### Description

The GS74116A is a high speed CMOS Static RAM organized as 262,144 words by 16 bits. Static design eliminates the need for external clocks or timing strobes. The GS operates on a single 3.3 V power supply and all inputs and outputs are TTL-compatible. The GS74116A is available in a 6 x 10 mm Fine Pitch BGA package and 400 mil TSOP Type-II packages.
