■ APPLICATION CIRCUIT

* NJM2505A don't built-in 75Ω driver circuit. This IC's load capability is than 2kΩ.
Please make adequate evaluation.

APPLICATION

1: Please connect input surge resistance to 4pin(Vin) and 5pin(VGND). Please refer to Fig. 1. If resistance is enlarged, a waveform may deteriorate.

2: Please connect a diode in a VGND at large common mode noise may be inputted into a Vin(4pin) and VGND(5pin). Thereby, large common noise is restricted(refer to Fig.4).Current flows to a diode. Be careful of current capacity.
