruments literature number SLUA271 ([www.ti.com/lit/slua271](http://www.ti.com/lit/slua271)).
