

Type TE Series

Key Features

Up to 2500W Power rating in free air

Flameproof construction – UL94V coating

RoHS compliant

Custom terminations / leads available

Applications

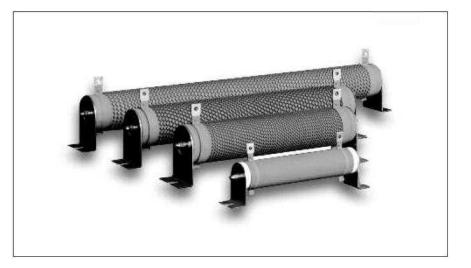

Large electrical and production machinery

Load test simulation

Motor start / stop cycles

Dynamic braking

Equipment discharge

TE Connectivity is a leading supplier of standard and custom-designed power resistors for industrial, control and general- purpose applications.

The TE range of flameproof coated tubular ceramic core resistors use both standard and edge wound (corrugated) winding methods to improve power handling capability. Designed for heavy duty machinery, electrical equipment, motor control etc. requiring stability and reliability.

Characteristics – Electrical

| Power rating @70°C in free air | 50W – 2500W (see table) |
|--------------------------------|-----------------------------|
| Resistance range | See table |
| Selection series | E12 |
| Tolerance | ±5% ±10% |
| Temperature Coefficient of | <20Ω ±400PPM/°C |
| resistance | ≥20Ω ±300PPM/°C |
| Operating temperature range | -55 ~ +155°C |
| Short term overload | 3 x rated power / 5 seconds |
| Dielectric strength | 2500VAC Min. |
| Insulation resistance | DC500V 20MΩ min. |
| | |

| 230070 | 121R ~ 2K7 | ±5% ±10% | 500VAC | Smooth |

Voltage rating:

Resistors shall have a rated direct-current (DC) continuous working voltage or an approximate sine-wave root-mean-square (RMS) alternating-current (AC) continuous working voltage at commercial line frequency and waveform corresponding to the power rating, as determined from the following formula:

 $RCWV = VP \times R$

Where : RCWV = Rated DC or RMS AC continuous working voltage at commercial-line frequency and waveform (volt)

P = Power Rating (watt)

R = Nominal Resistance (ohm)
