

TitanBrite™

2-Watt, 3-Watt and 5-Watt High Power LEDs

Lumex New TitanBrite™ 2-Watt, 3-Watt and 5-Watt Technologies Offers Superior Heat Dissipation and Unique Packaging

Compared to similar high power LEDs, the new TitanBrite™ products can provide up to a 30% improvement in heat dissipation performance and a 60% enhancement in electrostatic discharge protection. Whereas traditional high power LEDs require an additional heat sink or metal core PCB to control thermal dissipation, the unique packaging of the new TitanBrite products allows for the elimination of the metal core PCB and instead fuses to a lead frame to manage thermal output. This simplifies product design and reduces the number and cost of ancillary materials to make the product perform.

Features:

- Offers high intensity light of up to 58, 210 and 300 lumens respectively
- Provides thermal resistance as low as 7°C/Watt
- Available in 2-Watt (SML-LXL8047xxx/2 Series), 3-Watt (SML-LXL8047xxx/3) and 5-Watt (SML-LXL99xxx/5)
- 2-Watt version is available in yellow (591 nm typ) and red (623 nm typ)
- 3-Watt and 5-Watt are offered in blue (465 nm typ), warm white (2700K), and cool white (6000K) with red, green and yellow versions available at no additional cost

Applications/Markets

- Automotive
- Small Space Lighting
- Landscape
- Emergency Lighting
