10.3Gbps Thunderbolt™ Port and DisplayPort™ Switch

Check for Samples: HD3SS0001

FEATURES

- **Compatible with Thunderbolt™ Technology Electrical Standards and DisplayPort ™1.2a**
- **Wide –3dB Differential Bandwidth of Over 10GHz on 10G Path**
- **Supports DP and DP++ Configurations**
- **Handles HPD (5V tolerant) and Cable Detect**
- **Supports AUX and DDC MUX**
- **Excellent Dynamic Characteristics (on 10G path, typical values at 5GHz):**
  - **Crosstalk = –35dB**
  - **Off-Isolation = –24dB**
  - **Insertion Loss = –1.5dB**
  - **Return Loss = –20dB**
  - **Intra-pair Skew Added < 4ps**
- **Single 3.3V Power Supply**
- **Small 3x3mm 24-Pin QFN Package**
- **Low Power Consumption**
  - **3.3mW Typical Active Power**
  - **80 µW Typical Detect Mode**

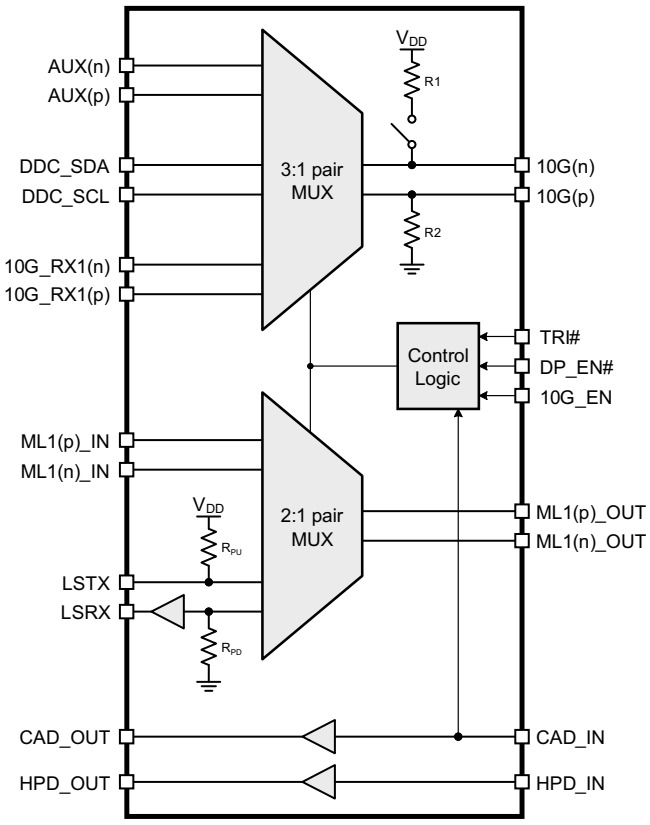
DESCRIPTION

The HD3SS0001 is a high-speed passive-switch device with integrated buffers and resistors, designed to support Thunderbolt™ technology, DisplayPort, and Dual Mode DisplayPort. The 10G path supports a high 10GHz bandwidth and excellent loss characteristics, while the DisplayPort path supports 5.4Gbps.

The integrated 3-pairs to 1-pair multiplexer (3:1 MUX) switches between DDC, AUX, and 10.3Gbps signals. The integrated 2-pairs to 1-pair multiplexer (2:1 MUX) switches between the Thunderbolt™ technology Low Speed UART transmit/receive pair and DisplayPort Main Link 1.

The MUXs are controlled by 4 input pins: TRI#, DP_EN#, 10G_EN, and CAD_IN (cable detect from the connector). The HD3SS0001 is packaged in a small 3x3mm 24-pin QFN, operates from a single 3.3V supply, and supports an ambient temperature range of –40°C to 85°C.

FUNCTIONAL DIAGRAM



These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

(1) NOTE: The HD3SS0001 can tolerate polarity inversions for the differential signals denoted by the (p) and (n) terminology, to ease potential board routing issues. LSTX/LSRX cannot be swapped, since LSRX is buffered and therefore unidirectional. Also, note that the integrated pullup on 10G(n) and the integrated pulldown on 10G(p) cannot be swapped.

(1) The maximum ratings are simulated for V_{DD} = 3.6V.

RECOMMENDED OPERATING CONDITIONS

Typical values for all parameters are at V_{DD} = 3.3V and T_A = 25°C. (Temperature limits are specified by design)

		ML1(n)_OUT; V_{DD} = 3.6V, V_{IN} = GND (when 2:1 MUX selects LS)			100	
V_{I/O_Diff}	Differential I/O voltage	AUX(p)/AUX(n), 10G_RX1(p)/ 10G_RX1(n), ML1(p)_IN/ML1(n)_IN, 10G(p)/10G(n), and ML1(p)_OUT/ML1(n)_OUT when MUX's are connected to Differential Signals.	0		1.8	Vpp
V_{I/O_CM}	Common mode I/O voltage	AUX(p)/AUX(n), 10G_RX1(p)/10G_RX1(n), ML1(p)_IN/ML1(n)_IN, 10G(p)/ 10G(n), and ML1(p)_OUT/ML1(n)_OUT when MUX's are connected to Differential Signals.	0		2.0	V

(1) V_{DD} range supports 3.0V to 3.6V, but for Thunderbolt products it is anticipated that the V_{DD} must be maintained at less than or equal to 3.4V to ensure that the V_{OH} on the LSRx do not exceed 3.4V.
(2) HPD_IN is 5V tolerant.

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

(2) **RoHS:** TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".
RoHS Exempt: TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.
Green: TI defines "Green" to mean the content of Chlorine (Cl) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

RLL (S–PVQFN–N24) PLASTIC QUAD FLATPACK NO–LEAD

THERMAL INFORMATION

This package incorporates an exposed thermal pad that is designed to be attached directly to an external heatsink. The thermal pad must be soldered directly to the printed circuit board (PCB). After soldering, the PCB can be used as a heatsink. In addition, through the use of thermal vias, the thermal pad can be attached directly to the appropriate copper plane shown in the electrical schematic for the device, or alternatively, can be attached to a special heatsink structure designed into the PCB. This design optimizes the heat transfer from the integrated circuit (IC).

For information on the Quad Flatpack No–Lead (QFN) package and its advantages, refer to Application Report, QFN/SON PCB Attachment, Texas Instruments Literature No. SLUA271. This document is available at www.ti.com.

The exposed thermal pad dimensions for this package are shown in the following illustration.
